Coalescer Fuel / Water Separator

(Filters, Filter Kits & Adaptor Heads)

Our coalescer filters take virtually 100% of the water out of diesel fuel by turning little drops into big drops. Luber-finer offers five models with three basic flow ratings. 100 GPH for large diesel engines, 50 GPH for medium diesel engines, and 20 GPH for small diesel engines.

Luber-Finer filters are not to be used with Aviation Fuels.

Non-Commercial Fuel Filter Assembly

The FT100 filter and mounting base assembly is recommended for aftermarket use on low volume power pumps and gravity-flow applications in agricultural, commercial, and industrial applications. For replacement filter, use FF2D or shorter version LFF12D. For filter without drain use LFF2.

Air Filter Identification Style Guide

A1

Air filter is standard round design with plastisol seals on both ends. Element has screen wire inner body, expanded metal outer body and a pleated paper media.

A2

Filter element is elliptical in shape. Plastisol end seals on both ends with screen wire inner body, expanded metal outer body and a pleated paper media.

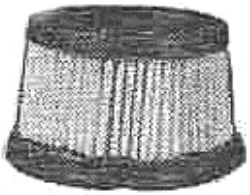
A3

Filter element is oval in shape. Element has plastisol end seals, screen wire inner body, expanded metal outer body and a pleated paper media.

A4

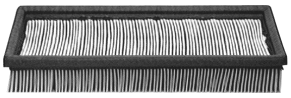
Round air filter with plastisol end seals. Smaller in diameter than A1 design.

A5



Element is conical shaped with plastisol ends and pleated paper media. One end is closed.

A6



Panel type element which can be square or rectangular. A urethane or plastisol seal is molded around the perimeter of one edge of the pleated paper media. The filter may contain an integral expanded metal reinforcement. May have metal frame or hard fiber support around pleats.

A7

Heavy duty type air filter element. Filter has open metal end caps on both ends. Typically will have gaskets on both ends, expanded metal inner and outer bodies enclose pleated paper media.

A8

Heavy duty type filter with a closed top metal end cap which may or may not contain stud hole. Top end cap will have a gasket attached. Bottom metal end cap will be open and will typically contain a gasket. Expanded metal inner and outer bodies enclose pleated paper media.

A9

Heavy duty type filter with closed top metal end cap with no gasket may or may not contain stud hole. Open bottom metal end cap typically has gasket attached. Expanded metal inner and outer bodies enclose paper media.

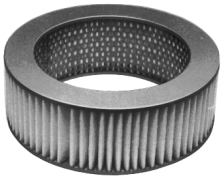
A10

Top metal end cap in non-gasketed end may be open or closed with or without a stud hole. Bottom metal end cap is open with a gasket attached. Expanded metal inner and outer bodies enclose paper media. Plastic fins located near the bottom of the element.

A11

Round air filter with closed top metal end cap, which will typically contain a stud hole. Bottom metal end cap is open and usually has a gasket attached. Expanded or perforated metal inner body supports paper media.

A12

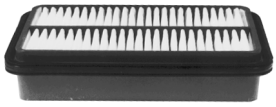


Round air filter with open top and bottom metal end caps. No attached gaskets. Expanded or perforated metal inner body supports paper media.

A13

Special design air filter with molded rigid plastic end caps around semi-circular pleated paper media. Air filter assembly has a gasketed outlet connector.

A14



Panel type air filter rectangular or square in shape. A flexible lip seal extends around the top of an outside hard plastic molded body which encloses pleated paper media.

A15

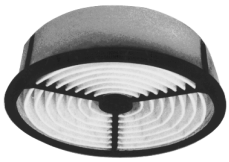
Round panel type air filter. A hard plastic molded body supports circular pleated paper media. A single location hole is near the center of the filter body.

Air Filter Identification Style Guide

A16

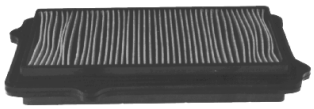
Round panel type constructions. A hard plastic molded body supports axially pleated paper media. Double location holes are near the center of the filter body.

A17



Round panel type air filter with hard plastic molded body supporting circular pleated paper media.

A18



Rectangular or square panel type air filter. A flexible lip seal extends around the center of the outside. Hard plastic molded body, which encloses a pleated paper media.

A19

Round air filter with open plastisol end seals on both ends. Expanded or perforated metal inner and/or outer body supports paper media

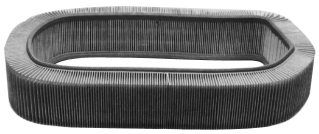
A20

Special round construction. Filter has closed top of molded hard plastic or metal end cap and an open bottom hard plastic molded end cap with integral molded outlet connector. Expanded or perforated inner body supports paper media.

A21

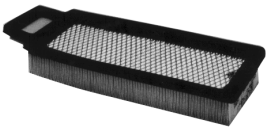
Oval filter with non-gasketed top metal end cap and open bottom metal end cap has a flange mounted seal gasket around outside. Expanded or perforated metal inner body supports paper media.

A22



Flexible design with top and bottom inside edge plastisol seals. No reinforcement bodies.

A23

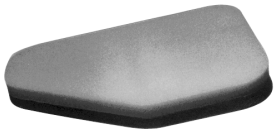


Rectangular panel air filter. A flexible seal is molded around the perimeter of one edge of the pleated paper media with an integral foam breather filter on one end.

A24

Unique oval design with hard molded plastic or urethane end seals. Expanded or screen wire inner body and expanded metal outer body supports paper media.

A25



Foam panel air filter. Oval shaped pad consisting of dual porosity foam media bonded together. Material fits inside frame work of O.E. filter and is self-sealing.

A26

Oval shape with open plastisol end seals on both ends. Expanded or perforated metal inner and/or outer body supports paper media.

A27

Circular shaped foam media supported by a perforated inner and outer metal body which is self-sealing in housing.

A28

Oval air filter with gaskets attached to both top and bottom metal end caps. Expanded or perforated inner and/or outer body supports paper media.

A29

Rectangular or square panel type air filter. A soft molded foam urethane body with integral lip seal with indexing protrusion extends around the center of the body. Pleated paper media is exposed on both sides.

A30

Rectangular or square panel air filter constructed of soft molded foam urethane body with integral lip seal extending around the perimeter of on edge of the pleated paper media.

Air Filter Identification Style Guide

A31

Rectangular or square panel type air filter. Soft molded urethane body with integral lip seal extending around the center of the body. Pleated paper media.

A32

Special design, Tri-oval shape. Open plastisol end seals on both ends. Screen wire inner body. Expanded metal outer body. Pleated paper media.

A33

Heavy duty type air filter with flanged closed top metal end cap which may or may not contain a stud hole. Flange will typically have an internal seal gasket. Bottom metal end cap is open and may or may not have a gasket attached. Expanded or perforated metal inner and outer bodies enclose paper media.

A34

Heavy duty air filter with non-gasketed top metal end cap may be open or closed with or without stud hole. Open bottom metal end cap typically has gasket attached. Expanded metal inner and outer bodies enclose paper media. Plastic fin located at top end.

A35

Heavy duty type air filter with gasketed top metal end cap which may be open or closed with or without a stud hole. Open bottom metal end cap typically has gasket. Expanded metal inner and outer bodies enclose paper media. Plastic fin located at top end

A36

Cone shaped heavy duty type air filter. Has non-gasketed top metal (small end) end cap which is typically closed. Open bottom metal end cap typically has gasket attached. Expanded metal inner and outer bodies enclose paper media.

A37

Filter cartridge is self-contained in a plastic or metal disposable unit assembly. Filter cannot be disassembled or cleaned. Housing has one outlet connector.

A38

Heavy duty air filter with closed top metal end cap which may or may not be gasketed with or without a stud hole. Open bottom metal end cap with flange gasket. Expanded metal inner and outer bodies enclose paper media.

A39

Heavy duty type air filter with closed top metal end cap with or without a stud hole. Top gasket may be attached. Open bottom metal end cap usually has gasket attached. Expanded or perforated metal inner and outer bodies enclose paper media. Plastic fin located at center or near bottom of filter. Some models may contain restriction gauge fittings in top end cap.

A40

Heavy duty housing/air filter assembly. Filter cartridge is self-contained in a metal disposable unit assembly. Filter cannot be disassembled or cleaned. Housing has grated opening on side.

A41

Cone shaped heavy duty type air filter non-gasketed closed top (small end) metal end cap with flange around outside diameter. Open bottom metal end cap typically has gasket. Expanded or perforated metal inner and outer bodies enclose paper media.

A42

PHOTO NOT AVAILABLE

Heavy duty type air filter with closed top metal end cap with flange around outside diameter containing a seal gasket. Open bottom metal end cap with flange around outside diameter containing seal gasket. Expanded or perforated metal inner and outer bodies enclose paper media.

A43

Heavy duty type air filter with non-gasketed top metal end cap may or may not contain stud hole. Open bottom plastisol end cap with sealing bead. Perforated metal inner and outer bodies enclose paper media.

A44

Industrial/heavy duty type air filter with non-gasketed top end cap typically has stud hole. Open bottom (no end cap) with sealing gasket around bottom outside diameter. Perforated inner body supports felt media.

A45

Heavy duty type air filter with closed top plastisol end seal and open bottom plastisol end seal. Expanded metal inner and outer bodies enclose paper media.

Air Filter Identification Style Guide

A46

Heavy duty type air filter with dome top metal end cap with flange around outside diameter with included center wing nut. Open bottom metal end cap with flange around outside diameter. Expanded metal inner and outer bodies enclose paper media.

A47

Standard round air filter with open plastisol end seals on both ends. Screen wire, expanded metal or perforated metal inner and outer bodies enclose pleated paper media. Foam wrap on outside diameter of filter.

A48

Panel type air filter square or rectangular configuration. A urethane seal is molded around the perimeter of one edge of the pleated paper media. The filter contains a flat perforated metal reinforcement with a raised central ridge.

A49

PHOTO NOT AVAILABLE

Heavy duty type air primary filter gasketed closed top metal end cap with central located bail. Open bottom molded urethane end seal allows for inside radial seal of secondary filter. Expanded metal inner and outer bodies enclose paper media.

A50

PHOTO NOT AVAILABLE

Heavy duty type air secondary filter gasketed closed top metal end cap. Open bottom molded urethane end seal allows for outside radial seal of primary filter. Expanded metal inner and outer bodies enclose paper media.

A51

Heavy duty type air filter with open top and bottom metal end caps with no gaskets. Expanded metal inner and outer bodies enclose paper media.

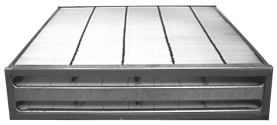
A52

Cone shaped heavy duty type air filter. Gasketed top metal (small end) end cap is typically closed. Gasketed open bottom metal end cap. Expanded metal inner and outer bodies enclose paper media.

A53

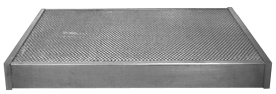
Square or rectangular filter with varying number of filter tubes of the same height. The number of tubes range from four to sixty-four per element. The seal is achieved by the over-hanging lip extending around the four sides.

A54



Heavy duty square or rectangular panel filter. May or may not have sealing gasket attached. Pleated paper media protected with perforated metal.

A55



Panel type filter with pleated paper encased in metal frame and protected with perforated metal. A sealing gasket may or may not be attached.

A56

Heavy duty type filter with non-gasketed closed top metal end cap which may or may not contain stud hole. Open bottom metal flanged end cap may or may not have gasket. Expanded metal inner and outer bodies enclose paper media.

A57

Screw-on type breather filter with large diameter male threads. Pleated paper media.

A58

Heavy duty type air filter with rain boot gasket on closed top metal end cap which may or may not contain stud hole. Open bottom metal end cap may or may not have gasket. Expanded metal inner and outer bodies enclose paper media.

A59

Cone shaped heavy duty type air filter with non-gasketed flanged closed top metal end cap (small end) housing lid. Open bottom metal end cap typically has gasket attached. Expanded metal inner and outer bodies enclose paper media.

A60

Bag type air filter.

Air Filter Identification Style Guide

A61

Heavy duty type air filter with gasketed top metal end cap which is typically closed with or without stud hole. Open bottom metal flanged end cap may or may not have a gasket. Expanded metal inner and outer bodies enclose paper media.

A62

Heavy duty air filter with non-gasketed closed top metal end cap. Non-gasketed open bottom metal end cap. Perforated or expanded metal inner and outer bodies enclose non-woven batt media wrapped around pleated paper media.

A63

Heavy duty type air filter with non-gasketed top metal end cap which is typically closed. Open bottom flanged metal end cap with integral studs may or may not have gasket. Expanded metal inner and outer bodies enclose paper media.

A64

A square heavy duty filter which also serves as part of the housing assembly. Unit may have horizontal or vertical inlet openings.

A65

Heavy duty type air dome top metal end cap with flange around outside diameter with included center wing-nut. Open bottom end cap typically has gasket. Plastic fin located around bottom end cap. Expanded or perforated metal inner and outer bodies enclose paper media.

A66

Heavy duty type air dome top metal end cap with threaded mounting stud. Open bottom end cap with female mounting threads on inside diameter of cap. Expanded or perforated metal inner body supports paper media.

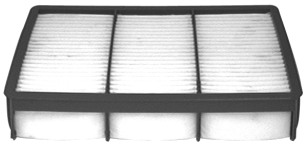
A67

Heavy duty type primary air filter with molded closed top urethane end cap. Molded open bottom urethane end cap allows for inside radial seal. Expanded metal inner and outer bodies enclose paper media.

A68

Heavy duty type secondary air filter with molded closed top urethane end cap. Molded open bottom urethane end cap allows for outside radial seal. Expanded metal inner and outer bodies enclose paper media or synthetic fiber wrap.

A69



Panel type air filter rectangular or square configuration, non-gasketed hard plastic molded body enclosing pleated paper media.

A70

Special housing air filter assembly-round molded hard plastic end caps enclosing pleated paper media supported by inner perforated metal body, integral inlet tube mounted on open end cap has flexible seal/stop.

A71

Conical round type air-molded plastic hemispherical nose cone attached to top (small diameter end) of pleated paper media, open urethane bottom end cap seal.

A72

Panel type air-unique design comprised of unequal length molded hard plastic sides with a separate flexible lip seal with multiple indexing points about the outside totally enclosing pleated paper media.

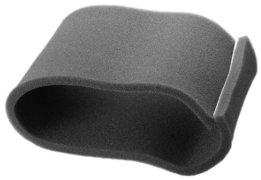
A73

Automotive Cabin Air Filter; Rectangular plastic frame with exposed pleated media. May or may not have attached sealing gasket.

A74

Panel type square air or rectangular configuration. A molded rubber seal is attached around the perimeter of a stamped metal support pan within which the pleated paper media is sealed.

A75



Foam type geometric shaped foam air filter.

Air Filter Identification Style Guide

A76

Heavy duty type air filter with closed top metal end cap with no gasket may or may not contain stud hole. Open bottom metal end cap typically has gasket attached. Expanded or perforated metal or plastic inner and outer bodies enclose wrapped style media.

A77

Heavy duty type gasketed or non-gasketed closed top metal end cap which may or may not contain stud hole. Open bottom metal flanged end cap may or may not have gasket. Expanded or perforated metal or plastic inner and outer bodies enclose wrapped style media.

A78

Heavy duty type air filter open top metal end cap may or may not contain seal gasket-flanged bottom metal end cap may or may not contain seal gasket-expanded or perforated metal or plastic inner and outer bodies enclose wrapped style media.

A79

Heavy duty type air filter dome top flanged metal end cap with retained wing nut assembly may or may not contain seal gasket. Open bottom metal end cap may or may not contain seal gasket. Expanded or perforated inner and outer metal bodies enclose paper media.

A80

Heavy duty type air filter dome top metal end cap may or may not contain stud hole or seal gasket. No end cap seal on bottom end of filter. Wrapped type media extends beyond expanded or perforated metal inner and outer bodies to provide bottom end seal.

A81

Panel type air filter with a square or rectangular configuration. A urethane or plastisol seal is molded around the perimeter edge of the pleated paper media pack. The filter may or may not contain an integral expanded metal reinforcement. A foam sheet is bonded to the inlet side of the pleated pack for primary filtration.

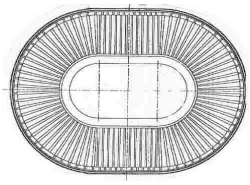
A82

Air filter with round or geometric configuration, has foam media bonded or secured to a plastic or metal reinforcing plate.

A83

Round configuration air filter, closed urethane top end seal. Open bottom flanged urethane end seal. Pleated paper media lacks inner and outer reinforcement bodies.

A84



Round or oval air filter with closed, domed top metal end cap. May or may not contain stud hole. Open bottom metal end cap. Expanded or perforated outer body and screen wire inner body. Enclosed paper media with foam wrap.

A85

Round configuration air, closed dome top endcap. Open bottom end cap with multiple external locating tabs.

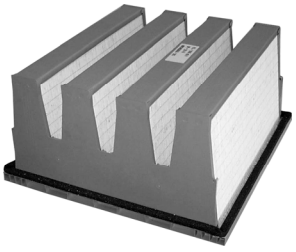
A86

Heavy duty air with primary radial seal, open top and bottom urethane end seal. Expanded metal inner and outer bodies enclose paper media.

A87

Round or oval air filter with closed, domed top metal end cap. May or may not contain stud hole. Open bottom metal end cap. Expanded or perforated outer body and screen wire inner body. Enclosed paper media with foam wrap.

A88

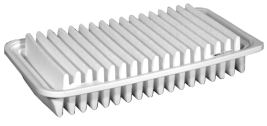


Industrial panel type, air-multiple filter packs housed in pareallet spacing with a common gasketed sealing flange.

A89

Industrial dust collection type air – H.D. style construction – closed top metal end cap – flanged gasketed open bottom metal end cap with additional affixed flange perpendicular to mounting flange.

A90



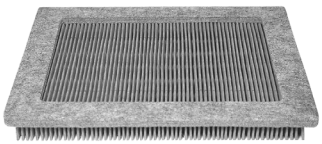
This filter will have a plastic molded lid around the media, with a rubber gasket seal attached to the molded plastic lip.

Air Filter Identification Style Guide

A91

Heavy duty housing/ air filter assembly. Element and housing contained in on self-contained disposable unit. Filter cannot be disassembled or cleaned.

A92



Panel type air filter can be square or rectangular. A felt seal is glued around the perimeter of the pleated media.

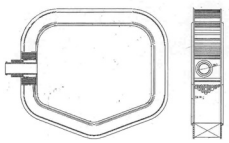
A93

Panel type air filter is “V” shape in design. Two filter packs housed in “V” shape design. Gasket may or may not be attached to pen end. Expanded metal inner and outer bodies enclose paper media.

A94

Heavy duty air filter with corrugated media enclosed in a plastic housing, open top and bottom. Gasket attached to one end.

A95



Unique oval design with plastisol end seals. No body on the outside and perforated metal on the inside. Extension tube extruding from the side of the filter.

A96

Heavy duty type air primary filter radial seal molded top and bottom urethane end seal. Open top and bottom. May or may not have expanded or perforated metal outer body or no body. Inner body will have perforated or expanded metal. Plastic fin attached to one end.

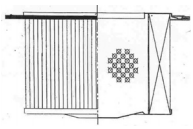
A97

Heavy duty air Filter with corrugated media with a plastic top piece. Open top and bottom. Gasket attached to one end.

A98

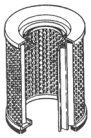
Cylindrical shaped filter with pleated paper media. Has perforated metal outer body and exposed inner. Has metal end caps; one end having crown shaped attachment.

A99



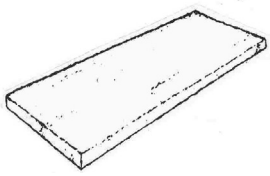
Heavy duty air filter with open top metal end cap with flange and gasket. Closed bottom metal end cap. May or may not have outer body. Perforated metal inner body.

A100



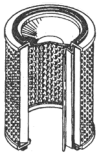
Special design heavy duty air filter with both ends open. One end has gasket attached. Other end cap is a “step” design with solts for mounting bolts. This end also has a sealing gasket attached underneath the “step”. Expanded or perforated bodies enclose the filter media.

A101



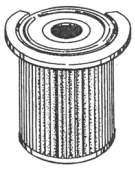
Rectangular pad of non-woven material. For use as an outer wrap.

A102



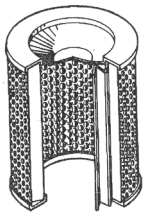
Heavy duty air filter with one end closed and the other open. Some closed end caps have a small bleed hole for restriction reading. Gaskets attached to both ends. Expanded or perforated metal inner and outer bodies enclosed paper media.

A103



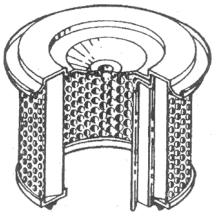
Special design filter with exposed paper media. Metal end caps. One end open with captured O-ring and 2/3 of the end cap extending out beyond the pleated paper. The other end is closed with inserted and attached foam pad.

A104



One end cap closed and the other open. No attached gaskets.

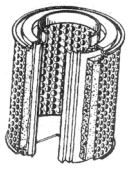
A105



Mushroom-shaped end cap with bolt hole and open end cap with gasket attached. Pleated paper media enclosed in expanded or perforated inner and outer bodies.

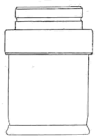
Air Filter Identification Style Guide

A106



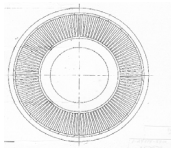
Special design heavy duty air filter with one end closed and one open. No attached gaskets. May or may not have non-woven batt media around pleated paper.

A107



Heavy duty type air filter with open top and flanged bottom that may or may not contain a gasket. Expanded or perforated metal or plastic inner body. Outer body wrapped style media.

A108

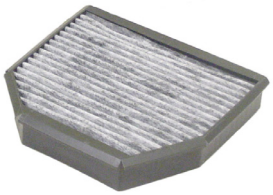


Round panel type construction. A hard plastic molded body supports axially pleated paper media. No location holes in this filter.

A109

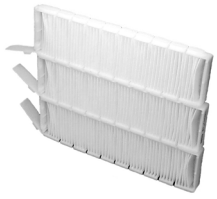
Automotive Cabin Air Filter; Rectangular shaped pleated media with fiber media side support. No attached gasket.

A110



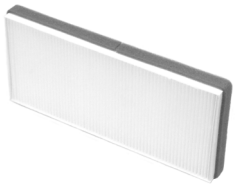
Automotive Cabin Air Filter; Irregular shaped plastic frame with exposed pleated media, with or without attached gasket.

A111



Automotive Cabin Air Filter; Three (3) piece rectangular plastic frame with pleated media.

A112

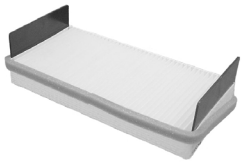


Automotive Cabin Air Filter; Rectangular shaped pleated media with fiber media side support. Has attached foam or rubber gasket.

A113

Automotive Cabin Air Fitler; Irregular shaped pleated media with fiber media side support; with or without attached gasket.

A114



Automotive Cabin Air Filter; Rectangular shaped pleated media with foam gasket. Plastic centering tabs on each end.

A115

Cone shaped heavy duty air with open top and bottom urethane end seal. Molded open top urethane end cap allows for inside radial seal. Molded open bottom urethane end cap allows for outside radial seal. Expanded metal inner and outer bodies enclose paper media.

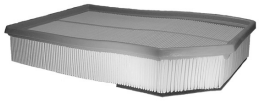
A116

Heavy duty air with corrugated media with urethane molded top & bottom seal. Open top and bottom.

A117

Heavy duty air filter with corrugated media with urethane top seal. Open top and bottom.

A118



Panel type air filter with a irregular configuration. A urethane or plastisol seal is molded around the perimeter edge of the pleated paper media pack. The filter may or may not contain an integral expanded metal reinforcement. May or may not have a full or partial foam sheet which is bonded to the inlet side of the pleated pack for primary filtration.

A119

Rectangular or square panel air filter with hard molded plastic body around pleated paper media. Molded rubber gasket around top of filter extended beyond surface and forms rectangular seal for air intake.

A120

Heavy duty type primary air filter with fin. Molded closed top urethane end cap. Molded open bottom urethane end cap allows for inside radial seal. Expanded metal inner and outer bodies enclose paper media.

Air Filter Identification Style Guide

A121

Rectangular panel cabin air with hard molded plastic body around pleated non woven media.

A122

Rectangular panel cabin air with hard molded plastic body around pleated non woven media with a foam gasket on one end.

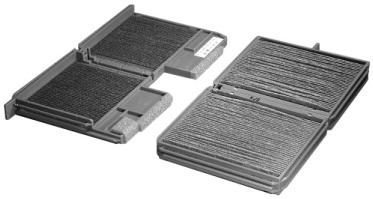
A123

Automotive Cabin Air filter; Irregular shape felt frame with one larger side. Has exposed pleated non woven media, with attached gasket.

A124

Automotive Cabin Air Filter; Irregular shape paper frame with exposed pleated media, with or without attached gasket.

A125



Automotive Dual Cabin Air Filter. Rectangular or saquare shape with pleated media incased in a plastic fram.

A126 (CAF24012)

Foam Pad

A128

Round safety element screen in frame with a gasket on the outer perimeter.

Breather Filter Identification Style Guide

B1  Pad type non-woven or foam material for positive crankcase ventilation or fuel emission control systems. Specialized shape can be square, rectangular, round or special cut.	**B2**  Housing type generally of plastic material usually located inside the carburetor air filter housing. Will have a curved form back with a hose adaptor extending from one side. Has a fiber type filter pad media insert that can be pulled out.	**B3** Plastic housing type with exposed pleated paper filter media attached to housing cap. Entire unit is disposable.
B4 Plastic or metal housing type air breather with filter media sealed inside housing.	**B5**  Molded urethane or plastisol seal body with pleated paper molded into body.	**B6**  Expanded metal inner and outer screen with filter batting material in between. Supplied with rubber gasket.

Spin-on Filter Identification Style Guide

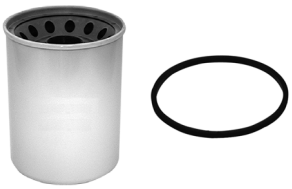
C1

Spin-on filter for all liquid type applications. The filter will have an inboard type gasket for seal to mounting base. The filter may or may not have wrench flats (flutes) on shell.

C2

Spin-on type filter for all liquid type applications. The filter has an outboard type gasket for seal to mounting base. Filter may or may not have wrench flats (flutes) on shell.

C3



Spin-on type filter for all liquid type applications. Filter has gasket seal for mounting base packaged loose. Filter may or may not have wrench flats (flutes) on shell.

C4

Spin-on type filter with mason jar type threads for all liquid type applications.

C5

Spin-on type filter for all liquid type applications. The filter has an inbound type gasket seal for seal to mounting base. The filter has a drain plug or petcock type drain or thread for drain attachment on dome end of filter. Filter may or may not have wrench flats (flutes) on shell.

C6

Spin-on filter for liquid type applications. Has outboard type gasket for seal to mounting base. Filter has a drain or petcock type drain, or threads for drain attachment on dome end. Filter may or may not have wrench flats (flutes) on shell.

C7

Spin-on type filter for all liquid type applications. Filter has a threaded portion at dome end for attachment of drain bowl or water sensor. Filter may have an inboard or outboard type gasket for seal to mounting base. Filter may or may not have wrench flats (flutes) on shell.

C8

Spin-on type filter for all liquid applications. Filter has an internal drain bowl and a drain plug or petcock on dome end. Filter may have an inboard or outboard type gasket for seal to mounting base.

C9

Spin-on type filter for all liquid type applications. Filter may or may not have a removable external drain bowl attached to filter. Drain bowl may have a threaded drain plug and a water sensor attachment. Filter may have an inboard or outboard type gasket for seal to mounting base.

C10

Spin-on type filter and mounting base kit for all liquid type applications. Filter used is of any design with or without drain or drain bowl and either inboard or outboard type gasket seal to mounting base.

C11

Spin-on type for all liquid type applications has an (inboard or outboard seal gasket and an inner retainer seal gasket.

C12

Spin-on type filter with out a base plate. Filter has threaded fittings on both end of filter for fuel line connections. Filter may also have bleed screw attachments.

C13

Spin-on filter for all liquid type applications. Filter has a nut attached to dome end for wrench installation or removal. Filter has an inboard base seal gasket. Filter may have flats (flutes) on shell or be smooth.

C14

Spin-on type filter for all liquid applications. Filter has a threaded base plate for attachment to a mounting base, but does not have a conventional external seal gasket on the end of the filter. The filter is sealed to the mounting base by use of two internal seal gaskets.

C15

Filter has a water sensor attachment located on the dome end of the filter. This attachment may be a threaded port or an attached electrical connection. Filter may or may not have a drain plug or a petcock also on the dome end. Filter has inboard or outboard base sealing gasket.

Spin-on Filter Identification Style Guide

C16 Spin-on type filter for all liquid type applications. The filter will have an outboard type gasket for seal to mounting base. The filter has a threaded center stud integral with the base plate for installation to the mounting base. The filter may or may not have wrench flats (flutes) on shell.	**C17** Plastic screw on filter assembly with replaceable element. With attached drain and sensor port.	

Cartridge Filter Identification Style Guide

D1

Element type filter with paper end caps. Element will have either metal or paper outer wrapper.

D2

Filter element with metal or paper end caps with metal or paper outer body wrapper. Open end caps on both ends and a washer type gasket attached to one end. Metal center support tube.

D3

Element type filter with metal end caps that are open on both ends with no attached gaskets. Metal or paper outer body wrapper or no outer body wrapper. With or with out internal metal center support.

D4

Element type filter with: metal or paper end caps on both ends. Grommet type post seal or retained washer bar seal or gasket attached to both end caps. Body may be paper, metal or without a body. Internal metal center tube support.

D5

Element type filter with double stacked element. Elements have grommet or other type bar seals. One element is a by-pass type with depth type media. The other is a full flow type with pleated paper media.

D6

Element type filter with metal or urethane end caps that have a rubber grommet seal or other type center bar seal gasket on one end. The other end is a solid cap. The filter may have an exposed pleated paper body or a metal or paper outer wrapper.

D7

Filter element with metal or paper end caps that have open I.D. on both ends and a flat wide gasket on both ends. Element will have a paper or metal body.

D8

Element type with metal or paper end caps. One end cap has an open I.D. and a flat wide gasket attached. The other end cap is closed. The element may have exposed pleats or a metal or paper outer wrapper.

D9

Sock type element for oil or fuel, outer wrap is made of a cloth material. The element may have a bail type pull-out device.

D10

Filter has metal end caps and pleated screen backed media or wire mesh media only. I.D. is open on both ends with a recessed O-ring type seal on each end. Element has no outer wrap.

D11

Element type filter with metal end caps and pleated screen backed media or wire mesh medial only. One end cap has an open I.D. with an O-ring type seal. The other end cap enclosed. The element has no outer wrap.

D12

Filter element has metal end caps that are open on both ends and have a recessed O-ring seal. Element has an outer wrap of metal or paper.

D13

Filter element with metal lids rolled seamed to metal body that has louvered openings. Open I.D. on both ends. Filter may have a gasket seal on one or both ends and have a bail pull out device.

D14

Element has metal end caps that have a rubber grommet seal on one end and a flat washer type gasket seal on the other end.

D15

Element has metal caps with an end seal gasket attached to both ends. Element may have a metal or paper outer wrap.

Cartridge Filter Identification Style Guide

D16

Element type with metal end caps that have an end seal gasket retained in the groove of the end cap. The other end cap is closed. Element may have a paper or metal outer wrapper.

D17

PHOTO NOT AVAILABLE

Filter is a bag type construction.

D18

Canister type fuel filter, rectangular shape, with metal or glass housing. Filter has rubber grommet inlet and outlet seals or threaded fuel line fittings.

D19

Canister type fuel filter, round in shape with metal case.

D20

Element type filter with metal end caps that have a retained O-ring seal on tope of one end cap and a closed end cap on the other end. Outer wrap may be paper or metal.

D21

Element type filter with metal end caps that have a raised retained O-ring on top of both end caps. Outer wrap can be paper or metal.

D22

Element type filter with metal end caps that have a raised retained O-ring seal on top of both end caps. The filter has no outer wrap. Media is screen wire backed or is a wire mesh media.

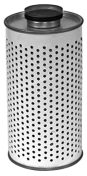
D23

Element type filter that has a coil retainer spring attached to one end.

D24

Element type filter with metal end caps or rolled seam type lids with metal inserts extending out of each end. Outer wrapper may be paper or metal.

D25



Element type filter with metal end caps or rolled seam type lid with a metal insert extending out of one end and a grommet or retained bar type seal gasket on the other end.

D26

Element type filter that is a double element design. One element inside the other.

D27

Filter has an external threaded extension on one end.

D28

Metal centrifugal type filter.

D29

Element type filter with metal end caps or rolled seam type lids that have a short lip on the I.D. extending outward from element on both ends.

D30

(Special Design) Design not related to any other styles.

Cartridge Filter Identification Style Guide

D31

Element type filter with: Metal end caps. Open end cap on one end, closed end cap on the other end. Metal or paper outer metal body or optional no body. Optional filter may have a relief valve. No attached gaskets.

D32

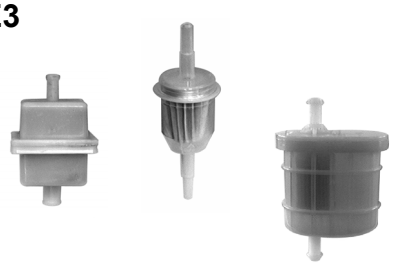
E1

Filters with metal case and straight inlet and outlet hose connection tubes on opposite ends of filter.

E2

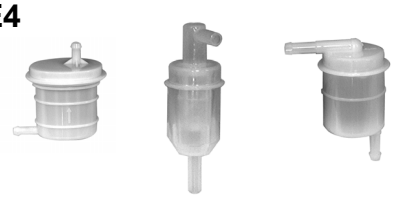
Filters have metal case and mounting bracket attached to filter. Straight inlet and outlet hose connector tubes on opposite ends of filter.

E3



Filters are constructed with plastic case and straight inlet and outlet hose connector tubes on opposite ends of filter.

E4



Plastic case construction with inlet and outlet hose connector tubes on opposite ends of filter. One tube is straight while the other tube extends out from opposite end of filter at a 90º angle.

E5

Metal case construction with bracket attached. Inlet and outlet hose connector tubes are on opposite ends of filter. One tube is straight up and the other tube is at a 90º angle to side of filter.

E6

Filter with metal case, with or without metal bracket and inlet and outlet hose connector tubes. One tube extends out of top of filter and turned at an angle. The other tube extends out the side of the filter case.

E7

Filters have plastic case with inlet and outlet hose connector tubes. Both tubes are on top of the filter and located 180º apart from each other.

E8

Filters have plastic case with inlet and outlet hoses connector tubes. Both tubes are on top of filter and located at various angles to each other.

E9

Metal case construction with both inlet and outlet hose connector tubes extending out of one end of the filter.

E10

Metal case construction with metal mounting bracket attached to filter. Inlet and outlet hose connector tubes extend out of one end of the filter.

E11

Filters are constructed with plastic case with inlet and outlet hose connector tubes. One tube extends out from the top of the filter. The other tube extends out of the side of the filter case.

E12

Plastic case construction with three hose connector tubes. Two tubes extend out from the top of the filter at any angle from each other. The third tube extends down from the bottom of the filter.

E13

Metal filter with three hose connector tubes. Two tubes extend out from one end of the filter at any angle to each other. The other tube extends straight out at a 90º angle from the case at the opposite end of the filter.

E14

Filter with metal case and three hose connector tubes. Two tubes on one end of filter extends straight out and one tube extends straight out from the other end of the filter.

E15

Metal filter with three hose connector tubes. Two tubes extend straight out from center of filter, one on each end. The other tube extends straight out or at a bent angle from the side of filter case.

In-Line Fuel Filter Identification Style Guide

E16

Metal filter with three nose connector tubes. One tube extends straight out from the top and one from the bottom of the filter. The other tube extends out from the outlet tube at a 90º angle.

E17

Filter with a metal case with two hose type connector tubes. One tube extends straight up from filter, and the other tube extends out from the filter at an angle.

E18

Metal filter with two hose connector tubes. Both tubes extend from opposite ends of the filter and both are bent at various angles.

E19

Metal filter with two hose connector tubes. Both tubes extend out of one end of the filter and both tubes are bent at various angles.

E20

Metal filter with straight hose connector tube extending out of one end of the filter and an internal threaded fitting on the other end of the filter.

E21

Metal filter with a straight hose connector tube extending out of one end of the filter. On the other end of the filter is a threaded fitting with a fuel line cradle attached.

E22

Filter with metal case with straight hose connector tube extending out of one end of the filter. The other end has external threaded fitting.

E23

Metal filter with bracket attached. A straight hose connector tube extends from one end of the filter. The other end of the filter has an external threaded fitting.

E24

Metal filter with internal threaded fitting on each end of the filter.

E25

Metal filter with three internal threaded fittings. One on each end of the filter and one on the side of the filter.

E26

Metal filter with two internal threaded fittings on each end of the filter. Bottom of this filter has a fuel line cradle attached to fitting. Filter may or may not have mounting bracket attached.

E27

Metal filter with two internal threaded fittings, one on each end of the filter. Top of the filter has a fuel line cradle attached to fitting.

E28

Metal filter with internal threaded fittings on each end of the filter. A fuel line cradle is attached to the fitting on each end of the filter. A mounting bracket may or may not be attached to the filter.

E29

Metal filter with two internal threaded fittings on the top of the filter. One fitting faces upward with a fuel line cradle attached. The other threaded fitting faces forward without a cradle.

E30

Metal filter with two internal threaded fittings on top of the filter. Both threaded fittings face upwards. A fuel line cradle is attached to both fittings.

In-Line Fuel Filter Identification Style Guide

E31

Metal filter with internal threaded fitting on one end of the filter and on external threaded fitting on the other end.

E32

Metal filter with external threaded fitting on each end of the filter. A mounting bracket may or may not be attached.

E33

Metal or plastic filter with quick connect clip type hose connector tube on each end of the filter.

E34

Metal or plastic filter with quick connect clip type hose connector tube on each end of the filter. A mounting bracket is attached to the filter.

E35

Metal or plastic filter with male quick connect clip type fuel line connector on one end of filter, and a female quick connect type connector on the other end. Filter may or may not have a mounting bracket attached to filter.

E36

Metal construction with hose connector type tube and a quick connect clip type connector tube, both extending out of one end of the filter. A mounting bracket may or may not be attached.

E37

Element type filter made with filter media other than paper. Commonly constructed of nylon or metal screen or sintered bronze.

E38

Universal fit filter with internal threaded fittings and loose fuel line cradles that are attached to filter as required.

E39

Metal filter with an internal threaded fitting on one end and a quick connect tube on the other.

E40

Metal or plastic filter with quick connect clip type hose connector tube on one end of filter and a hose attached to other end of filter with a female quick connect fitting on end of hose (Hose may be bent @ angle).

E41

Metal or plastic filter body with 3 lines attached to filter. Each line has a female quick-connect fuel line connector on opposite end, may have bracket.

E42

Metal or plastic body filter with (2) fuel lines with female quick connect connectors and one male quick connect tube, all on one end of filter. Filter may have a mounting bracket.

E43

Metal or plastic body filter with hose attached that has a female quick-connect fitting and a male quick-connect tube extending from one end of the filter. Filter may or may not have a mounting bracket attached to the filter.

E44

Metal filter with two male quick connect tubes extending from one end of the filter and one male quick connect tube extending from the other end. Tubes may be bent at an angle. Filter may or may not have a bracket attached.

E45

Filter with a metal case. Has both inlet and outlet tubes extending upward from one end of the filter. Tubes are male quick connect type connectors.

In-Line Fuel Filter Identification Style Guide

E46 Filter with a metal case and two or more hose connector tubes extending out from one end of the filter. The other end of the filter has a drain cock attached. Filter may have a threaded bleed screw attachment.	**E47** Filter with metal case and four hose connector tubes. Two tubes on each end of filter extend straight out from filter.	**E48** Filter with metal or plastic case. Filter has a male quick connect fitting plus a female quick connect fitting on one end of the filter. The other end has one male quick connect fitting. Filter may or may not have a bracket attached to the filter.
E49  Filter with metal case. Filer has internal threaded fitting on one end of filter and two male quick connect tubes on the other end. The quick connect tubes may be straight or at an angle.	**E50** Metal filter with internal threaded fitting on one end of filter and manifold with two internal threaded fitting on the other end of filter.

WARRANTY

Luber-finer filters are guaranteed to be free from defects in material and workmanship.

In the event of an engine or equipment failure directly caused by a proven defective filter, which was properly installed and changed following the engine or equipment manufacturer's recommended service intervals, Luber-finer will restore the engine or equipment to a condition equivalent to that existing just before the failure.

Claims for engine or equipment repairs provided under this warranty must be submitted within 30 days after discovery of damage. Luber-finer Technical Services Department reserves the right to examine the engine or equipment and filter to determine the amount of damage and whether it was caused by a defective Luber-finer filter.

This warranty gives you specific legal rights. You may have other rights which vary from state to state.

Engine and equipment manufacturer's warranties remain in effect when Luber-finer filters are used.
