

2012 Exhaust Product Guide

Nelson Global Products, Inc. offers the industry's best solutions for small engine exhaust. Using the latest design and manufacturing techniques, these products provide superior exhaust noise reduction and environmental protection. Original Equipment Manufacturers can count on these products for performance, durability and reliability.

Warranty to the Original Equipment Manufacturer

Exhaust Products Limited Warranty

Warranty: This Warranty is provided to each original equipment manufacturer (OEM) with its purchase of any of the Nelson Global Products, Inc. products listed in the table below. Any Nelson Global Products, Inc. product determined by Nelson Global Products, Inc. to be defective in material or workmanship will, at Nelson Global Products, Inc. election, be replaced by another Nelson Global Products, Inc. product or by a credit for the original Nelson Global Products, Inc. selling price of the product. In the event that such a Nelson Global Products, Inc. product defect necessitates repair of the engine or components, Nelson Global Products, Inc. will reimburse the OEM reasonable costs to repair or replace, whichever is less, the damaged engine or components to a condition equivalent to that existing just prior to the failure.

Any claim under this Warranty for replacement or credit must be submitted in writing to Nelson Global Products, Inc. within thirty (30) days of discovering the claimed defect.

For the purpose of reviewing Warranty claim validity, Nelson Global Products, Inc. or its representatives will, at Nelson Global Products, Inc. discretion, have the right to:

- a. Physically inspect the claimed defective product and/or equipment using the product.
- b. Information available from purchaser or user relative to the actual application and/or use and maintenance of the product.

Duration: This Warranty extends from the in-service date of the Nelson Global Products, Inc. product installed by the original equipment manufacturer through the duration of the OEM's base warranty, but will not exceed the coverage period stated in the table below.

Limitation: Nelson Global Products, Inc. is not responsible for product failures and/or repair costs resulting from misuse (e.g. not allowing the muffler to cool which causes an after fire event), faulty installation, alteration, misapplication, faulty maintenance practices (e.g. cleaning or servicing of spark arrestors), neglect, or accident; nor is Nelson Global Products, Inc. responsible for downtime, loss of income, living expenses, or other incidental or consequential damages. Unless otherwise agreed to in writing, this Warranty is the sole warranty made by Nelson Global Products, Inc. NELSON GLOBAL PRODUCTS, INC. MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

Exhaust Products Warranty Coverage Periods for Nelson Global Products, Inc.

Duration of Warranty period (whichever occurs first)		
Application / Product	Years	Distance (miles/km)
On-Highway		
Heavy Duty (Class 8)	1	100,000 / 161,000
Medium Duty (Class thru 7)	1	100,000 / 161,000
Transit Bus	1	50,000 / 80,500
Coach bus	1	100,000 / 161,000
Off-highway	1	N/A
Product / Parts		
Mufflers – O.E. / Std. Line	1	N/A
Tubes – Formed / Assemblies	1	N/A
Accessories - clamps, rain caps, heat-shields, adaptors, etc.	1	N/A
Pre-treatment exhaust assemblies *	1	N/A
Post-Treatment exhaust assemblies *	1	N/A
Chrome or aesthetic coated components	1	N/A
Flex pipe (interlocking/bellows design)	None	Sold "as is"
Retrofit kits	1	100,000 / 161,000
Catalytic Exhaust Mufflers – Gas/Diesel	1	100,000 / 161,000

* Note: Purchaser is responsible for all application, endurance and verification testing prior to production release.

TorcTite™ – The “Seal of Strength™”	1-9

Introduction

Nelson Global Products designs, manufactures and markets high performance OEM and aftermarket products for the global commercial vehicle, on-highway and off-highway markets. Our engineering is the best in the industry and employs the latest design and manufacturing techniques. We are the largest OEM supplier of exhaust systems and a leader in engine exhaust noise technology. Customers can count on our exhaust system products for OE quality.

Top Quality Construction

Our mufflers are constructed of heavy gauge aluminized and stainless steel to:

- Resist hot, corrosive exhaust gases
- Deter rust
- Extend service life

Note: *Aluminized steel tubes are not recommended for 2007 emission compliant engines. As the industry leader, we have the ability to manufacture stainless steel tubes and other accessories to meet the stringent 2007 emission regulations. Please call (608) 719-1800 to speak to an OEM account manager for details.*

Objectives of This Guide

- Provide a basic understanding of the exhaust system to assist in identifying replacement part needs
- Provide an understanding of how exhaust components effect overall vehicle performance and fuel efficiency

Troubleshooting and Repairing the Exhaust System

The following guidelines are intended to help locate and identify problem areas in the vehicle's exhaust system:

- **Entire Exhaust System** – Check the system for leaks from the manifold pipe connector before and after repairs are made.
- **Mufflers** – Inspect the area around clamps for breakage, cracks and rust-through. A leaking muffler represents a potential safety hazard as it may allow exhaust gases to be discharged near, or under, the operator's compartment creating the potential for carbon monoxide to enter the compartment. Carbon monoxide is a colorless, odorless, but toxic gas. On vertical systems, check to ensure that the heat guard around the muffler is secure and in place. If there is no heat shield you may want to consider adding one.
- **Elbows, Stacks and Exhaust Pipes** – Dents or crushed portions of any tubing create exhaust flow restriction and increase back pressure significantly. Even relatively small dents will cause decreased fuel economy and increased turbo wear. Always check for dented pipes and do not over-torque clamps as this can lead to pipe crimping.
- **Rain Caps** – Our mufflers are designed to prevent water and snow from passing beyond the muffler to the engine. Water entering the muffler will create a slurry of soot and be blown on the trailer later causing significant cleanup expense. A curved exhaust stack is an acceptable alternative to a rain cap but may not be 100 percent effective in all conditions. Make sure an existing rain cap is in place and still in good condition.

Muffler Guide

- **Clamps** – New clamps should be installed anytime a muffler or pipe is replaced. Check the general condition of all clamps and joints in the exhaust system. Reuse of any clamps is not recommended.
- **Flexible Tubing** – Do not patch flexible hose (flex), always replace the entire section. Stainless steel flex is recommended as the best value due to its superior high temperature strength and oxidation resistance as compared to other materials. Examine any flex pipe to make sure it's in good condition and will perform properly.
- **Mounting** - The exhaust system must be secured to eliminate vibration. The muffler brackets should fit securely to the muffler and to the mast or truck frame.

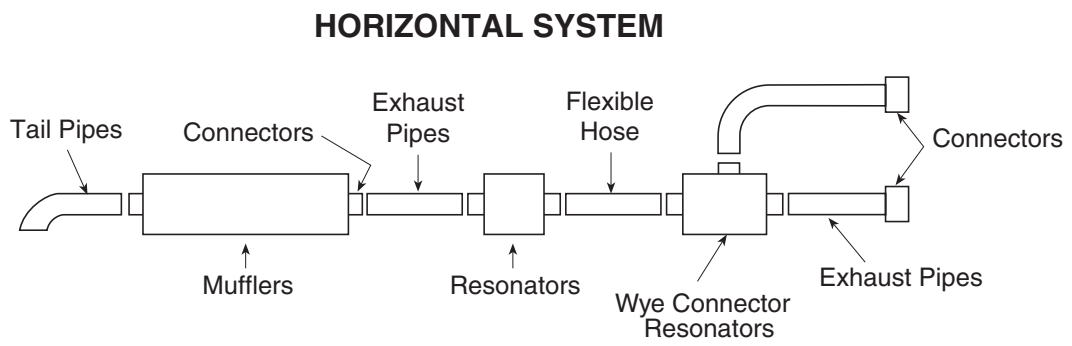

How to Reduce Exhaust-Related Noise Levels

1. Worn or leaking flexible tubing is a common noise source. Replace the part, if necessary. The service life of flexible tubing can be improved if it is installed in a relaxed position. Bending, stretching and compressing all reduce life because they limit the tubing's ability to "flex."
2. The entire exhaust system should be well-supported. This will reduce the noise generated by the exhaust pipes and the muffler shell. Care must be taken to isolate engine vibration from the exhaust system and to provide for expansion when the system is hot.
3. The addition of a universal resonator, silenced "wye" or splitter muffler in the system will generally reduce the exhaust noise level from 3 to 6 dBA. Packed stacks will reduce the noise level 3 to 4 dBA. Both items have a minimal effect on engine backpressure.
4. Change from a single to a dual system. For maximum benefit, special "dual only" mufflers are usually recommended. Lower system backpressure is generally an additional benefit of dual systems.
5. On horizontal systems, the tail spouts should be pointed towards the center of the roadway. This reduces the noise reflected off of the road surface and perceived by curbside observers.
6. On vertical systems, straight stacks will yield lower sound levels than will curved stacks. Straight stacks direct the noise upward, where curved stacks direct noise towards the observer.

Applications

There are two basic exhaust system configurations - vertical and horizontal. Comparison of the illustrations of these two systems shows there is little difference in the components used. In most vertical installations the muffler is bolted to a mast structure in order to reduce the amount of muffler noise transferred into the cab or tractor. Vertical stacks help to get any objectionable odor up in the air - away from ground level. Vertical installations are also perceived as being quieter because sound is directed upward by the stacks. The need for improved aerodynamics has led to the increased usage of horizontal exhaust systems. The schematics show the overall layout of the components used in both vertical and horizontal installations. It is possible to find a vertical and a horizontal application in any truck class. School bus applications must meet some very stringent local regulations for school bus exhaust systems that may include a horizontal system, a rear discharge, and a totally leak free system.

Muffler Guide

Muffler Guide

Welding Aluminized Steel

Aluminized steel can be welded using appropriate techniques which are described below.

Oxyacetylene Welding Filler Metal

Use a mild steel filler metal, 3/32" diameter, free of rust (American Welding Society classification A5.2). Do **not** use copper coated filler material.

Welding Equipment: Use a number 3 or 4 tip. Observe instructions of the equipment manufacturer when adjusting the operating pressures at the gas regulators.

Procedure: Clean the parts to be welded thoroughly. Incline the torch at a 45° angle from the direction of travel. Use the forehand welding technique. Keep the torch flame on the tip of the filler rod, not in the center of the puddle.

Shielded Metal-Arc (Stick Electrode)

Any one of the following rods are recommended:

- E-6011
- Low Hydrogen: E-7108.
- Stainless: 309 or 310

Gas Metal-Arc (MIG)

- Wire: ER70S-3 or ER70S-6
- Shield gas: Carbon Dioxide or 75% Argon/25% CO₂

Flexible Metal Tubing (Flex) Measurement and Cutting

Strip-wound flexible metal hose is a typically round conduit, three to six inches inner diameter, and is flexible in nature due to the design of the strip. It is commonly used to absorb relative motion and vibration, typically between a vehicle's engine and frame or between the frame and cab. Often strip-wound flexible metal hose is used as a means to account for dimensional differences and tolerance stack-up in the exhaust system. Using strip-wound flexible metal hose to account for misalignments in the exhaust piping can compromise the flexibility to the extent that early failures occur. It is necessary that the hose is installed so that its maximum flexibility is preserved. This document provides detailed information to install flex hose properly so as to minimize failures.

Measurement and cutting of flex tubing must be performed using the correct procedures. The following definitions are used to describe the various states that flex can be measured in:

Fully Extended: The tubing is in a fully expanded state and the convolutions are completely open. Approximately. 20% less metal is required than fully compressed.

Fully Compressed: The tubing in a fully compressed state and the convolutions are completely closed. Approximately. 20% more metal is required than fully extended.

Natural Lie: The average of fully compressed and fully extended lengths. Approximately 10% more metal is required than fully extended and 10% less metal is required than fully compressed. This is also referred to as the partially compressed state.

Nelson Global Products's **bulk flex tubing** is sold in 10' and 25' rolls measured in the **natural lie state**.

Nelson Global Products's **cut to length flex** is measured in the **fully extended state**.

Nelson Global Products provides bulk flex in over length rolls to assure that the correct amount of natural lie tubing is provided to the customer. In many cases, these rolls of bulk flex tubing are subsequently cut to length for the end user. Inconsistent measurement and cutting procedures can result in apparent shortages of bulk tubing. It is important to insure that the customer is following the procedures described in the next section.

Measuring Length of Flexible Metal Tubing

Shipping will cause the tubing to compress beyond the natural lie state. Before cutting flex tubing, one end of the tube must be anchored and the other end pulled to its fully extend state and quickly released so that it snaps back into its natural lie condition.

Whenever flex tubing is measured or cut, it must be properly oriented. The piece being cut from the tube must come off of the **open end** of the bulk length of tube. The open end is the end at which the wraps appear to be on top of each other as they move away from the end of the tube. When measuring or cutting flex tubing, keep the **open side** of the tube to your right. The figure to the right shows how to measure length along with the proper orientation – open end on the right. Note how wraps are on top of one another when looking right to left and underneath one another when looking left to right.

Muffler Guide

To measure in the compressed state:

Measurement of flex should be done by laying out the tube on a level surface and curving the entire tube or section into a tight radius such that the inner side of the curved tube has its convolutions touching as shown in the figure to the right. When the inner radius of the flex pipe is fully compressed, the outer radius will be fully extended and the center line of the tube will be at its natural lie length as depicted in the figure.

To measure in the extended state:

1. Orient the tube properly. Insure that the open end is on your right. This will be the end to start measuring from.
2. Coil the tube in a tight radius as shown above.
3. Measure along the outside of the radius where the convolutions are all open.
4. Mark point on outer radius where cut is to be made. Cut using one of the methods described later in this section.

If selling in the natural lie state, the length should be measured off the bulk flex roll after restoring it to its pre-shipping state. Cutting methods are same as below.

Cutting

Non PolyLock™ flex hose must be tack welded prior to cutting. Ensure tubing is straight and cut at fully extended mark using one of the approved methods below:

- **For Chop Saw Cuts:** Use 1/16" wide blade for best results
- **For Band Saw Cuts:** Use a no-set blade with 24-32 teeth / inch
- **For Hack Saw Cuts:** Use a no-set blade with 24-32 teeth / inch

Note: *Cutting and measuring flex tubing in any other way can cause an apparent shortage.*

Joining Flex to Straight Pipe

It is important to use the proper type of clamp to hold and seal the tube-to-flex joint. It is required to use a TorcTite™ clamp, or equivalent, at both ends of the flex hose. This style of clamp is preformed to fit properly on the outer diameters of the flex hose and mating tubes. This clamp fits generally one half on the flex hose and one half on the mating tube.

Cleaning Chrome

The following are general tips and procedures to use when cleaning chrome exhaust components.

1. Always wash your chrome with a mild, nonabrasive, alkaline detergent (like most truck and automotive detergents) and a soft, nonabrasive cloth.
2. Rinse thoroughly.
3. Quickly dry your chrome with a soft, nonabrasive cloth before water spots have a chance to form.
4. When polishing chrome, a good quality chrome polish provides the best results. Read and follow all instructions for the polish you use. Use a nonabrasive, non-colored (not dyed) cloth to apply and remove polish.
5. It is not recommended that you use wax on chrome exhaust products. The sustained high temperatures associated with exhaust can adversely affect a waxed chrome finish.

TorcTite™ – The “Seal of Strength™”

Feature		Benefit
	<p>TorcTite™ is the only clamp with fastener hardware pre-attached to a bright-finish band.</p>	<p>Installation is fast, easy and accurate. Simply wrap the clamp band with its pre-attached hardware around pipes; insert the extra-long bolts through the opposite clamp end, force bars and nuts, and torque. No dropping or fumbling with loose or excessive parts. The pre-formed band makes an accurate I.D. - O.D. installation even easier, and causes no damaging distortion to pipe or flex hose. This high-tensile steel with TorcTite's exclusive reaction block has greater stretching capability than other band clamps.</p>
	<p>TorcTite's™ exclusive, pliable aluminum reaction block conforms tightly to exhaust components providing a superior seal.</p>	<p>During installation, the block conforms to the I.D. - O.D. step between pipes, creating a unique seal. The block actually digs into flex hose spirals. Other clamps leave leaky gaps between the clamp band ends and pipes; TorcTite's patented reaction block, specially-formed band and fasteners all work together to seal these leaks. And it seals without loose gaskets or sealant additives.</p>
	<p>TorcTite's™ reaction block will not pinch flex hose and pipes, which means TorcTite will not cause leak paths or damage expensive exhaust components.</p>	<p>Other inferior clamps pinch exhaust pipes and flex hose during installation, creating exhaust leak paths. TorcTite's reaction block completes a full 360-degree compressive seal without damage – eliminating pinching, distortion and damage to pipes. Expensive flex hose, pipes and muffler inlets remain unharmed.</p>
	<p>TorcTite's™ reaction block and independent force bars prevent bolt bending and clamp binding which makes installation time fast and easy.</p>	<p>A balanced transfer of forces among TorcTite's specially formed band, reaction block and independent-force-bars eliminates bending forces on bolts, which keeps installation torque very low. Clamp binding is eliminated, too. The unique balanced design results in a strong, tightly-sealed exhaust joint that assembles quickly and reliably.</p>

* Bright 430 Stainless Steel

** 409 Stainless Steel bands with metric hardware

- Clamp technology provides simple, effective way to replace U-bolt and guillotine clamps
- Creates over a ton of clamping force without crushing pipes, resulting in strong, serviceable joint
- Pre-assembled hardware
- Fast, easy and accurate installation
– slip clamp over slotted side of joint, insert mating pipe and torque to 40-60 ft-lbs (54-81 N·m)

Flat Band Clamps

Size in (mm)	Stainless Part Number
3.00 (76.20)	89525W
3.50 (88.90)	89526W
4.00 (101.60)	89527W
5.00 (127.00)	89528W

- Older style seal clamp

Exhaust Accessories

Clamps

- Available in either the pre-formed TorcTite™ or flat EasySeal™ or ValuSeal™ style, these clamps stop leaky gaps between both overlapping and butt joints.
- The unique reaction block design results in a strong, tightly sealed and reliable exhaust joint without the need for extra gaskets.
- All clamps come with longer bolts and preattached hardware.

Wide Band EasySeal™ Clamps

Size in (mm)	Single Part Number	Bulk 40/Carton Part Number
2.00 (50.80)	89521K	—

- Aluminized or Stainless Steel
- Positive clamping action for equal sized tubes without overlap

* Unassembled, nested in ten-packs with hardware, five ten-packs per carton

Exhaust Accessories

Clamps

V-Band Clamps

- V-Band Clamps are made of Type 321 stainless steel
- The function of the V-Band Clamp is to connect the manifold or turbocharger to the exhaust system
- These clamps are designed to accommodate the majority of engine applications and are available in a variety of sizes

Stainless Steel Corrugated Connectors

- Corrugated hose provides leak-proof flexible joints for critical applications
- Maximum bend is 10°
- Stainless steel corrugated with aluminized steel connector ends
- Higher tolerance for vibration than flexible hose
- Available in I.D.-I.D. or O.D.-I.D.
- 18" (457 mm) in length

Size in (mm)	I.D. - I.D. Part Number	O.D. - I.D. Part Number
2.00 (50.80)	—	89791K
2.50 (63.50)	—	89792K

6.00 (152.40)	89790K	89798K

Specifications subject to change without notice. See page 1-8 for cleaning chrome.
All parts listed are subject to lead time.

Exhaust Accessories

Connectors

Weld Connectors

- 3.5" (88.90 mm) to 5.0" (127.00 mm) O.D. stainless steel
- I.D. sized for welding to elbows or straight tubes

Size in (mm)	Description	Part Number
3.50 (88.90)	Weld Connector – ID-ID Fit	900515A
4.00 (101.60)	Weld Connector – ID-ID Fit	900516A
5.00 (127.00)	Weld Connector – ID-ID Fit	900517A

New!

Clamp Connectors

- 3.5" (88.90 mm) to 5.0" (127.00 mm) O.D. stainless steel
- I.D.-I.D. sized for post attachment

Size in (mm)	Description	Part Number
3.50 (88.90)	Straight Connector ID-ID Clamp Fit	900563A
4.00 (101.60)	Straight Connector ID-ID Clamp Fit	900564A
5.00 (127.00)	Straight Connector ID-ID Clamp Fit	900565A

New!

Note: Purchaser is responsible for all application, endurance and verification testing prior to production release.

Exhaust Accessories

Adapters

Flared Adapters

- 3.5" (88.90 mm) to 5.0" (127.00 mm) O.D. stainless steel
- I.D. sized for welding to elbows or straight tubes

New!

Size in (mm)	Description	Part Number
3.50 (88.90)	Flared Adapter (Marmon) – ID Weld Fit	900503A
4.00 (101.60)	Flared Adapter (Marmon) – ID Weld Fit	900504A
5.00 (127.00)	Flared Adapter (Marmon) – ID Weld Fit	900505A

Full Marmon Adapters

- 3.5" (88.90 mm) to 5.0" (127.00 mm) O.D. stainless steel
- I.D. sized for welding to elbows or straight tubes

New!

Size in (mm)	Description	Part Number
3.50 (88.90)	Flared Adapter (Marmon) – ID Weld Fit	900509A
4.00 (101.60)	Flared Adapter (Marmon) – ID Weld Fit	900510A
5.00 (127.00)	Flared Adapter (Marmon) – ID Weld Fit	900511A

V-Band Clamps and Gaskets

- 3.5" (88.90 mm) to 5.0" (127.00 mm) O.D.

New!

Size in (mm)	Description	Part Number
3.50 (88.90)	V-Band Clamp (Marmon)	89501K
4.00 (101.60)	V-Band Clamp (Marmon)	A029T534
5.00 (127.00)	V-Band Clamp (Marmon)	A029T535
3.50 (88.90)	Gasket	Q312541
4.00 (101.60)	Gasket	Q312526
5.00 (127.00)	Gasket	Q312516

Note: Purchaser is responsible for all application, endurance and verification testing prior to production release.

Specifications subject to change without notice. See page 1-8 for cleaning chrome.
All parts listed are subject to lead time.

Exhaust Accessories

Adapters

Expanders with Clamp Connections

- 3.5" (88.90 mm) to 4.0" (101.60 mm) stainless steel
- 4.0" (101.60 mm) to 5.0" (127.00 mm) stainless steel
- Flare-flare and flare-Marmon adapters for V-band adapters
- ID Slotted for post aftertreatment

New!

Size in (mm)	Description	Part Number
3.50 (88.90) to 4.00 (101.60)	Expander – ID-ID Clamp Fit	900542A
4.00 (101.60) to 5.00 (127.00)	Expander – ID-ID Clamp Fit	900543A
3.50 (88.90) to 4.00 (101.60)	Expander – Flare-Marmon Clamp Fit	900544A
4.00 (101.60) to 5.00 (127.00)	Expander – Flare-Marmon Clamp Fit	900545A
3.50 (88.90) to 4.00 (101.60)	Expander – Flare-Flare Clamp Fit	900546A
4.00 (101.60) to 5.00 (127.00)	Expander – Flare-Flare Clamp Fit	900547A

Note: Purchaser is responsible for all application, endurance and verification testing prior to production release.

Exhaust Accessories

Flexible Hose Cut to Length

- Exclusive cut feature provides locked ends with no metal burrs
- Individual lengths of bulk material
- Measured as fully extended lengths

Exhaust Accessories

10' and 25' Flexible Hose

- Available in stainless, aluminized and galvanized steel
- Measured in a partially compressed state. You receive 10% more length than competitive products sold in fully extended lengths!
- Flex should be installed in a straight position and not be used as an elbow

Best

Stainless Steel PolyLock™

- Engineered to be cut to length
- Requires no tack welds to cut
- Will not unravel after cutting

Diameter in (mm)	10' Length Part Number		25' Length Part Number

Best

Stainless Steel Flex

- Engineered to provide maximum durability and corrosion resistance. Capable of withstanding high temperatures, such as those found in gas and diesel engine applications.

Better

Aluminized Flex

- Provides a high level of durability and oxidation resistance. Withstands high temperatures such as those found in diesel engine applications.

Economy

Galvanized Flex

- Durable hose with fair oxidation resistance. Capable of withstanding temperatures of up to 600 °F (316 °C). Suitable for light duty applications.

Replacement Elbow for Freightliner® Series

- Freightliner MY 2002 - Century Series S/T Replacement Mufflers and Muffler Mounting Elbows
- Top quality construction that meets or exceeds OE requirements
- First-fit aftermarket product at an affordable price
- Use our 90877A clamps with muffler and/or elbow

Part Number

Q618142

Dimensions

Exhaust Accessories

Tubes

Tube Expander

- Rounds muffler and tubing ends to original size and shape with ease
- Removes U-bolt crimps
- Saves exhaust installation time
- Operates with impact wrench
- Not designed to swage tubing

Tube Size in (mm)	Aluminized Part Number
4.00 (101.60)	90907K

Splitter Tee Adapter Tube

- Converts a single system exhaust pipe into a dual system
- See Special Muffler section for Splitter Tee Mufflers

Exhaust Accessories

Tubes

Straight Tubing

- 3.0" (76.20 mm) to 5.0" (127.00 mm) O.D. stainless steel
- 409/439 stainless steel
- Length 5.0' (1.5 m)
- Drawing quality for bending capability

Size in (mm)	Description	Part Number
3.50 (88.90)	5' (1.5 m) Straight Stainless Steel Tube (bendable)	900539A
4.00 (101.60)	5' (1.5 m) Straight Stainless Steel Tube (bendable)	900540A
5.00 (127.00)	5' (1.5 m) Straight Stainless Steel Tube (bendable)	900541A

Note: Purchaser is responsible for all application, endurance and verification testing prior to production release.

High Performance Flex Tubes

- 3.5" (88.90 mm) to 5.0" (127.00 mm) stainless steel
- Leak proof corrugated flex section
- External braid for long life
- Flared and Marmon adapters connections
- Internal liner option for heat retention available

Size in (mm)	Description	Part Number
3.50 (88.90)	High Performance Flex	900521A
4.00 (101.60)	High Performance Flex	900522A
5.00 (127.00)	High Performance Flex	900523A
3.50 (88.90)	High Performance Flex with Retention Liner	900570A
4.00 (101.60)	High Performance Flex with Retention Liner	900571A
5.00 (127.00)	High Performance Flex with Retention Liner	900572A

Note: Purchaser is responsible for all application, endurance and verification testing prior to production release. Flex tubes listed on this page are not intended for applications requiring rotational displacement. These applications require a specially designed flex tube.

Exhaust Accessories

Stack Pipes

6" by 5" (152 mm by 127 mm) "Monster" Stacks

- Change the appearance of a factory system by replacing a standard 5" (127 mm) stack with a 6" (152 mm) stack. Obtain lower restriction and "dress up" your truck.
- Bright, exceptional quality chrome
- 6" (152 mm) tubing sized down to fit 5" (127 mm) system, no weld joints

Exhaust Diffusers

Exhaust Accessories

Exhaust Diffusers

Slotted Stack Exhaust Diffusers

- 4.0" (101.60 mm) and 5.0" (127.00 mm) inlet sizes
- Stainless steel
- Short diffuser for compact configuration
- Long diffuser for optimum temperature reduction
- Vertical or horizontal installation

New!

Size in (mm)	Description	Part Number
4.00 (101.60)	Slotted Stack Diffuser – Short	A030F890
5.00 (127.00)	Slotted Stack Diffuser – Short	A030F892
4.00 (101.60)	Slotted Stack Diffuser – Long	A030F891
5.00 (127.00)	Slotted Stack Diffuser – Long	A030F893

Slotted Stack Exhaust Diffuser U-Bolt Clamp

Size in (mm)	Description	Part Number
4.00 (101.60) and 5.00 (127.00)	Diffuser U-Bolt Clamp	Q629839

New!

Note: Purchaser is responsible for all application, endurance and verification testing prior to production release.

Specifications subject to change without notice. See page 1-8 for cleaning chrome.
All parts listed are subject to lead time.

Exhaust Accessories

Brackets

Stack Support Brackets

- Use with stacks for vertical support

D Diameter in (mm)	Chrome Part Number
5.00 (127.00)	900022C
6.00 (152.40)	90598C

Universal Mounting Bracket

- For 4" to 5" (102 to 127 mm) U-Bolt Clamps

Part Number

89518K

360° Guard Bracket Kit

- Can be modified for off-center tubes
- Not visible above shield
- Includes two complete brackets and all hardware required to mount shield
- Fits 5" (127 mm) O.D. tube

Part Number

90900K

Exhaust Accessories

Hangers

Universal Swivel Hangers

- Heavy reinforced rubber pad
- Swivel design permits 360° mounting
- One piece construction installs in seconds
- New closed end allows easy connection and assembly of loose system components

Length in (mm)	Part Number
9.60 (243.80)	89519K
13.30 (337.82)	90863K
17.30 (439.42)	90843K

Universal Pipe Hangers

- Clamp and hanger strap are made of heavy gauge steel to hold tail pipe and exhaust pipe

Fits Pipe Diameter in (mm)	Part Number
3.00 (76.20)	90076A
4.00 (101.60)	90079A
5.00 (127.00)	90080A

Universal Muffler Hangers

- Heavy duty muffler body clamp and hanger strap
- The strap can be bent and twisted to fit the installation. Use for horizontal or vertical mount. Use two for maximum rigidity.

Body Diameter in (mm)	Part Number
7.00 (177.80)	89535K
8.00 (203.20)	89536K
8.25 x 11.50 (209.55 x 292.10)	89537K
8.50 (215.90)	89538K
9.00 (228.60)	89539K
10.00 (254.00)	89540K
10.00 x 15.00 (254.00 x 381.00)	89551K
11.00 (279.40)	900005A

Specifications subject to change without notice. See page 1-8 for cleaning chrome.
All parts listed are subject to lead time.

Exhaust Accessories

Miscellaneous Accessories

Clamp Kits

- Two chrome clamps per kit
- Stainless mounting hardware supplied with each kit

Universal Grab Hanger

- Chrome plated

Part Number

89775K

Rain Caps

- Single bolt mounting
- Heavy duty welded assembly

Silent Rain Caps

- Nylon stop for quiet operation

Exhaust Accessories

Miscellaneous Accessories

Exhaust Elbow/Pipe Shield

- Used on 3" (76 mm) through 5" (127 mm) O.D. exhaust tubes
- Protects hoses and wiring from high temperatures
- Installs in seconds anywhere on elbow or straight section using standard hose clamps (not supplied)

Part Number

90587K

Chrome Light Deflectors

- Bright, exceptional quality chrome

Part Number

90289C

90290C

Chrome Part Side

LH

RH

Mounting Bands

- Mild steel or black paint finish

Standard Line Mufflers

*Installation Notes

- A Outlet end of muffler is domed for vertical installation
- B Muffler shell is double wall for shell noise/temperature reduction
- C Muffler has mounting bracket for specific installation requirements
- D Muffler has heat shield attached
- E Muffler has flanged connection for ball and socket type joint
- F Muffler is insulated for temperature/sound reduction
- G Spark arresting muffler
- H Designed for horizontal installation – inlet is 90° elbow
- I Muffler provides aspirating function
- J Muffler has curved outlet stack
- HD Muffler is heavy duty version of the part number listed
- SS Muffler is stainless steel version of the part number listed
- EM Economy Muffler

Engine Data

1. To calculate **exhaust flow** (exhaust CFM (ft³/min) use:

$$\text{Exhaust CFM} = \frac{\text{Disp.} \times \text{RPM} \times \text{E} \times (\text{Temp.} + 460)}{\text{C} \times 941760}$$

2. To calculate **intake flow** (intake CFM) use:

$$\text{Intake CFM} = \frac{\text{Disp.} \times \text{RPM} \times \text{E}}{\text{C} \times 1728}$$

3. To calculate **exhaust flow** (exhaust CFM) if intake flow (intake CFM) is known, use:

$$\text{Exhaust CFM} = 2.7 \times \text{intake CFM (diesel)} \text{ or } 3.1 \times \text{intake CFM (gas)}$$

Disp. = Engine displacement in cubic inches (to convert liters to cubic inches, multiply by 61.002)

RPM = Engine speed at rated HP

E = Efficiency (0.85 for naturally aspirated, 1.4 for turbocharged, 1.6 for turbocharged/aftercooled and 1.2 for engines with scavenging blowers)

Temp. = Exhaust temperature in °F (if not known use 900° for diesel or 1200° for gas)

C = 1 for 2 cycle engines, 2 for 4 cycle engines

Tail Pipe – 90°, 6" x 6" (152 x 152 mm) Long	Q650823	1.375 (34.93) O.D.	4 dBA
Tail Pipe – 90°, 6" x 6" (152 x 152 mm) Long	Q650825	1.625 (41.28) O.D.	4 dBA
Screen Spark Arrester	49020N	1.000 (29.40) O.D.	3 dBA
Screen Spark Arrester	49024N	1.375 (34.93) O.D.	3 dBA
Screen Spark Arrester	49025N	1.500 (38.10) O.D.	3 dBA
Screen Spark Arrester	49028N	1.750 (44.45) O.D.	3 dBA
Tube Adapter (Fits 49025N)	Q100650	1.500 (38.10) O.D. to 1.375 (34.93) O.D.	–
Tube Adapter	Q100651	1.750 (44.45) O.D. to 1.625 (41.28) O.D.	–

* "Typical" sound reduction for exhaust noise at full load (WOT). Individual results may vary. Sound reduction depends on total vehicle or equipment and other noise contributions.

All spark arresters are screen-type and are U.S.D.A. Qualified.

Off-Highway Industrial Mufflers

Heat Shields and Brackets

U-Channel Bracket

Heat Shield, Slotted

Heat Shield, No Slots

Accessory	Part Number	Description
Heat Shields	N/A	Requires custom designed shield
U-Channel Bracket for Muffler Support and/or Heat Shield Mounting	N/A	Bracket can be welded onto standard mufflers at any location and rotation to create a custom muffler.

Available as an integral component on custom exhaust systems only.
Please contact Customer Assistance.

Off-Highway Industrial Mufflers

Add-On Glass Packed Resonators

Benefits

- Reduces Sound Level
- Improves Tonal Quality
- Straight Through Design for Low Back Pressure
- Clamps on Existing Tailpipe
- High Temperature Black Paint

Applications

- Commercial Turf Mowers
- Generators
- Utility Vehicles
- Lawn & Garden Tractors

Part Number	Size in (mm)	Fits Tube Size in (mm)	Sound Reduction*
25704N	0.750 (19.05) I.D.	0.750 (19.05) O.D.	4 dBA
25705N	0.875 (22.23) I.D.	0.875 (22.23) O.D.	4 dBA
25706N	1.000 (25.40) I.D.	1.000 (25.40) O.D.	4 dBA
25707N	1.125 (28.58) I.D.	1.125 (28.58) O.D.	4 dBA

25709N	1.375 (34.93) I.D.	1.375 (34.93) O.D.	4 dBA
25710N	1.500 (38.10) I.D.	1.500 (38.10) O.D.	4 dBA
25711N	1.625 (41.28) I.D.	1.625 (41.28) O.D.	4 dBA

* "Typical" sound reduction for exhaust noise at full load (WOT). Individual results may vary. Sound reduction depends on total vehicle or equipment and other noise contributions.

Note: Purchaser is responsible for all application verification, endurance and certification testing prior to production release. Exhaust systems may need to be certified as meeting EPA/ CARB emission standards by the engine manufacturer.

Special Mufflers

Spark Arresters

- Designed for universal application with a minimum of restriction on the engine.
- They work well as add-on units to existing exhaust systems. Their lightweight and small size reduces stress and vibration to the rest of the exhaust system.
- Typical applications include logging and construction equipment, agricultural machinery, over-the-road trucks, airport equipment, forestry and military vehicles.
- All arresters exceed U.S. Forestry requirements, and are qualified and tested for vertical and horizontal installations under the U.S. Forestry Service Standard 5100-1b.
- All inlets are slotted tube connections. Outlets are O.D. tubing.

Pak Stacks

- Can reduce exhaust noise by 3 to 4 dBA
- Mounts directly into existing system, replacing the conventional stack
- Aluminized steel, polished stainless steel or chrome plated

Diameter (O.D.) in (mm)	Length in (mm)	Aluminized Steel Part Number	Polished Stainless Steel Part Number	Chrome Part Number

Special Mufflers

Resonators

- Can reduce exhaust noise by 3 to 6 dBA
- Most effective when installed in exhaust pipe before the muffler

Body Diameter in (mm)	Inlet and Outlet I.D. in (mm)	Body Length in (mm)	Overall Length in (mm)	Part Number
9.00 (228.60)	5.00 (127.00)	11.50 (292.10)	16.25 (412.75)	86145M

Splitter Tee Resonator

- Economical way to convert a single system exhaust into a dual system
- Produces low back pressure with an additional 3-5 dBA of exhaust noise control

Shell Diameter in (mm)	Shell Length in (mm)	Overall Length in (mm)	Inlet I.D. in (mm)	Outlet I.D. in (mm)	Part Number
7.00 (177.80)	15.00 (381.00)	18.50 (469.90)	3.50 (88.90)	5.00 (127.00)	86300M

Wye Connector Resonator

- Joins left and right hand exhaust pipes
- Provides an additional 3 to 7 dBA exhaust noise reduction over that of the primary muffler

Shell Diameter in (mm)	Shell Length in (mm)	Overall Length in (mm)	Inlet I.D. in (mm)	Outlet I.D. in (mm)	Part Number
10.00 (254.00)	15.00 (381.00)	21.00 (533.40)	5.00 (127.00)	5.00 (127.00)	86305M

Stainless Steel Mufflers

- Bright finish stainless bodies
- Noise and back pressure equal to OE specifications
- Shipped with protective coating on body

Cross Reference by Number

Manufacturer's Abbreviations

All information in this cross reference is as accurate as possible at the time of this printing. The manufacturer cannot guarantee accuracy nor be responsible for any misapplication.

This cross reference allows you to look up an OEM part number and find the corresponding Nelson Global Products part. The following manufacturer's abbreviations are used in this section:

AMGENRL	A M GENERAL™	FORD	FORD™	NORTHAME	NORTH AMERICAN BUS™
AGCHEMEQ	AG CHEM EQUIPMENT®	FREIGHTL	FREIGHTLINER®	NORTHWEN	NORTHWEST
