

Date: February 2015 Bulletin: 2015B-3

SUBJECT: FRAS-LE BULK BRAKE BLOCK PACKAGING CHANGES

Effective with shipments beginning mid-March 2015, Fras-le bulk brake block will be packaged and shipped as three sets per “tray box” (108 sets per pallet). The change in bulk packaging *does not* affect pricing of Fras-le block.

The packaging adjustment will be a running change. Fras-le bulk brake block will continue to ship in the 22- and 25-set packaging until inventory is depleted. The minimum order quantity of Fras-le bulk block will be adjusted from the current 22- or 25-set packaging to 108 sets per pallet. If Fras-le bulk brake block is currently being purchased, inventory drivers and future orders should be adjusted accordingly.

As part of the new packaging effort, some older Fras-le brake block part numbers will no longer be offered in bulk packaging but will continue to be offered in single-set boxes. A list of the changes in Fras-le packaging is included in this mailing, as well as a complete listing of all FMSI numbers available from Fras-Le by mix.

For more information, please contact your local Meritor district sales manager. Thank you and good selling!

Sincerely,

Peter Freeman

Sr. Product Manager
