SIT DOWN AND MAKE YOURSELF

# COMFORTABLE

Due to the constant compression of the spine in one position, sitting for long periods of time causes pain to the body:

- strains muscles and ligaments
- squeezes spinal discs toward sensitive nerves
- cuts circulation through the discs

The traditional ways to reduce spinal strain: recline (which is not possible while driving) increase lumbar support

The BackCyclers Continuous Spiral Motion is the key to comfort:

- reduces muscle and ligament strain
- allows alternating muscles and ligaments to share strain / rest cycles
- reduces disc pressure against the nerves
- improves disc circulation

## 232338.XX : BACKCYCLER® KIT

### What does back pain cost you?

The BackCycler underwent ten years of research at the University of Vermont, funded by the National Institute on Disability and Rehabilitation Research. The BackCycler's cyclic inflation and deflation of an air bladder behind the driver's lower back provides long lasting comfort.

The scientific continuous passive motion provided by the BackCycler has been shown to prevent and alleviate back pain and increase driver alertness.

For trucks without air supply. Requires 15 amp, 12 volt circuit, mounts anywhere on truck.

**SK-1369-03 : BEVERAGE CUP HOLDERS**

There is nothing refreshing and invigorating like a beverage for the road. Beverage Cup Holders are almost a necessity though the convenience is not much to put to shame. This add-on mounts to either side of the seat and securely holds most sized beverage containers and cups.

- mounts to either side of the seat
- installed or removed without the need for tools
- securely holds most sized beverage containers and cups
- sturdy thermoplastic construction will last the long haul
- folds conveniently to a close for safety
- designed to fit CUSH-N-AIRE

**SK-1485-01 : SEAT HEATERS**

Standard Control Seat Heaters offers the best in seating comfort. Carbon Fiber is the industry standard offering the best in heat distribution and overall temperature consistency. The Seat Heater is the largest heating area available with two 22" x 11" heating elements which features dual-zone heating for the lower back and seating area.

- dual-zone heating for the lower back and seating area
- built in thermostat for controlled comfort
- 2 settings, high and low for desired level of warmth
- universal system for easy installation
- carbon fiber provides quick and even heat distribution
- manufactured by an OEM automotive supplier under ISO 9000 and QS 9002 quality standards
- element length can be reduced and holes can be cut into the element for attachment access without affecting the performance
- meets FMVSS 302 standards
- covered by a 3 year, 36,000 warranty

# NATIONAL 2000 TRIM KIT

## Our kit makes your old seat look and feel like NEW!

Your rigs aren't the only things that rack up mileage over time. Every time you hit the open road you add wear and tear to the seats. National Seating has an inexpensive alternative to replacement seats with the National 2000 Trim Kit.

The kit includes one upholstered bottom cushion and back cover trimmed in high performance fabric. A separate kit is available for National Seats with bolsters in the bottom cushion. Armrest covers in matching fabric can be ordered separately. Kits are sold in pairs and seat back frame is not included.

*Improve your ride at a great value with a finely crafted, comfortable National 2000 Trim Kit.*

### TRADITIONAL MOTOMIRROR®

WEST COAST 7 X 16

**One touch of a switch repositions MotoMirror remote control mirror for full right-side vision.** When backing or turning, drivers just flip a dash or shift-mounted switch to scan a broad path down their entire “blind” right side. This gives them clear view of everything located within 100 feet of the right side of the trailer.

fits all OEM mounting brackets  
 1.2 RPM mirror rotation speed prevents driver disorientation  
 film heater provides superior performance, long-term durability and controlled heat distribution across the mirror surface  
 self-resetting circuit breaker prevents motor burnout  
 360-degree rotational viewing range  
 durable 26-gear transmission allows precise positioning  
 field-replaceable parts for all models of MotoMirror provide cost-effective replacement or damaged or worn-out parts with minimal shop time requirements

THE STANDARD IN DRIVER VISION

# MOTOMIRROR

**AERODYNAMIC MOTOMIRROR®**  
WEST COAST 7 X 16

**One touch of a switch repositions MotoMirror remote control mirror for full right-side vision.** When backing or turning, drivers just flip a dash or shift-mounted switch to scan a broad path down their entire “blind” right side. This gives them clear view of everything located within 100 feet of the right side of the trailer.

fits all OEM mounting brackets  
1/2 RPM mirror rotation speed prevents driver disorientation  
film heater provides superior performance, long-term durability and controlled heat distribution across the mirror surface  
self-resetting circuit breaker prevents motor burnout  
360-degree rotational viewing range  
durable 26-gear transmission allows precise positioning  
field-replaceable parts for all models of MotoMirror provide cost-effective replacement or damaged or worn-out parts with minimal shop time requirements

Each mirror features a stainless steel housing isolated by a single-piece gasket that's both moisture and vibration resistant. The traditional design is stylish, practical and built to withstand the most grueling driving conditions.

- stainless steel construction
- sealed against weather and vibration by a superior one piece vinyl gasket
- designed to fit all west coast mirror systems
- 7" x 16" glass
- field serviceable
- available in heated and/ or lighted

When you need the best visibility money can buy, select Prustman's Convex mirrors for their key advantages:

- provides maximum field of vision with minimum distortion
- full 8 inch stainless steel round convex mirror
- sealed against weather and vibration by a superior one piece vinyl gasket
- polished stainless steel bracketry and mountin hardware
- fully adjustable to fit all conventional cabs
- large mounting cups prevent stress cracks to fiberglass or composite fenders
- plastic washer protects the finish on steel and fiberglass fenders

## THE SOLUTION TO SAFER DRIVING

### 849-0162-00X : ROADWATCH® SS

RoadWatch SS is a road surface temperature measurement system. By accurately measuring the actual road surface temperature, RoadWatch provides drivers with an early warning system to detect “black ice” and other potentially dangerous road conditions. RoadWatch 1 was developed to assist highway and public works departments to determine where and when to apply road treatment chemicals. The RoadWatch sensor easily mounts on the truck mirror brackets. RoadWatch 1 Kit includes standard sensor with 12’ cable and 2” round Fahrenheit or Celsius display.

### TECHNICAL SPECIFICATIONS

road temperature accuracy	±1% of full scale or ± 1°C
road temperature display range	-40° to +100°C; -40° to +212°F
air temperature accuracy	± 1°C, ± 2°F
air temperature display range	-40° to +50°C; -40° to 122°F
operating temperature range	-40° to +75°C; -40° to 167°F
repeatability	To within 1°C; 2°F
emissivity	Factory calibrated at 0.96
calibration	Lifetime factory digital calibration
field of view	10 degrees
readout scales	factory set as Fahrenheit or Celsius
response time	100 milliseconds (damped to 500 milliseconds)
operating voltage	12 volts DC (nominal)
current requirements	<60 mA @ 12V.DC
cable options	3.7 M (12 ft.) or 4.9 (16 ft.) shielded
sensor features	10.9 cm (4.3 in) long anodized aluminum enclosure. EMI/RFI shielded electronics, truck mirror mounting standard. Other mounting options available.

### WIRE HARNESS

434-0063-000	WIRE HARNESS CABLE 12V, 6” (COLOR CODED TINNED LEADS)

### 849-0059-00X : ROADWATCH® 3

RoadWatch® 3 is offered in both aerodynamic and traditional MotoMirror® as well as the Prutsman West Coast Line of mirrors. (Note: see page 25)

optimal water-shedding design  
decreased mirror vibration for superior view  
70-watt “Smart” heater is self-regulating.  
Provides very fast ice-melting heat across the entire surface of the mirror  
self-resetting circuit breaker prevents motor burnout  
transmission provides 14 foot pounds of rotational torque to break ice and sludge  
the friction-disc M3Clutch® disengages the powertrain to protect the motor and transmission if the mirror is rotated against a bracket or is manually adjusted.  
one console displays flip temperature readings  
optimal water-shedding design  
decreased mirror vibration for superior view
