The diagram illustrates two measurement methods for an ABS sensor. The top method, labeled 'SENSOR LENGTH', shows a sensor with a ruler indicating the length from the connector to the sensor housing. The bottom method, labeled 'CABLE LENGTH*', shows a sensor with a ruler indicating the length from the connector to the end of the cable. A small note at the bottom states: '*Cable Length: Measurement starts from the connector (B) to the point where the wire meets the sensor housing (A). The measurement does not include the sensor's total length.'
