

**RATCHET
BINDER
STORAGE
SYSTEMS**

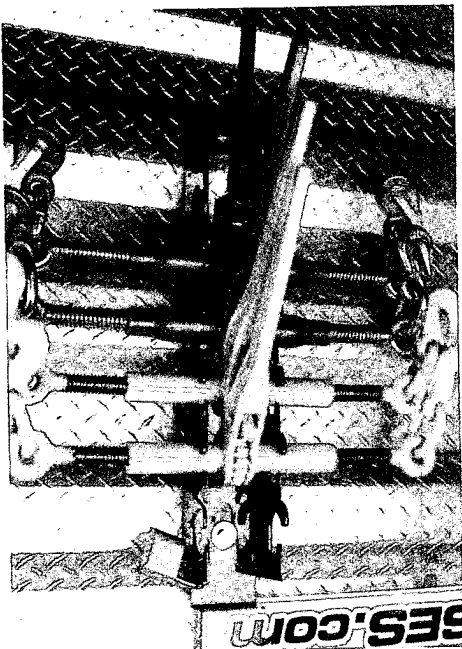

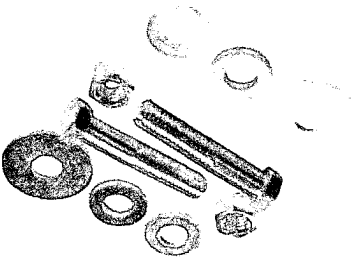

sprangenterprises.com

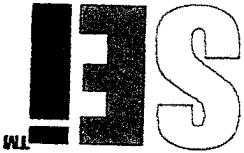

Why do you need storage for your ratchets binders?

- Saves you time and money
- Keeps you organized and lets you get in and out of terminals faster with a secure load
- Horizontal storage position prevents ratchet binder ends from rotating and falling out. No more lost ratchet ends!
- Easily pick up the right size or multiple ratchet binders by the handle and go
- Prevents ratchet binder end rotation, so they stay the same length and ready for use
- Improved safety, no more tripping over ratchet binders laying on the trailer floor
- It's a ratchet binder storage rack system that can be used wherever ratchet binders are utilized, land, sea, air, garage, or shop

Product Features:

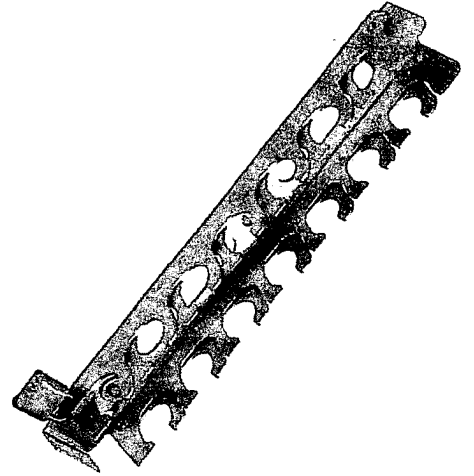

- SEI storage racks can be mounted on trailer bulkheads, back of truck cabs, headache boxes, rolling tarp trailers, side kit trailers or used in the garage or around the shop
- Engineered curved hook design and locking channel keeps the ratchet binders safely in place
- Fits most domestic and import ratchet binders, load binders and chain binders
- The perfect truck trailer or flatbed trailer accessory
- Made of heavy gauge aluminum or powder coated steel
- Two piece construction
- Available in 2 sizes: 24" and 48"
- Fast & easy installation
- Mounting hardware included
- Patent Pending

Is a traditional ratchet binder chain rack just not working for you? Sprang Enterprises Inc. offers a horizontal, lockable ratchet binder rack that prevents ratchet binder ends from rotating and falling out. It's easy to pick up the right size or multiple ratchet binders by the handle and go. Designed by a trucker for truckers, Sprang Enterprises storage racks feature a curved hook design and locking channel to keep ratchet binders safely in place. They can be mounted almost anywhere and hold most domestic and import ratchet binders. The storage racks are available in 24-inch and 48-inch sizes.

Visit sprangenterprises.com or call 330-466-4754.

Having been in the trucking business for 30 years, one of the things that has always aggravated me was losing the ends of my ratchet binders or grabbing a binder to use and one end has about five threads out and the other end is either almost all of the way out or gone. After my first month or so with my new rolling tarp system I realized that the traditional ratchet binder chain rack was not designed to meet my storage needs. So I designed and produced a ratchet binder rack to meet my requirements and realized that other drivers were also looking for ratchet binder storage solutions too! This new rack design allows me to quickly glance at the rack and know where all my binders are and see that each binder end is in place and ready to go. The ratchet binder ends never unscrew in transit and never end up tangled, lost or on the floor for me to trip over. *My steel ratchet binder rack is a safe reliable storage system that saves time and money!*
