TABLE OF CONTENTS

Spicer Axle Parts Book	2	Axle Housing & Axle Shafts	19
Forward Tandem Axle		Ring Gear and Pinion Identification .	21
Differential Carrier	3	Gear Sets	23
DS340 & DS380 Models		Input and Output Yokes	25
w/2-Speed Differential Carriers . . .	11	Pinion Bearing Spacers	26
Rear Tandem Axle		Power Divider Conversion Kit	27
Differential Carrier	12	Helical Gear Conversion Kit #113561	28
Differential Lockout (Forward Axle)		Differential Carrier Assembly	29
Current Production Model16	Yoke Selection Guide	30
Non-Current Production Model17	Wheel Differential Kits	31

Spicer Axle Parts Book

J&K Corporation, Axle & Brake Division presents this Parts Book as an aid in the identification and procurement of replacement parts for J&K Axles. The information included covers the differential carrier assembly, axle housing, axle shafts, shift system and special-designed parts kits and assemblies.

Exploded views are used to illustrate the parts and show their relationship to other parts on the carrier. Each part is identified by an item number, which in turn, leads to a list containing part name and part number.

For convenience, part numbers have been included for all pieces of the carrier assembly. However, some of these parts, such as differential carrier and caps, are serviced only in kits or assemblies. Part numbers are for your reference only. Those parts not serviced separately are identified with NSS.

Genuine Spicer Parts.

When you buy genuine J&K replacement parts, you receive the same high quality and exacting tolerances you find in the original axle components.

Only genuine J&K parts have the latest J&K engineering improvements and assure equal or better performance than the original parts.

And J&K backs you up with a responsive and capable service organization located strategically to provide you with emergency parts and service when you need them.

Insist on J&K quality. Use genuine J&K replacement parts.

Abbreviations

AR-As Required: Parts that vary in quantity with each axle. Example: shims.

NSS-Not Serviced Separately: Items which can only be purchased in sets, kit form or service assemblies. Example: ring gear sets.

RH/LH-Right Hand/Left Hand: Determined as viewed from behind the vehicle looking forward.

“RTV”-Gasket Compound: Formed-in-place gasket sealer. It is recommended for use on all surfaces requiring a gasket.

Spicer Parts Kits

J&K Parts Kits give you an economical, convenient way to stock J&K replacement parts. They contain all the parts you need to do a complete professional job of overhauling or repairing your J&K axle. And you have only one part number in one easily stored package to order, stock, identify, and satisfy your customers' needs.

Symbols:

This symbol is used throughout this book to identify parts included in major kits.

- * Carrier Basic Overhaul Kit
- Bearing Kit

Ordering Spicer Axle Parts

Place all your parts orders through your truck dealer or manufacturer (OEM). Do not order parts directly from J&K Corporation, Axle & Brake Division.

How to use this Parts Book

1. Refer to table of contents on opposite page for axle type, model or series, and page number.
2. Turn to the page that applies to the axle in question.
3. Locate the desired part in the exploded illustration and note Item No. This Item No. will lead you to the part name and number.
4. Refer to the related Parts Listing and locate the same Item No. and the name. If more than one part number is listed, refer to the axle model listings at top of list and select the part number that applies to the axle being serviced.

Axle Model Coverage:

This publication covers single reduction highway tandems (34,000-45,000 lbs.):

Forward Tandem Axle	Rear Tandem Axle
34DS	34RS
38DS	38RS
DS340	RS340
DS380(P)	RS380
DS400-P	RS400
DS341	RS341
DS381 (P)	RS381
DS401-P	RS401
DS341	RS341
DS402(P)	RS402
DS451-P	RS451

PLEASE REVIEW THESE NOTES PRIOR TO USING THIS PUBLICATION!

During the 4th Quarter of 1990, J&K began using new seals and yoke & slingers on models covered in this publication. The new seals and slingers are noticeably different from the current seals and will affect interchangeability. Before replacing seals or yoke & slingers, please refer to information on the top of page 25.

This publication has been designed to help you service highway tandem models built since 1958. Please note the column heads at the top of each parts list. The current models appear first, followed by earlier models.

Model changes were made to the current production models effective April 6, 1989 (96th day of 1989). Quick identification can be made by checking the carrier casting number on the rear tandem (127045 or 128109).

From 1972 until May 1978, DS340 and DS380 tandems were built with 2-Speed differential carriers. Special instructions and parts list for these models can be found on page 11.

NSS - Not Sold Separately

NOTE 1: Early models axles are equipped with 2-Speed differential carrier produced prior to May 1, 1978 (date code 1218). A parts listing for these models can be found on page 11.

NOTE 2: 120924 is supplies with 11081/110812 Output Shaft Bearing Cup & Cones as well as 110810 Output Shaft Side Gear. Power Divider must also be converted to DS341/381/401. 120923 is supplies with 110811/110812 Output Shaft Bearing Cup & Cones as well as 119896 Output Shaft Side Gear. Power Divider must also be converted to DS340/380/400 or DS341/381/401.

NOTE 3: 98603 is interchangeable with 115123 by also using a new Input Yoke.

NOTE 4: For earlier style output Shafts 46647 and 98603, use 44178 snap ring.

NOTE 5: Helical Gear Conversion Kit 113561.

NOTE 6: 103289 and 106709 interchangeable with 115122 by also using 211634 Cover, Cup & Seal Assy, 91136 Bearing Cone and new Input Yoke.

NOTE 7: Early model axles use a ball bearing on input shaft. To convert ball bearing to taper bearing, use Kit 86967 which contains items 53, 54 & 56.

NOTE 8: Axles built prior to May 1, 1982 use 95207 self-locking nut. Later models use 118806 slotted nut plus 118807 roll pin.

NOTE 9: **PLEASE REVIEW INFORMATIN ON TOP OF page 25 BEFORE ORDERING OIL SEALS.**

NOTE 10: 213608 replaces P/N 104509 in models with lube pump only. Sold only as complete assembly.

DS340 & DS380 Models w/2-Speed Differential Carriers

From 1972 until May 1, 1978 (date code 1218) DS340 and DS380 (forward and rear) tandems were built with 2-Speed differential carriers. The listing below shows part number variation between tandems built with single-speed and 2-Speed differential carriers. Those parts identified with an * are the same as D340/D380 dual range tandems.

Carrier design variations are shown in the adjacent illustrations.

Part Name (Qty. per Axle)	Forward Axle		Rear Axle	
	Single-Speed Carrier	2-Speed Carrier	Single-Speed Carrier	2-Speed Carrier
Differential Carrier & Bearing Caps				
Diff. Carrier & Bearing Cap Assy. (1)	120924	120926	67804	67759*

**Hub Bearing Adjuster Nut Wrench is available, nut 19186, use wrench 15751; nut 11249, use wrench 24042.

Note 1: Wheel Nut & Lock Kit #121343 contains 2 each 119881 outer nut, 119882 inner nut, 119883 nut lock and instruction sheet. This kit is recommended when servicing all D381 thru D451 axles. However, the individual parts are not interchangeable with existing parts.

Ring Gear and Pinion Identification

Ring Gear and Drive Pinion are matched parts and must be replaced in sets.

Complete identification is stamped on both parts shown in the adjacent drawing.

Order by J&S "Set No." which includes drive pinion nut.

**Hub Bearing Adjuster Nut Wrench is available, nut 19186, use wrench 15751; nut 11249, use wrench 24042.

Note 1: Wheel Nut & Lock Kit #121343 contains 2 each 119881 outer nut, 119882 inner nut, 119883 nut lock and instruction sheet. This kit is recommended when servicing all D381 thru D451 axles. However, the individual parts are not interchangeable with existing parts.

Axle Housings (forward and rear)

All drive axles are mounted in Spicer® fabricated steel axle housings. These housings are developed to meet specific OEM requirements for dimensions, suspension mounting and brakes. If housing replacement is necessary, provide the truck dealer with the following information:

- a. Year, make and model of the truck.
- b. Axle model and ground loading capacity.
- c. Axle specification number.
- d. Type of brakes used.

Note: Facing rear of truck, axle specification number will be on right side.

Axle Shafts (forward and rear)

These axles will be found with a number of different axle shafts, on the basis of OEM specification. When ordering replacement axle shafts, note the part number stamped into the flange.

Input and Output Yokes

During the 4th Quarter of 1990, J&E began using new seals and yoke & slingers on the models in this publication. The new seals and slingers are noticeably different from the current seals and will affect interchangeability.

- The upgraded seals can be used on axles originally equipped with the old seals.
- J&E recommends the replacement of old yoke & slinger assemblies when the new seals are installed; however, the old yokes and slingers will work with the new seals.
- New yoke and slinger assemblies cannot be used with the old seal design on the forward tandem axles.
- New yoke and slinger assemblies can be used with the old seal on the tandem rear pinions.
- Yoke Assembly & Oil Seal Kits contain oil seal, yoke & slinger and instructions.
- Most non-J&E aftermarket seals will not be compatible with the new J&E yoke and slinger assemblies.
- J&E recommends the use of special installation tools conveniently packaged in the single kit (listed below).

Oil Seal Driver Installation Kit 212139 Includes:

- Instruction Sheet
- 126917 Driver Seal (Forward Input & Rear Pinion)
- 127787 Driver Seal Adapter (Forward Input)
- 127786 Driver Seal (Forward Output)

Helical Gear Conversion Kit #113561

This kit was designed to upgrade D340/D380 helical gears with the same product improvements that were incorporated into the high-torque tandems. The helical gears in this kit are a 5-pitch design, versus the original 7-pitch design, which makes them approximately 39 percent stronger. This improvement is particularly desirable for axles used with high-torque engines and fast ratios.

The pinion helical gear in this kit has 10 splines to accommodate all D340/D380 pinions, regardless of ratio. The helical side gear and bushing assembly is identical to the D341/D381 helical gear and is compatible with the sliding clutch, inter-axle differential, input shaft and output shaft side gears. Because the pitch is different, these gears will have to be replaced as a set, but once installed can later be serviced with individual parts.

For Axle Models D340, D380, D380-P, D400-P, when using original pinion and ring gear set. All ratios. All gearing types.

If new pinion and ring gear set is used during rebuild, use instructions for helical gears in gear set section (page 23).

**Replaces
Current
Part No.**

113561 Kit includes:

128042 Helical Side Gear & Bushing	85432
113556 Pinion Helical Gear (10 splines)	46977 or 74991

Note: Kit must be used if changing either current helical gear.

Differential Carrier Assembly

These carrier assemblies are complete, less input yoke.

*16" gearing

These hybrid diff. carrier assemblies were introduced in 1985. Because of J&E's unique interchangeability, one hybrid tandem replaces several generations tandems in the same ratio and gearing type. These new carriers contain old straight spline gears (except 400 and 401 series which use the same side gears). New yokes are required to use the new carrier (see instructions on page 30).

Yoke Selection Guide

(when using Hybrid Diff. Carrier)

34D/D380 and D340/380/400 carrier assemblies can be replaced by *new* 0341/381/401/402 carrier assemblies. These *new* carriers contain old straight spline side gears (except 400 and 401 series which use the same side gears).

New yokes (shown below) are required to use the *new* carrier. With your old yokes removed, measure the dimensions shown and choose new yokes to match your old yoke dimensions.

PLEASE REVIEW INFORMATION ON TOP OF PAGE 25 BEFORE ORDERING YOKE & SLINGERS.

Forward Axle

	Old A Dim.	A Dim.	B Dim.	C Dim.	Part Number
Input w/mudslinger - 44 involute splines					
1710		5.190"	1.939"	6.093"	127754
1760		5.250"	1.939"	7.001"	127755
1810		5.250"	1.939"	7.551"	127753
Output w/mudslinger - 34 involute splines					
1610	4.748"	4.938"	1.876"	5.312"	127741
1610	6.000"	6.190"	1.876"	5.312"	127738
1710	5.250"	5.440"	1.939"	6.093"	127739
1710	6.123"	6.313"	1.939"	6.093"	127740

NOTE: The "A" Dimension on old-style output yokes will be .190" shorter because of the elimination of the rear bearing retaining washer on the new family of axles.

Rear Axle

	A Dim.	B Dim.	C Dim.	Part Number
Input w/mudslinger - 39 involute splines				
1610	4.718"	1.876"	5.312"	127746
1610	5.310"	1.876"	5.312"	127745
1610	6.000"	1.876"	5.312"	127743
1710	5.250"	1.939"	6.093"	127744
1710	6.125"	1.939"	6.093"	127742

NOTE: The "A" Dimension on old-style output yokes will be .190" shorter because of the elimination of the rear bearing retaining washer on the new family of axles.

Wheel Differential Kits

NEW!

Wheel Diff. Side Pinion Kit which contains spider, side pinions, side gear thrust washers, and side pinion thrust washers.

With this one kit - 118748 - and loose side gears, you can service all three generations of highway tandems.

Wheel Diff. Side Pinion Kit

Wheel Diff. Kits (Includes Side Gear, Side Pinions, Thrust Washers & Spider)

NEW! Kit No.	Axle Model	Side Gear	Spline Info.	
118748	34, 340 Series	37072	16 Str.	98850
(contains:	341 Series	110525	39 Inv.	114469
side pinion 104139,	38, 380 Series	37069	16 Str.	85358
spider 38289,	381 Series	110527	41 Inv.	114470
and thrust washers	400, 401 Series	85486	33 Inv.	98853
27810 and 27827)
