Peerless, the Largest U.S. Chain Manufacturer

Peerless Chain, established as a manufacturer of tire chains in 1917 eventually expanded into hardware and industrial chain manufacturing, as well as wire forms by the 1960's. By the late 1970's Peerless Chain entered the overhead lifting market.

Primarily known as a chain supplier to the local hardware stores and retail chain stores, the face of Peerless began to change with the acquisition of Weissenfels USA in March of 2004 and the acquisition of American Chain Company (ACCO) in July of 2006. The acquisition of these two companies expanded the industrial market for Peerless; specifically for Overhead Lifting and Marine products.

In December of 2010, the overhead lifting product line was bolstered once again with the acquisition of Letellier Material Handling Equipment (LMHE). Since 1974, LMHE has been manufacturing high quality overhead lifting devices to satisfy the requirements of customers in many diverse industries.

In September of 2011, Security Chain Company (SCC) became the newest member of Peerless. SCC brings cutting-edge traction and cargo control products to our ever-increasing product offering. Today, the PEERLESS INDUSTRIAL GROUP is the largest manufacturer and distributor of industrial and consumer chain and traction products in North America with a reputation for excellence in product quality and service.

Peerless Industrial Group, YOUR LINK TO QUALITY,
STRENGTH AND SERVICE SINCE 1917.

Alloy Chain

Peerless alloy chain is rugged, versatile, high-strength, low-weight chain manufactured from special analysis alloy steel. It is quenched and tempered before proof testing and the ultimate tensile strength is over twice that of ordinary steel chain. Tensile strength following heat treatment meets or exceeds all existing OSHA, Government, NACM and ASTM specification requirements.

Do not exceed Working Load Limits (WLL)! See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

Chain Sling Working Load Limit Specifications

Use this table as a guide to determine which chain sizes and leg styles are best for your requirements. Using the maximum load (or loads) you will lift, and the angle of lift required – work to the left across this table to determine proper chain size for your sling. Working load limit of the chain and components is established as pounds applied at the indicated degrees from horizontal. The rated capacity of the sling must be based on the smallest horizontal angle. For angles not shown, use the next lower angle or have a qualified person calculate the rated load for the new angle. When using hooks in a shortening (grab) or choker application, the Working Load Limit (WLL) of the sling must be reduced by 20%. The Grade 100 shortening Grab Hooks found on page 20 and 21 of this catalog require no reduction in WLL.

DO NOT load an assembly in excess of the rated working load limits in the chart above.

DO NOT put an unequal load on one leg of a sling. Distribute the load evenly.

DO NOT expose assembly to impact, rapid lifts or sudden stops.

DO NOT tie knots or allow chains to become twisted.

DO NOT use chain that appears to be defective, worn or damaged.

DO NOT fasten chain over sharp corners or edges. Protect with padding.

DO NOT tip load hooks. The latch must NEVER support the load.

When using non-cradle or non-shortening grab hooks in a shortening or choker application, the Working Load Limit (WLL) of the sling must be reduced by 20%

Reference the **SAFETY GUIDELINES** section of this catalog for more information.

Do not exceed Working Load Limits (WLL)! See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

How to Order

The following information should be given on orders or inquires for chain slings.

- 1. SIZE:** This is specified by the size of the material from which the chain is made, determined by working load limit required.
- 2. REACH:** This is the length, including attachments, measured from bearing point to bearing point.
- 3. TYPE:** Select and specify proper type of sling from list shown. Examples: S = single; O = oblong link; S = sling hook
- 4. ATTACHMENTS:** Unless otherwise specified standard master links as given herein will be used. When other than standard master links or hooks are required, we should be given a complete description or a drawing of the requested substitute.

When hot galvanizing is specified our recommended working load limits must be reduced. Please contact us with all such inquires.

Kuplex® Master Kuplinks

Master Kuplinks® are the optimum of chain to master link connections. In addition to the streamline characteristics of the Kuplink®, there is a definite advantage to field assembly since other coupling devices are unnecessary.

ACCOLOY® KUPLEX® ALLOY CHAIN ACCESSORIES

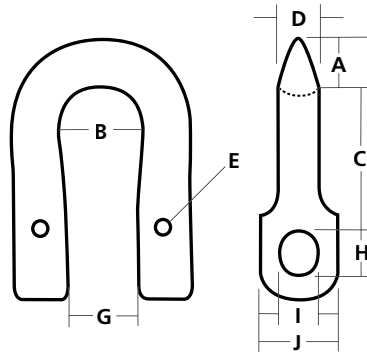

Kuplex® Kuplok®

Kuplok mechanical coupling links, an essential component of mechanically coupled slings, are used to assemble chain legs to the master link and/or attach eye type fittings.

Kuplex® Kuplers®

Kuplers act as a connection device between Master Links and Chain on all multiple leg Kuplex II Chain Slings. On single leg assemblies, they can be used in lieu of the popular Kuplex II Kuplink. Resembling a shackle in appearance, the Kuplers provide a high strength, high integrity connection, when used to connect a special attachment to the alloy chain assembly.

Do not exceed Working Load Limits (WLL)! See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

Kuplex® Load Pins & Retaining Pins

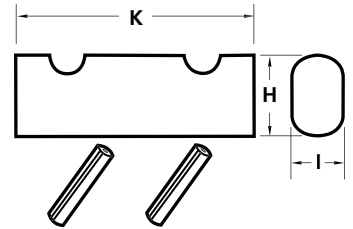

All Kuplex components derive their integrity connection from the special Kuplex Load Pins and Spiral Pins. The load pins are made from alloy steel heat treated to obtain optimum rated performance properties. The load pins are specially shaped to develop strength characteristics and resistance to bending under rated load. The oval shape presents a greater force area than conventional round pins.

Chain Size (Inches)	Hooks & Kuplinks				Kuplers		Retaining Pin

7/8	598900237	1.250	1.063	3.563	598900137	4.531	---	Bulk

Important: Use only genuine Kuplex load and retaining pins when assembling slings. Never use rods, bolts or other objects of questionable strength and metallurgy. Failure could cause serious injury or damage to property.

* One Load Pin and two Spiral Pins are bagged. There is an occasional need for replacement of Spiral Pins and Load Pins. The same Load Pins cannot be used in both Kuplers and Hooks. When ordering these parts separately, be sure to specify whether they are for Kuplers or Hooks and also specify Kupler Number or the Hook Number with which they are to be used.

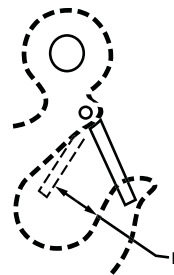

Accoloy® Kuplex® Latch Assembly

For use w/both Accoloy Eye Type & Kuplex Clevis Type Sling Hooks. One per bag.

PEER-LIFT ALLOY CHAIN ACCESSORIES

Peer-Lift Alloy Screw Pin Anchor Shackles

Forged Alloy Body & Pin (RR-C271F, Type IVA, Grade B, Class 2)

- Meet or exceed FED SPEC RR-C-271 requirements
- Meet ASME B30.26 Requirements
- Hot Dipped Galvanized to ASTM A153
- Proof load at 2 times Working Load Limit
- Ultimate load at 6 times the Working Load Limit

CUSTOM LIFTING PEERLESS CUSTOM LIFTING COMPONENTS

Custom Lifting Solutions

Peerless Custom Lifting, with divisions in Jeannette, PA and South Holland, IL, is capable of satisfying your custom lifting needs from welded chains slings to motorized coil lifters and much more.

We can design and construct a specialized lifting device to fit your application from carbon, alloy, stainless, aluminum or other specialty steels. Our experienced sales and engineering staff are available to solve all of your below the hook lifting requirements.

- Certified to OSHA and ASME standards.
- Capable of manufacturing to government and military specifications.
- Horizontal proof test capabilities up to 1,200,000 lbs and 40 feet in length.
- Vertical proof test capabilities up to 450,000 lbs.

WARNING

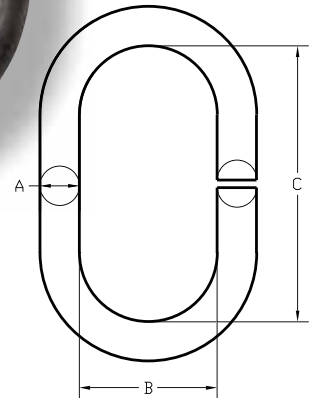

Do not exceed Working Load Limits (WLL)!
See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

V-Notched Alloy Coupling Links

Alloy components are 8620 or 4130 alloy steel. Un-heat treated coupling links are pre-notched, bright finished and ready for welding.

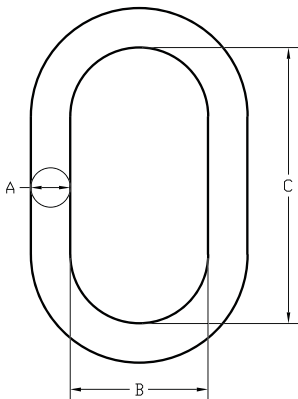

NOT FOR OVERHEAD LIFTING.

Chain Sling Working Load Limit Specifications

Grade 50 Stainless Steel Chain			
Chain Size Inches	Single Leg @ 90°	Double Leg @ 60°	Triple & Quad Leg @ 60°
3/16	1,200	2,075	2,850
1/4	1,250	2,150	3,225
5/16	1,900	3,275	---
3/8	2,650	4,575	6,875
1/2	4,500	7,775	11,675
5/8	6,000	10,375	15,575
3/4	10,000	17,300	25,975

- DO NOT** load an assembly in excess of the rated working load limits in the chart above.
- DO NOT** put an unequal load on one leg of a sling. Distribute the load evenly.
- DO NOT** expose assembly to impact, rapid lifts or sudden stops.
- DO NOT** tie knots or allow chains to become twisted.
- DO NOT** use chain that appears to be defective, worn or damaged.
- DO NOT** fasten chain over sharp corners or edges. Protect with padding.
- DO NOT** tip load hooks. The latch must NEVER support the load.

When using non-cradle or non-shortening grab hooks in a shortening or choker application, the Working Load Limit (WLL) of the sling must be reduced by 20% Reference the **Safety Guidelines** section of this catalog for more information.

Do not exceed Working Load Limits (WLL)! See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

316 Stainless Steel V-Notch Coupling Links

V-Notch coupling links are electropolished and ready for welding.

PEERLESS CUSTOM LIFTING COMPONENTS

Accoloy® Plate Hook

Accoloy Plate Hooks are designed for the most popular chain sizes - 9/32", 3/8", 1/2", 5/8" and 7/8". They are proof tested to the same values as the corresponding chain - therefore, the same working load limit applies. Fabricated from alloy steel, Plate Hooks can be furnished on Registered Slings as well as with various chain assemblies. Accoloy Plate Hooks are intended for use in handling plates, flats and structurals.

See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

CUSTOM LIFTING

Insulated Swivel Hook

Reduce costly handling during welding operations. Avoid shorted fork-lift batteries. Electrically insulated, the insulated hook eliminated current flow that can damage hoists and lifting equipment. Free running bearing allows easy work positioning. Use wherever electrical potentials present a hazard. Safe up to 2,000 volts and 225°F.
*Uses SKF bearing for free turning.

Eliminates Costly Down Time With Lift After Lift, Built-In Dependability.

- **Ease of Use** - Designed so bail stands up while chain rests on floor, there is no wrestling with the bail for hook-up.
- **Balanced Loading** - Three point suspension offers superior stability.
- **Wearability** - Engineered and built for increased service life, with heat treated bail, pins, alloy chain and end links.
- **Less Down Time** - Easy inspection, replaceable pins, legs and bail mean more time on the job and fewer off-site repairs.

How To Order Nylon Slings

All part numbers show in our catalog reflect the minimum length that a sling can be manufactured. We manufacturer nylon slings up to 75 feet in length. To order the correct size and type of sling, please refer to the part number explanation shown below.

SEE1702-03

Each sling part number begins with a BLACK "S".

The 2 RED letters refer to the type or style of sling.

The PURPLE number refers to the ply(s) of the sling. Slings are offered in both 1 ply and 2 ply.

The ORANGE number refers to the class of sling. Slings are all heavy duty class 7 made with 9800 lbs/in. premium nylon webbing.

The GREEN numbers refer to the width of the sling, preceded by a 0. Slings are available from 1 inch to 6 inches or 01~06.

The BLUE numbers refer to the length of the sling (03 is a 3 foot sling). Slings are available in lengths from 3 to 75 feet (03~75).

Abbreviation	Description	Type
TC	Choker	I
TT	Double Triangle	II
EE	Double Flat Eye	III
TW	Double Twisted Eye	IV
EN	Endless	V
RE	Reverse Eye	VI

Nylon Web Sling Eye Treatments

The eyes of web slings are often subjected to the harsh treatment of rough crane hooks. Speciality eye treatments are available to help reduce the wear in that area, thereby extending sling life. The following photos illustrate the more common eye treatments using wear resistant webbing in various forms. Should you want non-standard eye treatments on your eye and eye web slings, please specify using the terminology below.

SEE - Type Flat Eyes

STW - Type Twisted Eyes

Textured nylon wear resistant webbing is standard for these eye treatments.

Tapering Eyes - As a standard practice, the eyes or bearing points of sling Types 3 and 4 are tapered to accommodate a crane hook on slings that are 3" and wider. Untapered eyes are available upon request. Type 5 (Endless) slings are NOT tapered unless specified on order.

Loop Eyes

Recommended minimum loop eye length and suggested loop eye width for type III, IV and VI web slings are listed in the following tables.

Sling Web Width		Recommended Minimum		Suggested Loop Eye Width	
Inches	MM	Inches	MM	Inches	MM
1	25	6	152	1	25
2	51	8	204	2	51
3	76	8	204	1 1/2	38
4	102	10	254	1 1/2	38
6	152	14	355	2	51

Increase The Life Of Your Sling:

To protect sling ends from abrasion due to use on rough surfaces or attachments, we recommend you order a choker (STC) or triangle (STT) sling. We also offer protective sleeves and buffers. The sleeves can be floating or sewn into a fixed wear position on the sling. Buffers are sewn to the web in a fixed location only. They are available in widths from 1" to 6" and lengths up to 60 feet.

When ordering sleeves for 2 ply slings, order the next size larger sleeve to fit over the added thickness of the sling.

Stock #		Width (Inches)	Length (Feet)	Weight (Lbs./Ea.)		Package
Sleeves	Buffers			Sleeves	Buffers	
SCS01	SCB01	1	1	0.04	0.02	Each
SCS02	SCB02	2	1	0.08	0.04	Each
SCS03	SCB03	3	1	0.13	0.08	Each
SCS04	SCB04	4	1	0.18	0.13	Each
SCS05	SCB05	6	1	0.30	0.16	Each

Do not exceed Working Load Limits (WLL)! See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

Heavy Duty Class 7 Nylon Lifting Slings

Our flat lifting slings are manufactured from premium nylon sling webbing and include a stamped, heavy leather identification tag sewn securely to each sling. This tag is imprinted with the working load limits for the three sling configurations (vertical, choker, basket) as well as the part number and batch code which include the date of manufacture. Remember that the law requires a lifting sling to be removed from service if the capacity tag is NOT legible so with this information imprinted, you can realize a longer service life. Web slings come individually shrink-wrapped to allow them to stack neatly, display attractively and stay clean until sold.

Web slings include the latest WSTDA warning and instruction sheets in both English and Spanish.

Choker Sling

Many popular sling sizes are stocked; other sizes are made to order.

Do not exceed Working Load Limits (WLL)!
See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

Heavy Duty Polyester Roundslings

Our Roundslings are manufactured from high tenacity polyester filament that is wound into skeins and then assembled into a continuous loop. The fiber loop is then covered with a heavy duty seamless polyester sleeve for protection. By forming a sling in this manner it distributes the load over the entire sling length for longer life and better lifting or pulling properties than many other options. Roundslings are color coded by strength rating for quick and easy identification. All roundslings are manufactured to WSTDA specifications. All slings are individually shrink wrapped for a clean shelf display and include the latest WSTDA warning sheets in both English and Spanish languages.

- Lightweight, easy to handle and maintain.
- High strength to weight ratio for easier handling.
- Fabric material will not cause cuts or scratches on users hands.
- Soft cover will not scratch load.
- Superior resistance to UV, rot, mold & mildew.
- No loss of strength when used in water or wet environments.
- Resistant to acids (do not use in high alkaline environments).
- Minimal elongation in use of approximately 3%.
- Easily conforms to the shape of the load for better grip.
- Seamless cover tube with no sewn edge that can rupture prematurely or catch on the load.

Binder Chain Assembly Usage Chart

This chart is provided as a guide to meet the basic minimum current in service requirements of the FMCSA† and the DOT‡ published Sept 27, 2002. The following table lists the minimum number of chain assemblies required to secure a load per DOT & CVSA§. *This chart is only to be used as a reference.

*Many factors affect the proper method of cargo securement including the length and type of the cargo to be secured. Refer to the most recent revision of The Dept. of Transportation (DOT) Title 49 regulations for more complete requirements regarding the proper methods and number of tiedowns required.

†**FMCSA:**
Federal Motor Carrier Safety Admin.

‡**DOT:**
Department of Transportation

§**CVSA:**
The Commercial Vehicle Safety Alliance

Chain Grade	Size (Inches)	WLL	Net weight of cargo to be secured in Lbs.						
			20,000	25,000	30,000	35,000	40,000	45,000	50,000
Alloy Grade 80 (P8, S8, SX8, T-80)	5/16	4,500	3	3	4	4	5	5	6
	3/8	7,100	2	2	3	3	3	4	4
	1/2	12,000	1	2	2	2	2	2	3
Transport Grade 70 (P7, S7, SX7, S-70, AC7)	1/4	3,150	4	4	5	6	7	8	8
	5/16	4,700	3	3	4	4	5	5	6
	3/8	6,600	2	2	3	3	4	4	4
	1/2	11,300	1	2	2	2	2	2	3
High Test Grade 43 (P4, P43, S4, SX4, S-43)	1/4	2,600	4	5	6	7	8	9	10
	5/16	3,900	3	4	4	5	6	6	7
	3/8	5,400	2	3	3	4	4	5	5
	1/2	9,200	2	2	2	2	3	3	3

This chart is based on each tie-down secured to a trailer point, transversing across or through the load and then secured to another anchor point on the trailer. If used by securing the tie-down to the trailer anchor point and attaching it directly to an article of cargo (i.e., a vehicle), the quantity of tie-down required shall be two times (2x) the quantity listed in the chart above.

WARNING

Do not exceed Working Load Limits (WLL)! See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

Load Binders

3 position pawl.

Tamper resistant.

QuikBinder™ Plus A Ratchet Like No Other

This premium patented ratchet binder is unlike any other binder available on the market today. Now it is better than ever, with higher working load limits designed for use with either Grade 70 Transport or Grade 80 Alloy tie-down chains.

The QuikBinder™ PLUS is easier to install than standard ratchet loadbinders. The 3-position pawl offers the user a choice of ratchet extension, ratchet take-up or a “free spin” setting for fast adjustment in either direction. A load can be secured in half the time. It is available in three sizes and features a vinyl coated barrel for a strong, comfortable grip.

The folding handle makes the QuikBinder™ PLUS safer (no handle sticking out) and more convenient to use. Simply fold the handle down after the load is secure or when storing on your cab rack. Stronger, faster, safer and more functional than standard ratchet binders.

The QuikBinder™ PLUS can be locked to the tie-down chain with a long shank padlock, making it more difficult to tamper with the binder, assembly or the load. Padlocks with programmable combinations are also available. See page 129 of this catalog for more information.

Our loadbinders meet all DOT/CVSA/CCMTA requirements. The special hook construction supports the load of the chain and will not bind. Loadbinders are heat treated and proof tested with forged heat treated hooks. The Working Load Limit is permanently marked on handle. Our loadbinders feature special links with controlled flash welds.

QuikBinder™ Plus Ratchet Loadbinder

ProLok66™ Adjustable Lever Loadbinder

Our adjustable lever loadbinder features the ultimate in ease and versatility in a lever binder with the added safety of a self-locking handle.

ProLok66™ has a built-in knurled adjustable nut feature so the binder doesn't have to be repositioned on the chain (like standard lever binders) to achieve the best possible fit and perfect tension on the chain. The binder adjusts a full 2" to give the user optimum link location. No more problems getting that last extra half link hook-up. The handle's safety latch is automatically engaged when the handle is closed. This locks the handle in the closed position until it is released. This features makes our adjustable binder safer than standard lever binders. The convenient thumb-release latch is easy to use and has no loose parts to misplace.

Do not exceed Working Load Limits (WLL)!
See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

Forged Safety Release Lever Loadbinder

This binder design allows the user to release the binder tension without any kickback of the handle typical of a lever style binder. The center body of the binder independently rotates, free of the handle, to release the tension smoothly and easily. This eliminates the chance for injuries from the handle swinging with substantial force when released.

The safety release handle makes this loadbinder less dangerous than other lever style loadbinders on the market today.

Premium 1" Polyester Straps

All 1" strap assemblies are packaged in tamper-resistant, durable, sonic welded "clam shells". These retail packages are slotted for pegboard hooks and will also stand for counter display. Each package includes complete instructions for use. These versatile straps are great for securing boats, motorcycles, ATVs, etc.

Blue and black 1" straps feature 4,500 Lb. webbing. Black/white and red 1" straps feature 2,500 Lb. webbing.

Ratchet Tie-Down - With J-Hooks

Strap features a plated "J" hook and floating "D" ring on each end that can be secured through truck stake holes, eye bolts, etc. Premium ratchet-style buckle for easy tightening.

Tie-Down Anchors & Cleats

Tie-down anchors fit into stake holes on pickup beds or utility trailers and provide a secure attachment point for straps. Cleats can be mounted on the side of a truck bed or a utility trailer and used to provide a secure location to attach utility straps or other tie downs such as rope. All are chrome plated for added appeal.

Boat Straps & Winches

Gunwale & Transom Tie-Down Straps - 2" Wide

2" wide premium grade nylon webbing with easy to use over center chrome finish buckles and heavy-duty S hooks. The chrome finish on the hardware resists rust and looks great. Gunwale straps are used to secure a boat to the trailer by crossing the top of the boat over the gunnels. Transom straps are used to secure the rear of the boat to the trailer.

Stock #	Description	Length (Feet)	Qty. Per Package	Lbs. Per Package	Working Load Limit	
					Lbs.	Kgs.

Combination Low Profile Mount Weld-On Web & Cable Winch

Stock #: **CC5864**
 Finish: Black Powder
 WLL: 5,500 Lbs./2,495 Kgs.
 Weight Each: 10.85 Lbs.

Factory Package: 6
 Order Unit: Each
 Design Factor: 3:1

For Proper Winch Use:

- Use extreme caution when tensioning the winch/assembly to assure the latch/pawl is fully engaged in the gear sprocket teeth before releasing the pressure on the winch bar. Always keep hands and fingers away from the winch pawl & keep face, head and body out of path of winch bar.

Do not exceed Working Load Limits (WLL)!
 See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

Standard Slider Winch

Stock #: **CC5822**
 Finish: Black Powder
 WLL: 3,335 Lbs./1,515 Kgs.
 Weight Each: 3.10 Lbs.

Factory Package: 10
 Order Unit: Each
 Design Factor: 3:1

For Proper Winch Use (cont.)

- Inspect all binding components (winch, strap assembly, chain assembly, loadbinder) prior to each use. Never use damaged or worn equipment. Remove from service and replace with new. Do not attempt to repair. Winch bars are used entirely at the users own risk and the use of a winch bar demonstrates an understanding of the risks and a willingness to accept the consequences of possible property damage, serious personal injury and/or loss of life.
- When using Peerless winch bars with winches the tapered point of the bar must be inserted completely through both holes in the winch cap. Failure to insert bar correctly could cause the bar to slip and result in serious personal injury and/or loss of life. During tightening and before releasing the tie down assembly, check the winch pawl to insure it has properly engaged the gear sprocket. Always grip the winch bar at the knurled section of the bar for increased safety. Reference the SAFETY GUIDELINES section of this catalog for more information.

Do not exceed Working Load Limits (WLL)
 See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

Winch Bars, Hard Parts & CargoGuard™

Winch Bars

Ag Trailer Chain

Peerless Ag-Safety chains meet the requirements of ANSI/ ASAE Standard S338.5. All chains come with latch-type grab hooks, which ensure that the chain will not separate from the towing vehicle. A permanent ID tag states the gross vehicle pounds for which the chain is intended.

Winch Line Tail Chain

ACCO's Winch Line Tail Chain is a flexible attachment for use with wire rope. Length specified is exclusive of hook. Use same size chains as wire rope. The hook is dropped forged alloy steel and heat treated for extra durability. The hook is designed to prevent wear on wire rope. **NOT FOR OVERHEAD LIFTING.**

SmartBar™

The Most Versatile Loadlock On The Market!

Our SmartBar™, with high leverage and flexible feet, mean superior holding power. Square vs. round tubing provides a stronger bar (less susceptible to bending and more surface area to cargo). The SmartBar™ can brace a whole load or just part of one.

- Easier to use and store. 140 SmartBars™ can ship on a standard pallet!
- Up to 20% more holding power than conventional loadlocks.
- Adjusts continuously from 48" - 108". Securement range from small truck bed to full high cube trailer width.

The vinyl coated lever provides smooth, positive operation. Closed bar locking tab is easily locked / unlocked with the convenient thumb release.

The SmartBar™ is designed for use in trailers with flexible walls. The feet have extra cushioning to compensate for the flex of some trailers.

With optional E-Track attachment (#CC5015), the SmartBar™ can easily be adapted for use in A & E track, doubling the front to back holding power.

SecureBar™ & GrabBar™

SecureBar™

Versatile Loadlock For Light Truck & Passenger Vehicles

Durable square tubing provides added strength. It is versatile and can be used in pickups, SUVs, vans and passenger cars. The soft rubber feet provide excellent grip and won't mar surfaces. Retail package is a 46" four color card with pictures and instructions for use. Hangs vertical or horizontal on standard peg hooks.

- Adjusts continuously from 44" to 78".
- Easy operation - Positive locking lever action and quick thumb release.
- Zinc plated for maximum rust protection.

Stock #	Reach (Inches)	Description	Qty. Per Package	Package	Weight (Lbs./Ea.)

CC5225-B	44 - 78	SecureBar™ CargoBar - Bulk Pkg.	160	Crate	5.00

GrabBar™

Designed for cargo stabilization inside trailers with wood or metal rails. Feet adjust to board/rail thickness ranging from 1/3" - 1 3/4". Collapses down to 46" for easy storage, with a full adjustment range to 106". The rubber feet provide excellent grip and will not damage surfaces. Use the GrabBar™ stop collar for rigidity in stake side truck applications. The GrabBar™ can also be used in conjunction with the SmartBar™ (see photo at right).

All G70 domestic chain (5/16, 3/8, 1/2) is stamped with the Working Load Limit every 10 links as shown.

Do not exceed Working Load Limits (WLL)! See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

Grade 70 Import Transport Chain (Short Link)

Grade 70 was designed specifically to provide a light, yet strong chain for binding, tie-downs, towing and construction use. Made from a variety of medium carbon and alloy materials. Induction heat treated, the chain meets all requirements set by the Department of Transportation (DOT), CCMTA & CVSA for truck tie-down use. Manufactured to ASTM 80 short link specs or NACM long link specs for reduced weight. Order unit is foot. **NOT FOR OVERHEAD LIFTING.**

Stainless Steel Chain

A316 is a non-magnetic alloy chain, composed of Manganese, Chromium, Nickel and Molybdenum, made to ASTM 80 specifications. It is highly resistant to salt water and chemicals and will not spark. Its uses include food processing, marine, fishing and industrial applications when high corrosion resistance is required.

A304 is a longer pitch link made to NACM specifications and the alloying components exclude the use of Molybdenum. It has lower Working Load Limits than A316 and is used mainly for decorative and low load applications. Order unit is foot.

NOT FOR OVERHEAD LIFTING.

Peer-Lift Galvanized Anchor Shackles

Screw Pin Anchor Shackles are ideal for those applications where frequent pin removal is needed.
Safety Pin Anchor Shackles are complete with bolt, nut and cotter pin.

- Meet or exceed FED SPEC RR-C-271 requirements
- Hot Dipped Galvanized to ASTM A153
- Proof load at 2 times Working Load Limit
- Ultimate load at 6 times the Working Load Limit

Peer-Lift Screw Pin Anchor Shackles (RR-C-271F, Type IVA, Grade A, Class 2)

Three Common wire ropes for consumer applications.

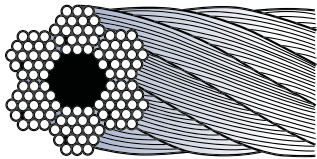

7 x 7 Construction

7 x 7 construction with seven strands of seven wires, uses heavier gauge wire which offers better abrasion resistance than 7 x 19, but it is not as strong and less flexible.

7 x 19 Construction
(available with vinyl coating)

7 x 19 construction is the most practical. With its seven strands of nineteen wires each, it is stronger than the other two types, has excellent flexibility and good abrasion resistance.

6 x 19 Construction
(Fiber Core)

6 x 19 fiber core wire rope is the most economical where large diameters are required and it offers very good abrasion resistance. It is less flexible and not as strong as the other types. Often used for longer, straight runs.

Anti-Theft Chain & Padlocks Brass Combination Locks

These locks feature a brass plated zinc diecast body for resistance to rust. The shackle is tempered alloy steel. They have a re-settable combination so each lock can be customized with the users personal key code or all set to the same combination. The long shackle model works very well with QuikBinder™ Plus to keep the binder, chain & load locked and secure. H4927-2730 is retail packaged in a tamper-proof clamshell.

STOCK #: H4927-2730
Trade size: 2" Case (50mm)
Shackle length: 1"
Finish: Brass
Weight: 0.60 Lbs./Ea.
Factory package: 12/Ctn.
Order unit: Each

STOCK #: H4927-3030
Trade size: 2" Case (50mm)
Shackle length: 2 1/4"
Finish: Brass
Weight: 0.75 Lbs./Ea.
Factory package: 12/Ctn.
Order unit: Each

Weatherproof Locks

These locks are designed with the elements in mind. This specialty lock is completely sealed from the weather. It is constructed of laminated steel with a double locking device for extra protection. The internal lock cylinder is solid brass, has pin tumblers and stainless steel springs. Two solid brass, nickel plated keys accompany each lock.

STOCK #: H4924-1261
Trade size: 1 1/2" Case (40mm)
Shackle length: 1 1/4"
Weight: 0.61 Lbs./Ea.
Factory package: 12/Ctn
Order unit: Each

STOCK #: H4925-2461
Trade size: 1 1/2" Case (40mm)
Shackle length: 2 1/2"
Weight: 0.69 Lbs./Ea.
Factory package: 12/Ctn
Order unit: Each

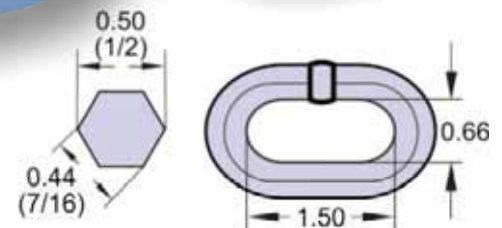

"Hex" Anti-Theft Chain

Hex chain is a high alloy chain drawn in a six sided (hexagonal) shape and heat treated to be extremely hard. The hex shape does not allow a bolt cutter to get the proper bite to permit them to cut the chain. It is ideal for securing equipment or portable tools at a job site or for general purpose security use. Sold in full drums or custom cut at the factory to the users required length.

STOCK #: H2916-0812
Trade size: 7/16" x 400'
Finish: Blue
Weight: 750 Lbs./Per Drum
Factory package: Full Drum
Order unit: Ft.

STOCK #: H2990-0812
Trade size: 7/16" x 400'
Finish: Blue
Factory package: Custom Cut
Order unit: Ft.

Do not exceed Working Load Limits (WLL)!
See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

"Hex" Anti-Theft Chain Lock

Padlock body is made from Stainless A304 material with a magnesium shackle. The lock body extends up to protect the shackle from allowing bolt cutters to access it. Lock comes with 4 double notch cut reversible keys that can not be removed unless the lock is closed and secure. This lock is a great partner with Hex Chain for maximum security.

STOCK #: H4920-1200
 Shackle Length: 1"
 Finish: Stainless
 Weight: 1.60 Lbs./Ea.
 Factory Package: Ea.
 Order Unit: Each

"Hex" Anti-Theft Chain & Lock Kit

Retail packaged kit includes 5 ft. of Hex Chain covered with a 4 ft. protective sleeve and a Stainless Hex Chain Lock. They are all packaged in a convenient nylon storage bag. Each complete kit is individually boxed for attractive retail shelf display.

STOCK #: H2992-6812
 Chain Length: 5'
 Weight: 11.40 Lbs./Ea.
 Factory Package: 4 /Ctn.
 Order Unit: Each

Heavy Duty Pallet Jack

Our premium, heavy duty pallet jack has a 5,500 Lb. capacity. The wheels are made of durable polyurethane for long life. The forks are a full pallet length of 48" for total load support. The fork rollers allow easy pallet entry and the large ergonomic rubber handle has a three position control lever. This pallet jack has a two year pump warranty and is certified and tested for over 60,000 cycles.

Heavy Duty Pallet Jack comes in two sizes

- Effortless pallet entry/exit rollers to make it easier to push and pull the pallet truck.
- 12 lubrication grease nipples on all moveable parts for easy maintenance.
- The adjustable pump cap ensures a long service life.
- Reinforced for added strength and load capacity.
- Large ergonomic rubber handle with a three way positive control lever.

Do not exceed Working Load Limits (WLL)! See the SAFETY GUIDELINES section before using these products. Pages 150 - 155.

5,500 Lb. (2,500 kgs) capacity Heavy Duty Pallet Jack

- Full hydraulic system. Bullet connection between steering shaft and pump piston.
- Convenient to replace rear wheels.
- Easy to maneuver with a 210 degree turning radius.
- Special lowering valve to control the rate of decent and over by-pass valve for added durability.
- Total number of pump strokes - 10. Lift per stroke 0.47" (12mm).
- Reliable leak-proof hydraulic system.
- Polyurethane wheel, tandem fork roller.
- The pump is warranted against leakage for a period of two years.
- HPT-5500 has wider forks for stability.
- HPT-5515 has narrower forks to fit smaller pallets.

ACCO G43 Domestic High Test ISO Chain

A high tensile strength carbon steel anchor (windlass) chain with an ISO short link. The short link makes it more flexible and ideally suited as a windlass chain. Check fit or contact windlass manufacturer before purchase. This extra thick hot dip galvanized finish is recommended for all marine applications.
NOT FOR OVERHEAD LIFTING.

Embossed: G4

Peer-Lift Screw Pin Anchor Shackles

RR-C-271F, Type IVA, Class 2, Grade A - Ideal for those applications where frequent pin removal is needed.

- Meet or exceed FED SPEC RR-C-271 requirements
- Also available in smaller package quantities
- Hot Dipped Galvanized to ASTM A153

Use a Shackle for Maximum Flexibility

Use a shackle to add on to an existing span of chain or connect it in the middle of a span for maximum versatility.

Embossed: MC every 8-10 links
USA: every link

ACCO Mooring Chain

The Best Chain for a Tough Job

Compare ACCO's mooring chain to proof coil chain and it's easy to see that ACCO mooring chain is stronger.

Plus the hot dip galvanized coating has 30% more zinc per unit volume than mechanical coating.

The long link design permits the hook-up of shackles anywhere on the chain, not just on end links as with most chains.

NOT FOR OVERHEAD LIFTING.

ACCO Tuna Chain

The Best Chain for a Tough Job.

ACCO uses high quality steel, especially formulated and heat treated for tuna fishing. Every heat treated lot is sampled and destructively tested for material strength and link elongation. All Tuna Net Chain is then proof tested, 100%, every link.

ACCO Tuna Net Chain is then continuously Hot Dip Galvanized to provide the deep strong protective coating you have come to expect which with over 30% more zinc per unit volume than mechanical coating. In the hot dip process the galvanized zinc coating is alloyed with the base steel creating a METALLURGICAL bond that is several orders of magnitude stronger than mechanical bonding. This zinc-steel bond is immune to further corrosion for the life of the zinc. If the chain's steel base is exposed by cuts or nicks, the base steel will not rust until the nearby zinc is consumed.

**NOT FOR
OVERHEAD
LIFTING.**

SAFETY GUIDELINES

General Safety Guidelines

Peerless Industrial Group, as a manufacturer of chain, can only control the specifications of our chain products in accordance with industry and governmental standards for chain manufacturing. It would be impossible for any warning to contain all of the possible misapplication associated with the use of Peerless Industrial Group products. Our warnings are intended to identify only those risks which are most common. The responsibility and understanding of the proper safe use and application of the products in our catalog, ultimately rest with the end user. We are not responsible for the end user's assembly in which our products may be used. Failure of the product can occur due to misapplication, abuse, intentional alteration or improper maintenance. Product failure can result in property damage, personal injury or death.

Working Load Limit (WLL)

The "Working Load Limit" (rated capacity) is the maximum load that shall be applied in direct tension to an undamaged straight length of chain, strap or fittings.

Proof Test

The "Proof Test" (manufacturing test force) is a term designating the minimum tensile force which has been applied to a product under constantly increasing force in direct tension during the manufacturing process. These loads are manufacturing integrity tests and shall not be used as criteria for service or design purposes.

Minimum Breaking Force

The "Minimum Breaking Force" is the minimum force at which the product during manufacture has been found by testing to break when a constantly increasing force is applied in direct tension. Breaking force values are not guarantees that all chain or strap segments will endure these loads. This test is a manufacturer's attribute acceptance test and shall not be used as a criteria for service or design purposes.

The Working Load Limits and the associated safety factor of each Peerless product may be affected by wear, misuse, overloading, corrosion, deformation, intentional alteration and other use conditions. Regular inspection must be conducted to determine whether use can be continued at the assigned Working Load Limit, a reduced Working Load Limit or whether the product must be withdrawn from service. The terms "Working Load Limit", "Proof Test" and "Minimum Breaking Force" contain no implication of what load the product will withstand if the product is used in such conditions of abuse and misuse. Peerless Industrial Group accepts no liability for any such abuse or misuse.

The Working Load Limit of a sling or assembly must not exceed the lowest Working Load Limit of the components in the sling or assembly. Use only Peerless Industrial Group approved parts as replacements when servicing or repairing original Peerless Industrial Group slings or assemblies.

All Working Load Limits (WLL) shown in this catalog apply only to new or "in as new" condition products. USE ONLY GRADE 80 OR GRADE 100 ALLOY OR GRADE 50 STAINLESS STEEL CHAIN AND ATTACHMENTS FOR OVER-HEAD LIFTING. Please see page 6 for more information regarding alloy chain Working Load Limits in relation to the angle of lift.

When using hooks in a shortening (grab) or choker application, the Working Load Limit (WLL) of the sling must be reduced by 20%. The Grade 100 shortening Grab Hooks found on pages 20-21 of this catalog require no reduction in WLL.

PEERLESS INDUSTRIAL GROUP PRODUCTS ARE INTENDED TO BE USED AT OR BELOW THE WORKING LOAD LIMITS (WLL) SPECIFIED IN CONSTANTLY INCREASING FORCE APPLICATIONS UNDER DIRECT TENSION OR IN A STRAIGHT LINE PULL.

SHOCK LOADING IS PROHIBITED AND SIDE LOADING MUST BE AVOIDED, AS IT EXERTS ADDITIONAL DYNAMIC FORCES OR LOADING WHICH THE PRODUCT IS NOT DESIGNED TO ACCOMMODATE.

THE CONDITIONS INVOLVING USE IN CERTAIN ENVIRONMENTAL SITUATIONS SUCH AS UNUSUAL (HIGH OR LOW) TEMPERATURE, CHEMICAL, ETC..., CAN CAUSE CHANGES IN CHAIN PERFORMANCE.

All chains and attachments in this catalog are capable of creating sparks unless otherwise noted.

Welding Peerless Industrial Group load support parts or products can be hazardous. Knowledge of materials, heat treatment and welding procedures are necessary for proper welding.

CONSULT PEERLESS INDUSTRIAL GROUP FOR ADDITIONAL INFORMATION OR QUESTIONS REGARDING THE USE AND APPLICATION OF THE PRODUCTS COVERED IN THIS CATALOG.

Temperature & Chain Guidelines

“Hot Dip Galvanizing exposes chain to elevated temperatures which results in reduced working load limits for heat treated chains. Grade 70 chain working load limit is reduced by 10%, grade 80 chain is reduced by 20% and grade 100 chain is reduced by 30%. All users must be notified of this reduction in working load limits”

Use of Grade 80 Chain Under Heat Conditions

Effect of Elevated Temperature on the Working Load Limit of Grade 80 Alloy Chain.

Chains should not be used outside of the -40° F to 400° F (-40° C to 204° C) temperature range without consulting the chain manufacturer. The specific working load limit reductions for Grade 80 chains used at and after exposure to elevated temperatures have been established and are shown below.

Grade 80 Heat Conditions		
Maximum Temperature of Chain	Reduction of Working Load Limit While At Temperature	Reduction of Working Load Limit After Exposure to Temperature
Below 400°	None	None
400°	10%	None
500°	15%	None
600°	20%	5%
700°	30%	10%
800°	40%	15%
900°	50%	20%
1000°	60%	25%
Over 1000°	* (see below)	* (see below)

* OSHA 1910.184 requires all slings exposed to temperatures over 1000° F to be removed from service.

Use of Grade 100 Chain Under Heat Conditions

Effect of Elevated Temperature on the Working Load Limit of Grade 100 Alloy Chain.

Chains should not be used outside of the -40° F to 400° F (-40° C to 204° C) temperature range without consulting the chain manufacturer. The specific working load limit reductions for Grade 100 chains used at and after exposure to elevated temperatures have been established and are shown below.

Grade 100 Heat Conditions		
Maximum Temperature of Chain	Reduction of Working Load Limit While At Temperature	Reduction of Working Load Limit After Exposure to Temperature
Below 400°	None	None
400°	15%	None
500°	25%	5%
600°	30%	15%
700°	40%	20%
800°	50%	25%
900°	60%	30%
1000°	70%	35%
Over 1000°	* (see below)	* (see below)

* OSHA 1910.184 requires all slings exposed to temperatures over 1000° F to be removed from service.

Fig.1

General Hook & Latch Guidelines

Important Safety Information - Read & Follow

- Always inspect hook & latch before using.
- Never use a latch that is distorted or bent.
- Always make sure spring will force the latch against the tip of the hook.
- Always make sure hook supports the load. Do not point load hooks—load should bear on the bowl of hook. The latch must never support the load. (See Figure 1 & 2).
- Latches are intended to retain loose sling or devices under slack conditions.
- Latches are not intended to be an anti-fouling device.

Fig.2

Table of Wear

If chain is worn to less than the minimum allowable thickness (T), remove the chain from service.

Wear Specifications

Chain Size		Material Diameter		Min Allowable Thickness (T)	
Inches	mm	Grade 80	Grade 100	Grade 80	Grade 100
9/32	7mm	0.274	0.279	0.239	0.239
3/8	10mm	0.392	0.404	0.342	0.342
1/2	13mm	0.510	0.529	0.443	0.443
5/8	16mm	0.630	0.625	0.546	0.546
3/4	20mm	0.781	0.821	0.687	0.687
7/8	22mm	0.906	--	0.750	--
1	26mm	1.032	--	0.887	--
1-1/4	32mm	1.250	--	1.091	--

Chain & Sling Guidelines

Check #1 Inspections

Visually examine the sling before each use. Look for stretched, gouged, bent or worn links and components, including hooks, with open throats, cracks or distortion, if damaged, remove from service.

BENT

GOUGED

STRECHED

WORN

Check #5 Sharp Edges

Protect chain with padding when lifting sharp edged loads.

Check #2 Balance

Know the load — determine the weight, center of gravity, angle and lift and select the proper size of sling.

Check #6 Abrupt Movement

Lift and lower loads smoothly. Do not jerk. Shock loading is prohibited!

Check #3 Overload

Never overload the sling — check the working load limit on the identification tag. Always consider the effect of Angle of Lift — the tension on each leg of the sling is increased as the angle of lift, from horizontal, decreases. Use the chart in this catalog or in the Peerless Chain Sling User's Manual for this purpose.

Check #7 High Temperatures

Do not expose alloy chain or sling to temperatures of 400° F (204° C) or higher. Do not drag slings on the floor.

Check #4 Knots, Twists & Kinks

Make sure chain is not twisted, knotted or kinked before lifting load. Slings should not be shortened with knots, bolts or other make-shift devices.

Check #8 Chain Care

Store slings properly on an A-Frame and protect chainslings from corrosion during storage. Do not drag slings on the floor.

Web Slings

DANGER: Overhead lifting presents a very real danger of serious personal injury or loss of life if lifting equipment is not used properly. OSHA and ASME have adopted the following requirements for safe operation of all lifting slings. Please read and understand all of these instructions prior to using any lifting sling or sling assembly. Slings should only be used by qualified persons who are responsible for the sling & rigging selection, inspection and use. Use of these products demonstrates an understanding of these warnings and the risks involved.

SAFE USE: Inspect all sling components prior to each use. Never use slings that are damaged or defective. Damaged or defective slings must be removed from service immediately. The following conditions constitute a damaged sling: acid or caustic burns, melting of any part of the web surface, broken or worn stitching, distortion of eyes or fittings, or web snags, cuts, tears, and punctures. Only slings with legible identification tags shall be used. Keep all tags and labels away from the load, hook and point of choke, to avoid rendering the tag non-readable and the sling therefore unusable. If in doubt about the safety of a sling, DO NOT use it without having it proof tested.

Slings must never be shortened with knots, sewing or other makeshift devices nor should they ever be extended from their original length with non-original hardware, fittings or other devices. Never twist or kink the legs of a sling. The web sling legs (branches) shall contain or support the load from the sides above the center of gravity when using a sling in a basket configuration. Web slings shall not be bunched between the ears of a clevis, shackle or in a hook.

Never load in excess of the rated capacity for the application. Consideration must be given to the load angle (see Sling Angle Chart on page 50) which affects the rated capacity of the sling. Shock loading shall be avoided. The load applied to a hook shall be centered in the base or bowl of the hook to avoid hook tip overloading.

All Cargo Control Products

WARNING: Observe all tie down requirements of the Commercial Vehicle Safety Alliance (CVSA.), Federal Department of Transportation (DOT), CCMTA (Canadian Council of Motor Transport Administrators) or other local regulations governing cargo restraint and tie down. Use only products that are rated and tagged with working load limits (WLL) for cargo tie down applications.

SAFE USE: Inspect all tie down components prior to each use. Never use items that are damaged, worn or defective. Remove them from service immediately and replace with new. Do not attempt to repair. The following conditions constitute a damaged tie down strap: acid or caustic burns, melting of any part of the web surface, broken or worn stitching, distortion of eyes or fittings, or web snags, cuts, tears, and punctures. Only tie down straps with legible identification tags should be used. Keep all tags and labels away from the load, vehicle body and winch to avoid tag damage rendering the tag non-readable and the strap assembly therefore unusable. The following conditions constitute a damaged tie down chain assembly: damaged or distorted links, distortion of eyes or hooks, nicks or gouges in the chain or hooks. If in doubt about the safety of a tie down component or assembly do not use it. Loadbinders should not be used if any of the previous conditions exist or if the handles are bent or distorted.

Select only web slings with suitable characteristics for the load type, hitch and the environment of their use. Web slings should always be hitched in a manner that provides for control of the load. Web slings used in a basket hitch must have the load balanced to prevent slippage. Web slings used in a choker hitch must be of sufficient length to assure that the choking action is on the webbing and never on the fittings, eyes or sling identification tag.

Never drag web slings on the floor. Protect webbing at all times from corners, edges, protrusions, or abrasive surfaces. Never pull slings out from under a load when the load is resting on the sling. Place blocks under the load prior to setting down the load to allow removal of the web sling. Do not drop web slings with metal end fittings.

Personnel must keep all body parts from between the sling and the load, and from between the sling and the crane/hoist hook. Persons shall never ride the web sling or the load during lifting or while suspended. Persons shall stand clear of all loads while lifting or while suspended. During lifting, with or without the load, personnel must be alert for possible snagging of the load or the web sling.

When not in use, web slings should be stored in a cool, dry and dark place to avoid loss of strength through exposure to ultraviolet (UV) light or weather. Never store web slings in areas that are chemically active. Chemicals can destroy the integrity of web slings in varying degrees that are not always readily apparent upon visual inspection. Never store or use web slings in temperatures above 194° F (90° C) or below minus 40° F (-40° C).

Never attempt to repair a damaged web sling. Replace it immediately. Only Type I and Type II web sling hardware may be reused and then only by a qualified sling manufacturer after inspection.

WINCHES

INSTALLATION: Mount & position the winch so that the latch/pawl drops into the gear sprocket teeth by its own weight. Portable and slider winches must be positioned not to interfere with any other trailer components.

MAINTENANCE: The winch assembly should be protected from corrosion by application of a rust inhibiting paint. Avoid paint build up in the latch/pawl area that may inhibit the free movement of its parts. A light oil should be used to keep these parts moving freely to insure safe operation.

PROPER USE: The loose end of the web assembly should be inserted through the web slot in the winch mandrel and the excess web pulled through. After tensioning, there must be 2-3 full wraps of webbing around the mandrel. Less wraps may result in web slippage. More wraps will cause additional strain to be exerted on the winch assembly and reduce the load capacity of the winch. Cable/wire rope must be used only on winches designed for their use. To use, twist an eye on the end of the cable with at least 2 feet of loose tail. Place the eye over the cable pin on the winch mandrel and tighten the winch, wrapping the cable over the loose tail a minimum of 4 times to secure the cable from slippage.

SAFETY GUIDELINES

All Cargo Control Products cont.

CAUTION: Inspect all strap and winch assembly components prior to each use for damage or deterioration. Remove damaged product from service immediately and replace. Do not attempt to repair. Use extreme caution when tensioning the winch assembly to assure the latch/pawl is fully engaged in the gear sprocket teeth before releasing the pressure on the winch bar. Always keep hands and fingers away from the winch pawl. Always make sure that the load is adequately secured prior to movement of the vehicle using a sufficient quantity of appropriate strength tie downs. Never exceed the Working Load Limit of either the tie down or the hardware/winch. Remember, all assemblies are only as strong as their weakest point, including the point of attachment. All component parts must meet or exceed CVSA guidelines, Federal DOT Regulation, CCMTA regulations as well as local regulations. Tie downs must be checked periodically during transit and re-tensioned as needed to maintain a secure load. Never modify a winch to perform any use other than that for which it was specifically designed. Misuse or modification of any type will result in voiding any or all of the warranty and liability by the manufacturer/seller.

WINCH BARS

PROPER USE: Use extreme caution when tensioning the winch/assembly to assure the latch/pawl is fully engaged in the gear sprocket teeth before releasing the pressure on the winch bar. Always keep hands and fingers away from the winch pawl & keep face, head and body out of path of winch bar.

Inspect all binding components, (winch, strap assembly, chain assembly, loadbinder) prior to each use. Never use damaged or worn equipment. Remove from service and replace with new. Do not attempt to repair. Winch bars are used entirely at the users own risk and the use of a winch bar demonstrates an understanding of the risks and a willingness to accept the consequences of possible property damage, serious personal injury and/or loss of life. When using winch bars with winches: the tapered point of the bar must be inserted completely through both holes in the winch cap. Failure to insert bar correctly could cause the bar to slip and result in serious personal injury and/or loss of life. During tightening and before releasing the tie down assembly, check the winch pawl to insure it has properly engaged the gear sprocket. Always grip the winch bar at the knurled section of the bar for increased safety.

When using winch bar with binders: only use combination winch bars designed with a binder cradle to assist in tightening a load-binder. Insure that the loadbinder handle is fully inserted into the winch bar cradle and locked in place. Keep head and body out of the path of the loadbinder handle in case of slippage or kickback. Failure to do so may result in serious personal injury and/or loss of life.

TOW STRAPS & CHAINS

DANGER: PLEASE READ AND UNDERSTAND ALL OF THESE INSTRUCTIONS PRIOR TO USING ANY Tow Chain or Tow Strap. Towing or recovery of a vehicle presents a very real danger of property damage, serious personal injury and/or loss of life. Never attach fittings that have a strength rating (WLL) less than the assembly to which they are being attached. Insure that the chain or strap is attached to a secure part on both vehicles capable of withstanding the forces involved in towing or recovery. Woven fabric straps store energy that when released could cause a whipping action

and endanger operators and bystanders. Keep all persons away from the vehicles and strap or chain during towing or recovery. USE OF THESE PRODUCTS DEMONSTRATES AN UNDERSTANDING OF THESE WARNINGS AND THE RISKS INVOLVED.

PROPER USE: Tow chains and tow straps are designed for general purpose towing and recovery only. They are not intended to be used for highway towing or for extended periods of time. In these cases, a tow bar is required for safe operation. Tow chains/straps should never be used in a manner where failure of either the chain/strap, attachments or vehicle anchor points could result in personal injury. Keep all persons a safe distance away from all vehicles during a tow or recovery operation.

The Working Load Limit shown in this catalog or on the package or assembly should never be exceeded. This is the maximum safe load that the assembly should ever be exposed to when in a like new condition. Apply tension in a gradual and uniform manner to avoid shock loading the assembly which could cause failure. Be sure that the assembly is not twisted, kinked, or knotted. Never subject the chain or strap to sharp edges as these can damage the chain or even cut the strap. If unavoidable, use caution and pad the area with rubber or similar material (a cut section of tire can be used for this purpose). Inspect all assemblies and attachments prior to use for any visible signs of damage.

The following will reduce the Working Load Limit of the assembly: a.) Tip loading of hooks, twisting, kinks, knots or improper attachments; b.) Deterioration of the assembly or attachments caused by wear, usage, UV degradation, chemicals, acids, corrosion, cuts, abrasions, high heat exposure, misuse or abuse; c.) Impact caused by jerking or snatching. After use, inspect assembly and attachments for any visible signs of damage prior to storage. Clean and store in a cool and dry place, out of direct sunlight, where damage to the assembly or attachments is not likely to occur.

CARGO BARS & LOADLOCKS

WARNING: Failure to understand these instructions and warnings could cause serious personal injury or property damage. Use of these products demonstrates an understanding of these warnings/instructions and the risks involved. Do not use bars to support ANY vertical loads. SmartBars™ and loadlocks are NOT designed to be used as a shoring beam. Using these bars as a step is not advised and could result in serious personal injury. Cargo bars and loadlocks are not designed to secure cargo inside a trailer, only to assist in the stability of a load. SmartBars™ and loadlocks are designed to push out approximately one inch against flexible van trailer walls and can be damaged if used against immovable objects such as door frames. To avoid damaging the bars and trailer, never use more than one hand to close the lever. On the SmartBar™ push handle release button when fully retracted to extend. A stop keeps the bar from sliding open when fully retracted and must be released before operating the lever or the bar can be damaged. To disengage lock, push on handle release tabs.

Trailer Safety Chain Guidelines

Trailer Safety Chains as defined in SAE standard J684 of June, 2004 for trailer couplings, hitches and safety chains - AUTOMOTIVE TYPE:

7.1 Definitions and Purpose - "Safety Chain" is defined as an assembly which provides a secondary means of connection between the rear of the towing vehicle and the front of the trailer (or towed vehicle); it includes link chain and all attaching means. The purpose of Safety Chain is to retain connection between the towing vehicle and trailer in the event of separation of the trailer coupling from the ball of the vehicle or from the hitch, long enough to bring the vehicles to a stop. It should not be construed that safety chains can ensure that vehicle control or connection will be maintained in the event of vehicle incidents such as loss of control, rollover, jackknife, collision, etc.

For the purpose of this section:

- A.** The "hitch" assembly (including ball and ball support platform) is considered part of the towing vehicle.
- B.** The "safety chain" is considered part of the trailer.
- C.** "Attaching means" are defined as the hooks, bolts, anchorages, or other devices used to fasten or connect link chain, or its equivalent, to the trailer tongue and to the rear of the towing vehicle including hitch assembly devices provided for such connection.

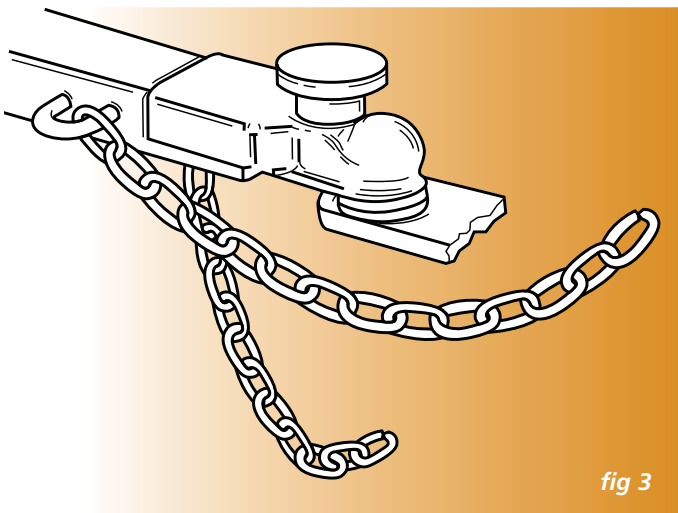

fig 3

7.2 Strength Requirements - Each individual safety chain, and all attaching means, shall meet the minimum breaking force tensile load as indicated in Table 4, and where applicable such load shall be applied in a direction parallel to the trailer's or towing vehicle's longitudinal axis. Any operation performed on the safety chain subsequent to its manufacture shall not reduce its strength below the requirements of Table 4.

Strength Requirements for Safety Chain & Attaching Means*	
Safety Chain or Trailer Classification	Breaking Force - Minimum
Class 1	2000 lbs. (8.9 kN)
Class 2	3500 lbs. (15.6 kN)
Class 3	5000 lbs. (22.2 kN)
Class 4 - The strength rating of each length of safety chain or its equivalent and its attachments shall be equal to or exceed in minimum breaking force the GVWR of the trailer. * When conducting a tensile strength test of a length of chain or equivalent and its attaching means, when the minimum load specified in Table 4 is applied, such load shall be maintained for a minimum of 1 minute.	

Table 4

7.5 Installation

7.5.1 Two safety chains shall be permanently fastened (i.e., bolted, anchored) to the trailer tongue, one on each side. The safety chains shall be connected from the trailer tongue to the hitch assembly or to other towing vehicle members meeting the strength requirements of 7.2.

7.5.2 Safety chain shall be connected to the towing vehicle and trailer so the slack of each length of chain is approximately the same when the vehicles are aligned on a common front to rear centerline. There shall be no more slack than necessary to permit proper turning of the vehicles. The safety chain shall be crossed under the trailer tongue and connected to the hitch assembly or to other towing vehicle members.

NOTE: Crossing the chains under the tongue typically reduces the probability of stressing or breaking the chains when turning. See Figure 3.

7.5.3 Safety chains shall not be attached to the towing vehicle by use of the fasteners that secure the ball to its supporting hitch member, nor shall they be connected directly to any part of the ball.

How to Chose a Safety Chain to Correctly Handle the Load				
Class Designation >>>	CLASS I	CLASS II	CLASS III	CLASS IV
Maximum Load Capacity:	Up to 2,000 lbs. gross trailer wt.	Up to 3,500 lbs. gross trailer wt.	Up to 5,000 lbs. gross trailer wt.	Up to 10,000 lbs. gross trailer wt.
	Up to 200 lbs. gross tongue wt.	Up to 300 lbs. gross tongue wt.	Up to 500 lbs. gross tongue wt.	Up to 1,000 lbs. gross tongue wt.

Warranty:

The goods sold in this catalog are warranted free from defects in workmanship and materials for 12 months from the date of purchase.

Disclaimer of warranties:

No other warranty, express or implied, including the implied warranty of merchantability or fitness for particular purpose, is given and no affirmation of Peerless Industrial Group, by words or action, shall constitute a warranty. Peerless Industrial Group will not pay any claim for labor on any of its products or for delays or damages by reason on their use.

Buyer's Remedies:

Buyer's sole remedy for breach of any warranty is limited exclusively to obtaining, at the discretion of Peerless Industrial Group, either repair or replacement of any product sold hereunder and manufactured by Peerless Industrial Group. In no event shall Peerless Industrial Group be liable for any incidental or consequential damages. Buyer must notify Peerless Industrial Group, in writing, within 10 days of discovery of the alleged defect, if within the warranty period stated above. After receiving authorization from Peerless Industrial Group, product shall be returned to the Peerless Industrial Group plant, transportation prepaid, within 30 days.

Return Goods Policy: Items purchased from this catalog are returnable **ONLY** when pre-authorized by a Peerless Industrial Group Customer Service Representative, who will issue a Return Authorization Number. This number must be displayed **PROMINENTLY** on the return material shipping containers **AND** the carrier's freight bill. **UNAUTHORIZED SHIPMENTS WILL BE REFUSED AND RETURNED AT THE SENDER'S EXPENSE.** All authorized returns must be sent prepaid to Winona, MN, or Clackamas, OR, and are subject to restocking and repackaging charges. Any product not returned in original salable condition will be subject to an additional reconditioning charge.

Claims and Shortages: Peerless is willing to assist you in collecting claims for lost or damaged goods, however we are not responsible for collection of claims or replacement of merchandise. All requests for assistance must be accompanied by a copy of the freight bill noting the shortage or damage and signed by the delivering carrier's driver. All requests made to Peerless Industrial Group must be received within 30 days of date of delivery.

Minimum Invoice: The minimum invoice allowed is \$100. A \$10 charge will be applied to any invoice below this amount.
