Air Brake Hose End Kits & Assemblies

- Meets the requirements of DOT 106 and SAE J1402.
- Swivel Ends reduce residual torque in hose for longer life — No need to disconnect both ends to service the brake system.
- Components in contact with the air are made of corrosion resistant brass and nylon to improve air system life.
- For pre-coated pipe threads, add the prefix “P” to the part number.
- When using with gladhands, add the suffix “B” to the part number to specify a brass barb (item E).

DESCRIPTION	PART NO.
Two End Fittings 3/8" NPTF	31402
Two End Fittings 1/2" NPTF	31403
One End Fitting 3/8" NPTF & One 1/4" NPTF Adapter	31407

Kits Are Not Available for 1/2" I.D. Hose. See page 5 for shop assembled 1/2" hose options.

Installation Procedure

Step 1. Disassemble Kit.

Step 2. Position hose end on SHELL (A) flush with groove (see arrows).

Step 3. Insert FITTING (B) into groove and position SHELL (C) opposite SHELL (A).

Step 4. With assembly in hand, squeeze forward ends of shells and push and twist RING (D) over shells to its final position as shown by arrows.

Step 5. Insert BARB (E) into fitting. (Threaded end of barb should be greased.) Push and turn to start threads. Using a 5/16" hexagon key continue to push and turn until the barb is flush inside the fitting. **NOTE:** Check final assembly visually to insure that hose has not shifted position during assembly.

Coupler 1/2"F x 1/2"F	33018

Hose Assembly Techniques: Low Volume Production Requirements 3/8" I.D. Hose

For relatively low volume production needs the steps illustrated on page 4 may be followed except for the use of a variable speed screw driver with a 5/16" hex bit for step no. 5.

CAUTION: Use very low speed only, and turn only until barb is flush with fitting.

For Shop Production Requirements

TRAMEC has developed the HA300 assembly fixture for users of our Hose End Kits and Bulk Pack Fittings. The fixture can be used to assemble both 3/8" and 1/2" I.D. airbrake hose.

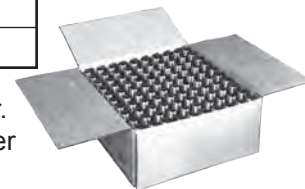

HA 300

Bulk Packaged Hose Fittings

HOSE I.D.	NPTF	PART NO.
3/8"	3/8"	31302
3/8"	1/2"	31303
1/2"	3/8"	31305
1/2"	1/2"	31306

- To order pre-coated pipe threads add prefix "P" to part number.
- When using with gladhands, add the suffix "B" to the part number to specify a brass barb.

Bulk Fittings

Bulk Hose, Dot 106, SAE J1402

**TEV
VALVE**

Trailer Spring Brake Valves

TRAMEC Spring Brake Valves (TEV & STEV Valves) provide trailer spring brake control and gladhand pressure protection as required by DOT 121.

- Prevent Spring Brake Drag
- Use a Single Air Tank — allows the elimination of the protected reservoir
- Small Size is Gentle on Tanks, weigh less than two pounds
- Easy Installation & Conversion from Old Systems
- Fully Compatible with Anti-Lock Systems

TRAILER EMERGENCY VALVE (TEV)

Provides Spring Brake Priority

For Direct Control of Trailer Spring Brakes

The logic of the TEV valve retains the ability of the driver to repeatedly apply and release the Parking/Emergency brakes, even with a damaged tank

Bottom View

DESCRIPTION	PART NO.
TEV Valve Assembly	51301
TEV Valve Rebuild Kit	51305

SENSING TRAILER EMERGENCY VALVE (STEV)

Provides Service Brake Priority

To Assure Adequate Supply Is Available from the Tractor

The logic of the STEV valve assures that the trailer parking brakes will not release before there is sufficient air pressure in the reservoir to apply service brakes.

SONOGRIP® 7-WAY PLUGS

TRAMEC's Patented 7-Way Cable Plugs

1. Stainless steel radial springs and split terminals provide the best long-term connection to receptacle pins.
2. UltraSONIC welding of terminals eliminates corrosion and loosening at the terminal to wire connection.
3. Solid molded elastomeric body and sealants exclude moisture
4. Reinforced Nylon Sleeve provides durability.

SONOGRIP® ABS Heavy Duty Cables

- Our Heavy Duty Urethane XT jacketed cable provides Superior Cut, Tear, and Abrasion resistance
- Provides Excellent Coil Memory retention, even at high temperatures
- Coils Remain Flexible at sub-zero temperatures

180° Connection Screw Terminals	38705	38706

Includes 3850200 gasket

Over-Molded Receptacles

- SAE J560 Style Receptacles
- Made of non-corrosive, reinforced Nylon
- Pins insert-molded to seal out moisture & contaminants
- Wire to pin terminations are sealed in an over-molded “boot”
- Over-mold is bonded to receptacle & cable jacket
- Brass pins are plated for long life
- ABS style (SAE J2394) heavy gage cable (1/8 - 2/10 - 4/12 ga)
- Gaskets (3850200) are pre-applied to the mounting flange

Stop Light Switch

- Meets the requirements of DOT 121
- Brass body resists corrosion
- Rated at a full 24 Amp Load, 12 Volt
- Silver and cadmium contacts for long life and low voltage drop
- Installs with a deep socket
- 1/4"-18 NPTF
- Add Prefix "P" for pre-coated pipe threads

DESCRIPTION	PART NO.
Stop Light Switch	38013
Sealed Stop Light Switch	38053

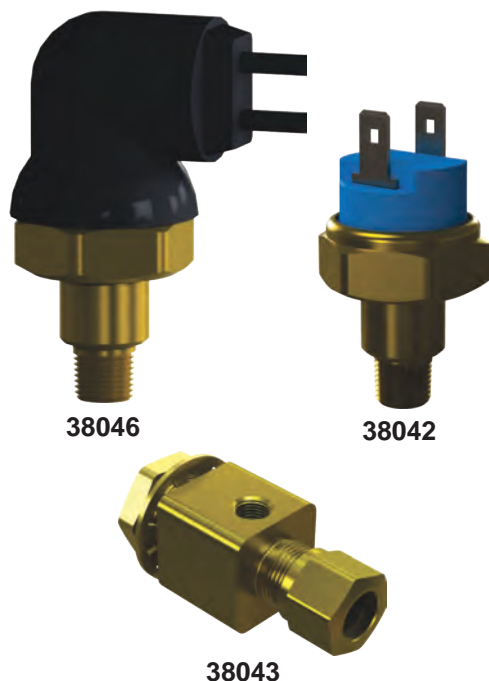

Low Pressure Warning

- Closes at 60 PSI descending pressure
- Brass Body Resists Corrosion
- Rated at 5 amps, 12 volt
- Color Coded — Yellow
- Installs with a deep socket
- 1/8"-27 NPTF
- Add prefix "P" for pre-coated pipe threads

DESCRIPTION	PART NO.
LP Warning Switch, screw terminals	38033
LP Warning Switch, blade terminals	38035

ABS Accessory Switch

- Allows Sharing of the Blue Circuit
- Ensures Full Capacity of Blue Circuit is Delivered to ABS Unit When Vehicle is Rolling Down the Road
- Allows Accessories, that are not needed when driving, to share the Blue Circuit - Rated at 15 Amps, 12 Volt
- 1/8"-27 NPTF

DESCRIPTION	PART NO.
Switch without Boot (.25 Slide Terminals)	38042
Switch with Boot (12 ga. x 24" Wire Leads)	38046
Anchor Tee for ABS Switch, for 1/2" Tubing	38043
Anchor Tee for ABS Switch, for 3/8" Tubing	38044

- 38042 may only be used inside a weather-tight enclosure
- If 38046 is installed exposed to the weather, be sure to use a sealed connection

Rubber hose assemblies are an important part of the air brake system. They deliver air to your air brake chambers as well as other important systems such as lift gates and lift axles. They can be used along the frame rail as well as the primary hook-up between the tractor and trailer. Sloan offers several different styles of air brake hose assemblies in different configurations to suit each individual's needs. Featured in this section of the catalog you will find several different varieties of hose assembly:

- MAXXDuty™ Hose Assemblies
- Standard Hose Assemblies
- Permanent Swivel Hose Assemblies
- Spring Guard Hose Assemblies
- Bulkhead Hose Assemblies
- Transmission Air Shift Assemblies
- Air Compressor Discharge Hose Assemblies
- Point of Sales Displays
- 3-in-1 Wrapped Assemblies
- Artic Flex Hose Assemblies

Specifications:

- Minimum Burst pressure of 900 psi.
- Conforms to SAE 1402 and DOT-106 specifications.
- Maximum operating pressure of 225 psi.
- Operating temperature of -40°F to +200°F.
- Perforated hose cover allows moisture to escape from the reinforcement layer.
- Resistant to gasoline, diesel, oil, and commonly used road chemicals

MAXXDuty™ products are designed to help keep trucks moving, no matter what the conditions. The MAXXDuty line of severe-duty products includes patented, premium quality electrical wire harnesses, gladhands, coiled air lines, and our patent pending coiled electrical 7-way sealed plug and socket system.

This is our MAXXDuty hose assembly. Learn more about its qualities on the next page.

SLOAN DELIVERS

- Patented severe-duty engineering
- Extreme corrosion prevention
- Stands up to harsh weather conditions

MAXXDuty™ Hose Assemblies

- New Plating specifically engineered to fight corrosion.
- Originally developed for naval applications where parts are continuously exposed to salt spray.
- Retains swiveling ability even after long-term exposure to corrosive chemicals.
- Retains rust free finish longer than industry standard hose assemblies.

Coiled Air Assemblies

Sloan Coiled Air Assemblies are manufactured in the USA at our facility in Holland, Michigan, using the highest quality components available. We certify our assemblies to meet FMVSS 571.106 and 593.45 specifications and the individual components all meet the SAE J844, SAE J476 and SAE J246 specifications. Don't take chances – buy certified Sloan Coiled Air and buy American made peace of mind.

Tubing spools are used to create individual coiled assemblies.

The spooled tubing is wrapped on the mandrel to correct working lengths.

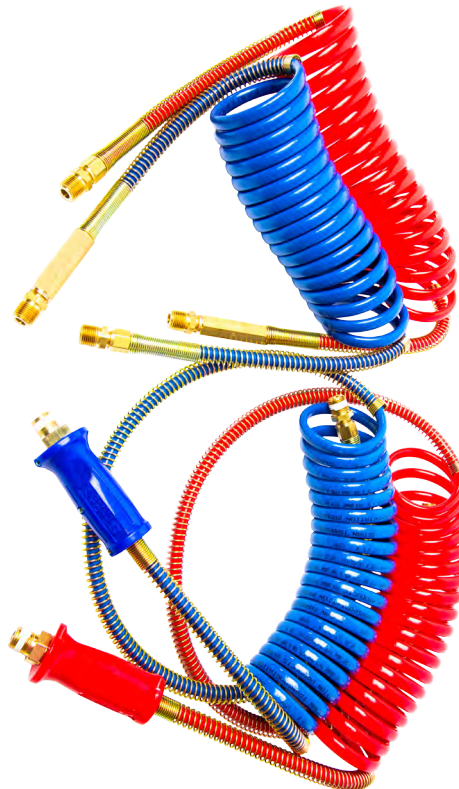

The mandrels that contain the coiled tubing are placed in the ovens to bake so they retain their coil.

The final stage of creating a coiled tubing set is to attach the brass ends.

Sloan is an industry leader in the manufacture and distribution of coiled air. Now offering over 50 different SKU's.

Air Brake Hose - BULK

- Minimum burst pressure of 900 psi
- Conforms to SAE J1402 and DOT-106 specifications
- Maximum operating pressure of 225 psi
- Operating temperature of -40°F to +212°F
- Perforated hose cover allows moisture to escape from the reinforcement layer
- Resistant to gasoline, diesel fuel, oil and commonly used road and cleaning chemicals

Quick-Fix®

- One package will repair two damaged 3/8" rubber air brake lines.
- Available with 3/8" or 1/2" male fittings
 - * For use with 3/8" rubber hose only.
- Includes installation tool.
- Pre-applied thread sealant.
- Packaged in point of purchase display pack.
- Meets DOT 106 SAE J1402 requirements.
- Hose assemblies available with Quick-Fix® ends.

Sloan No.	Description
431402	Individual pack 3/8" fittings (2 assemblies)
431402-12	Box of (12) 3/8" individual packs
431402-100	100 pcs. 3/8" bulk unpackaged (no tool)
431403	Individual pack 1/2" fittings (2 assemblies)

431406	Display with (12) 1/2" individual packs

Quick-Fix Display Rack holds 12 Quick-Fix packages

Go From this...

to this...

using this...

1. Trim hose end. Place one half of plastic case on hose, flush with lock groove.

2. Insert threaded fitting into lock groove.

3. Position remaining plastic case piece over assembly

4. Slide assembly ring to lock position.

5. Using the supplied wrench, insert the greased lock stem, push and turn until flush inside the fitting.

6. Finished assembly is now ready for installation

MAXXDuty Pogo

The ONLY All-In-One Solution Available In The Marketplace

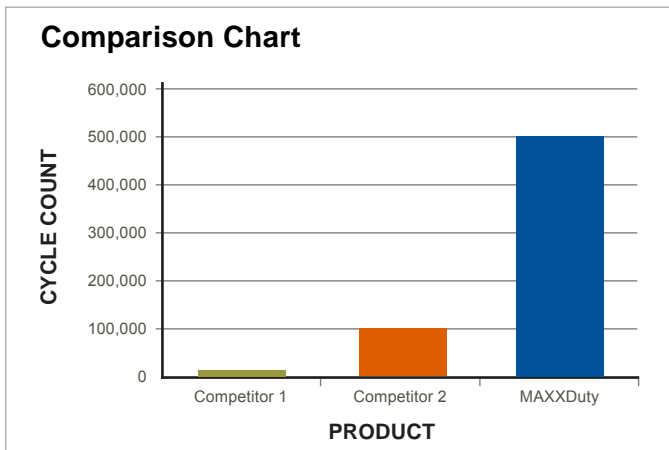

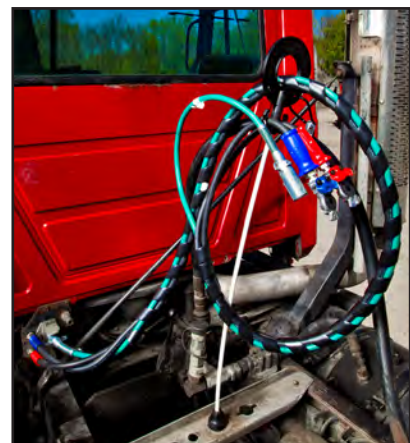

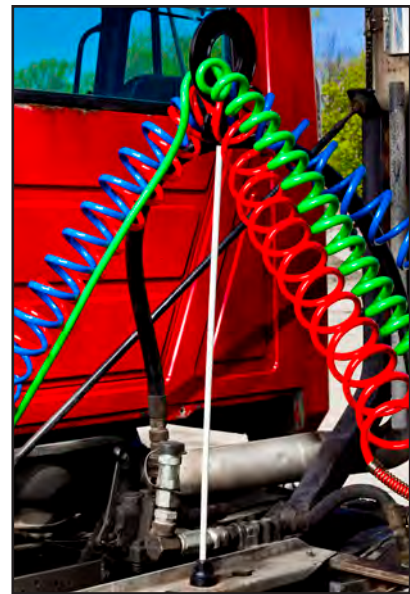

Sloan	
No.	Description
451126	MAXXDuty Pogo Stick 42"
451127	MAXXDuty Pogo Stick 36"
451128	MAXXDuty Pogo Stick 22"
451126D	42" MAXXDuty Pogo With Display Stand

• Display includes a 42" MAXXDuty Pogo, the stand, and a washer and nut that helps secure the pogo to the stand.

- Patented design features an extremely durable, injection molded, glass-filled nylon polymer top and base
- Allows for several attachment options
- Can be used with any heavy-duty line and cable configurations
- Rod is made in the USA of rigid, pultruded fiberglass
- All composite, nylon and fiberglass components are UV resistant
- Internal metal pieces are encapsulated in a protective casing
- Mounting bolt, nut and washer are zinc plated for corrosion resistance
- Ideally suited for Sloan's MAXXDuty 3-in-1 and 4-in-1 wraps

Cycle Comparison

In rigorous cycle testing against competitive products, the Sloan MAXXDuty pogo has proven to outlast traditional spring-supported pogos by as much as 10 times in the harshest conditions with no signs of wear. In testing where traditional pogos wear and fail at 100,000 cycles or less, the innovative design of the MAXXDuty pogo has exceeded half a million cycles under the same conditions without failure.

Heavy Duty Pogo Stick

Features & Benefits

- New thicker gauge heavy duty spring
- New base is over 3 times larger
- Choice of chrome or zinc plated, dichromate steel support arm
- Larger 3.75" diameter housing eliminates spring binding
- Improved packaging. New heavy duty full overlap ECT 44 box
- Swivel arm pivots at base
- Forged steel mounting stud, 7/16-20
- All pogo sticks include eyebolt and nut

MAXXClamp

- Self adjusting one piece clamp resulting in no loose parts which makes for easy installation
- Fast, efficient way to connect and disconnect hoses
- Three different clamping options to best hold your hoses
- One assembly with two pieces that pivot for three different hose diameters with three different positions
- No tools required
- For 3/8" hose only
- Carabiner included
- Patent pending

Hang Your Air & Electrical Lines In 3 Easy Steps Using The MAXXClamp!

Sloan No.	Description
451169	MAXXClamp for 3/8" Hose

STEP 1
Open The MAXXClamp To The Set Position

STEP 2
Place The Service, Emergency, & Electrical Lines In The MAXXClamp

STEP 3
Close The MAXXClamp And Add The Carabiner. Then Hang From Your Spring

Sloan Separator

- Separates air and electrical lines and eliminates the chance of rubbing
- No tool required for installation
- Will not rust or corrode
- Gives the user the chance to create their own "wrap"
- Can be used from the cab to the trailer and also under the trailer
- Safer way of seeing if there are any hose defects by being able to see the lines
- The separator keeps the lines organized and less chance of kinking
- Only available for 3/8" hose
- Recommend one separator for every foot when creating your "wrap"

Sloan No.	Description
451170	Separator for 3/8" Hose

* Standard Pack 5

MAXXGrip Dura-Grip Gladhand Combo

The New MAXXGrip Offers A Revolutionary New Approach To Ensuring Safer And More Complete Connections With Critical Airlines.

Some Of The Benefits Of The New MAXXGrip Include:

- Safer And More Complete Connections
- Integrated Hex At The Base For Ease Of Installation
- Ergonomic Grip Reducing The Chance Of Kinking Airlines And Extending Their Life
- Easier Coupling And Uncoupling With Added Leverage
- Eliminates Potential For Leaking Between Connections
- Constructed Of Durable Die Cast Aluminum With Stainless Steel Wear Plate. Also Available In Powder Coated Red Or Blue.
- Colored Powder Coating Available For Easy Identification

Rapid-Release™ Service Gladhand

- Releases trailer brakes up to 50% faster than standard methods.
- Available in both standard and 37.5° mount.
- Prevents in-city trailer bounce.
- Reduces wear on drums resulting in maintenance savings.
- Meets SAE J318 specifications.
- Includes polyurethane seal.
- Regular equipment on the majority of OEM trailers

Sloan No.	Configuration	Seal Type	Remarks
441175	standard	poly	w/ filter
441176	standard	poly	
441177	angle mount	poly	w/ filter
441178	angle mount	poly	

Rapid-Release™ Service Kit

Sloan No.	Description
451715	Rapid Release Gasket Service Kit -includes gasket, snap ring, and diaphragm

Standard Gladhands

- Constructed of die cast aluminum with stainless steel wear plates.
- Service and Emergency configurations (polarized) or Universal (non-polarized).
- Available with polyurethane color coded seals.

Why Use Gladhands with Polyurethane Seals?

- Polyurethane seals will not crack, tear or dry out like rubber seals.
- Polyurethane seals have a reverse taper-eliminates the possibility of the seal lip folding over.
- Polyurethane seals are available color coded-reduces chance of hookup error.
- Polyurethane seals are pliable in all weather conditions.

with poly protect-o seal

Gladhands with poly protect-o seals help eliminate contaminating particles from entering the air stream. The filter is added for additional air stream protection.

* All Sloan Shut-Off Gladhands include a gasket that is to be mounted between the gladhand base and the trailer. This gasket will help prevent corrosion on the mounting surface between the trailer and the gladhand.

Swing-Away/Shut-off Gladhand™

- Shut-off valve prevents contaminants from entering the system.
- Eliminates the need for a dummy coupler.
- Decreases plumbing hardware and speeds installation time.

Swing-Away Gladhands

- Provides the lowest projection height from "trailer skin".
- Eliminates the need to "twist" hoses to obtain gladhand retraction.
- 180° swivel designed elbow permits optional air line entry from either the bottom or back port.
- Eliminates expensive swivel type hoses and permits the use of inexpensive nylon reinforced tubing.
- Gladhand bracket prevents foreign particles and insects from entering air lines while trailer is not in use.
- Bottom Port - 3/8"-18 NPTF
- Back Port - 3/8"-18 NPTF

Sloan Air Tanks have you covered – literally inside and out. You probably already knew that Sloan meets the SAE J10 Specification for Air Brake Reservoirs. However did you also know that Sloan employs an advanced 3-Step Exterior finishing process and a new industry leading Interior finish to help you fight CORROSION? Our Exterior finish has passed 250+ hours of testing to the ASTM B117-95 Salt Spray standard; the requirement in SAE J10 is 48 hours. Our new Interior corrosion protection strategy was adapted from marine and military applications and features a self-healing barrier that not only passes the same 250+ hours of ASTM B117-95 testing, but also meets the stringent military spec MIL-PRF-16173 Grade 2. Sloan Air Tanks when paired with a Sloan drain valve can ensure years of trouble free operation.

Tank Specifications:

7" Diameter	800 in ³ (3.46 gallons)
8" Diameter	1425 in ³ (6.16 gallons)
9.5" Diameter	1488 in ³ (6.44 gallons)
12" Diameter	2850 in ³ (12.34 gallons)
12" Diameter (Special)	4400 in ³ (19.05 gallons)

Specifications:

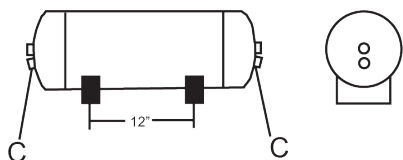

- 150 PSI Working Pressure
- All ports are NPT
- Meets and Exceeds all SAE J10B Specifications

Air Tanks

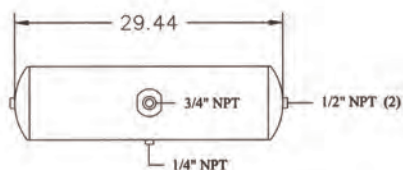

Air Tanks

- 150 PSI working pressure.
- Threaded ports are standard NPT.
- Conforms to SAE J10B specifications.

Drain Valves

- Cable or ring operates drain valve from any direction.
- Low profile drain valve design reduces chance of breakage.
- Automatically closes upon release of cable or ring.

Sloan No.	Description
401045	1/4" NPTF valve w/48" cable
401046	1/4" NPTF valve w/60" cable
401047	1/4" NPTF valve w/62" open end cable w/crimp
401070	1/4" NPTF valve only
401075	1/4" NPTF valve w/ (1) ring only
401729	cable only (sold by the ft.)
401730	crimp sleeve

Low Profile Drain Valve

Sloan No.	Description
401086	1/4" NPTF valve w/60" closed end cable
401094	1/4" NPTF valve w/60" open end cable
401095	1/4" NPTF valve w/48" closed end cable

Air Tank Safety Valve

- Prohibits system pressure from exceeding 150 psi.
- Won't bind in any position.
- Rate of flow 12 cfm at 150 psi.

Sloan No.	Thread Type
401004	1/4-18 NPTF
401005	3/8-18 NPTF
401315	M-22 Thread

Drain Cocks

- Withstands up to 150 psi working pressure.
- Constructed of durable brass.

Selector Valves

- Maximum operating pressure 30 psi.
- Panel or bracket mounting.
- Operating temperature of -40°F to +180°F.
- Available "click" mechanism assures proper porting selection by sound and feel.
- Recommended for operation in diesel, gasoline, oil, water, air and detergent systems.

3-Way Selector

Sloan No.	Style	Pipe Thread	*Stem Length
SV406P-4	w/o click	1/4	1-3/8
SVC406P-4	w/ click	1/4	1-3/8
SV406P-6	w/o click	3/8	1-3/8
SVC406P-6	w/ click	3/8	1-3/8

* Measured from top of bracket to underside of handle.

4-Way Selector

Sloan No.	Style	Pipe Thread	*Stem Length
SV407P-4	w/o click	1/4	1-3/8

SVC407P-6	w/ click	3/8	1-3/8

* Measured from top of bracket to underside of handle.

Ball Valves

- Double o-ring seal.
- Forged brass body.
- Chrome plated brass ball.
- Superior performance in a variety of applications.

Sloan No.	Pipe Thread
SV500P-4	1/4
SV500P-6	3/8
SV500P-8	1/2

We take pride with the high quality of our brass fittings. We use the highest quality material with your safety in mind. Some of the brass fittings are American made, formed in Michigan and turned and Bucyrus, Ohio. American Quality Made To Last.

We carry the following types of brass fittings:

- Quick Connect Brass
- Quick Connect Composite Fittings
- Rubber Hose Reusable Fittings
- Nylon Fittings
- Compression Fittings
- Transmission Shift Fittings
- Pipe Fittings
- Hose Barb Fittings
- Push-On Fittings
- Inverted Flare Fittings
- 45° Flare Fittings
- Copper Fittings
- Terminal Bolts

Dash Control Valves

- Precision engineered and manufactured to provide optimum performance for each specified application.
- All brass construction for years of dependable, trouble-free operation.
- All units supplied without knob and roll pin except p/n 401134 & 401135.
- New construction, not remanufactured.
- Supplied with mounting nut.

PP-1 Style Control Valve

Sloan	
No.	Description
401134	Commonly used to control parking and emergency brakes. Automatic pressure release 20 PSI. Stem diameter .377".
401135	Same as 401134 except automatic pressure release is 40 PSI.

- 401134 & 401135 come with knob and roll pin.

1/8" PT
All Ports

PP-2 Style Control Valve

Sloan	
No.	Description
401178	Commonly used to control parking and emergency brakes. Automatic pressure release 40 PSI. Stem diameter .377".

1/8" PT
All Ports

PP-5 Style Control Valve

Sloan	
No.	Description
401180	Used in conjunction with vehicle torque converter, engine speed control system, and some parking brake systems. 40 PSI release pressure.

1/8" PT
All Ports

PP-7 Style Trailer Supply Valve

Sloan	
No.	Description
401136	Generally used on tractors and provides modulated control on trailer brakes. Automatic pressure release 40 PSI. Stem diameter .377".
401137	Same as 401136 except with 1/4" NPTF threaded exhaust port. Stem diameter .50"

1/8" PT Supply
1/4" PT Delivery
1/8" PT Control

PP-8 Push Pull Valve

- Pressure release at 20 psi

Sloan No.	Supply Port	Delivery Port	Exhaust Port
401209	(1) 1/8"	(2) 1/8"	(1) 1/8"

Tractor Trailer Park Valve w/ 2-Way Check Valve

Sloan No.	Description
401029	2-Way check valve allows either primary or secondary air supply to operate spring brakes on tractor and/or trailer combinations. Stem diameter .377".
401084	Same as 401029 except with barbed fitting exhaust port for 1/2" nylon tubing.

1/4"-18 NPTF
All Ports

System Park Valve

Sloan No.	Description
401035	Valve is used to control spring brakes on both tractor trailer. Automatically applies when pressure drops below 35 PSI Pull to exhaust. Push to supply. Stem diameter .377".

1/4"-18 NPTF
All Ports
(401035)

Tractor Trailer Air Supply Valve

Sloan No.	Description
401032	Valve is used to control the tractor protection valve and the charge trailer system. Pull to exhaust. Push to supply. Stem diameter .314".

1/4"-18 NPTF
All Ports

Toggle Type Valve

Sloan No.	Description
401040	Brass constructed valve is used to control the tractor protection valve, front wheel brake limiting control and for inter-axle differential lock-out control. Chrome plated lever. Replaces Bendix TW-1. Face plate not included.

1/8"-27 NPTF
All Ports

401280	3/8"	(2) 1/4"	3/8 - No Thread	1.0 PSI

Inline Quick Release Valve

- Rapidly releases air pressure from trailer brake lines.
- Faster release of trailer service brakes when installed on service side gladhand.
- Quicker application of trailer service brakes when installed on the emergency side gladhand.
- Can be used on double and triple trailers.
- Measures 1.5" diameter x 3.5" long.
- Flow Rate:
Forward - 9.0 SCFM at 2 PSI
Exhaust - 8.0 SCFM at 2 PSI

D-2 Air Governor

Working in conjunction with the compressor unloader valve, the governor controls air pressure in the supply system automatically by maintaining the level of air between the adjustable opening and closing preset pressure settings.

- Replaces Bendix D2, Midland KN18530 and other popular air governors.
- Can be remote or compressor mounted.
- Manually adjustable opening and closing settings.
- Internal ball check and filtered ports help reduce contamination.
- 150 psi maximum operating pressure.
- Includes mounting gasket and (4) 1/8" socket head pipe plugs.
- Mounting holes on 1-1/8" centers.
- 401237 is a high temperature governor w/ high temp o-rings and waterproof cover.

Sloan No.	Port Size	Cut In Press.	Cut Out Press.

Lift Axle Control Module

The Sloan Lift Axle Control Module is supplied ready for installation. It is designed to control the raising and lowering of a lift axle by inflating and deflating the air bags all done electronically. The module incorporates a 4-way valve, regulator, DOT cartridge push-in fittings, automatic solenoid, and air gauge.

- Designed to reduce assembly time and errors current lift axle circuitries present.
- Reduces use of parts by 50% compared to current lift axle circuitries.
- Protected exhaust ports.
- DOT Cartridge push-in fittings.
- Temperature rating of -40°F to 160°F.
- SAE J1128 and IP65 compliant.
- Solenoid rated for 9-16 VDC

Sloan No.	Description
401138	Axle normally down - w/gauge
401139	Axle normally down - w/o gauge
401140*	Axle normally up - w/gauge
401141*	Axle normally up - w/o gauge
401777	Replacement solenoid
401778	Replacement gauge

* Both solenoid and regulator are on the left side

401777

See pages 234 and 235 for installation diagrams

Pressure Protection Valves

- Protects primary air source against loss of air pressure downstream.
- Designed for in-tank mounting on tanks with dual outlet ports.

Rapid Dump Air Suspension Valve

- Replaces Bendix TR-3, SV-1 and Humphrey 250A N/O valves.
- Pilot operated.
- Rapidly exhausts air from suspension air springs.
- Mounts on frame rails using 1/4" mounting holes.
- Dual delivery design allows for convenient in-line plumbing of air spring lines and eliminates need for tee fittings.

Sloan No.	Port Size	Mtg. Hole Dia.
401148	(4) 1/8 FPT	1/4

Air/Air-Electric Toggle/Flipper Valves

- Used for a variety of air and air-electric applications such as air suspensions, lift axles, fifth wheel sliders and differential locks.
- Push-connect fittings mate easily with 1/4" nylon tubing.
- 150 PSI max. operating pressure.
- Includes all necessary mounting hardware.
- Air-electric switches include a pressure switch and terminals for indicator lamps.
- Switch Off Position: No air flow, electrical contacts open.
- Switch On Position: Air flows through valve, electrical contacts closed.
- Pressure Switch: Open below 10 PSI, closed above 35 PSI.
- Amperage: 5 amp resistive current load at 12 VDC.
- Terminal Size: 1/4" blade.

Height/Lumbar Control Seat Valves

- Controls air ride truck seats and lumbar supports.
- Electro-pneumatic combination valve designed to operate air seats using an electric air compressor.
- Spring-loaded, three way function.

401147

401150

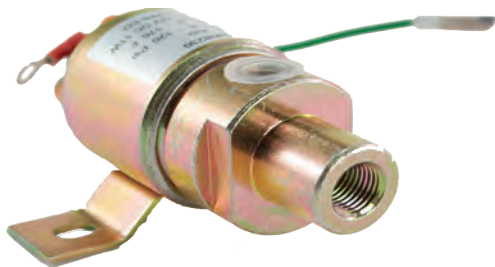

401149

401151

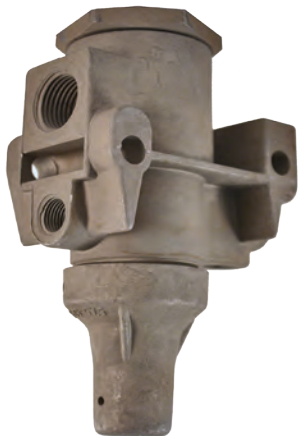

Sloan No.	Description	Port Size
401147	End and side ported with removable chrome knob	(2) 1/8 FPT
401149	Paddle Type	(2) 3/16 barb
401150	End ported with removable chrome knob	(2) 1/8 FPT
401151	Electro-Pneumatic with removable black knob and two 1/4" blade terminals	(1) 1/8 FPT

Three-Way Solenoid Valve

- 12 VDC
- On/off exhaust function
- Inlet port normally closed

Sloan No.	Port Size	Operating Pressure
401190	(2) 1/4 FPT	100-120 PSI

Filter Assembly

- Replaces Eaton/Fuller A4740

Sloan No.	Supply Port	Delivery Port	PSI
401304	(1) 3/8"	(3) 1/8"	55-65 psi

Heavy Duty 4 Way, 3 Position Air Valve

This 3 position detented spool allows for adjusting linkage without shutting off air pressure. Center position blocks air at valve while opening both cylinder ports to atmosphere.

Sloan	
No.	Description
401261	5/8" dia. mounting hole required

4 Way, 2 Position Air Valve

- 1/2" dia. mounting hole required

Sloan	
No.	Description
401262	For double acting cylinders, includes tailgate faceplate

4 Way, 2 Position Solenoid Valve

- 5 ports 1/4" NPT
- Manual operation override button

Sloan	
No.	Description
401263	With 2 foot 12 volt lead and (2) 1/4" breathers

See pages 234 and 235 for installation diagrams

Exhaust Mufflers

Sloan	
No.	Description
401747	1/8" Exhaust Muffler
401748	1/4" Exhaust Muffler
401749	3/8" Exhaust Muffler

Low Pressure Switch

- 12 or 24 Volt
- 1/8" NPT
- Circuit normally open at 0 pressure

Sloan	
No.	Description
401238	Actuates at 55 psi
401239	Actuates at 66 psi

Service Circuit Stoplight Switch

- 12 or 24 Volt
- 1/4" NPT
- Actuates at 3-5 psi

Sloan	
No.	Description
401240	Circuit normally opens at 0 pressure

Trailer Emergency Stoplight Switch

- 12 or 24 Volt
- 1/8" NPT
- Single pole - double throw
- Actuates at 55 psi

Sloan	
No.	Description
401241	Circuit normally one open and one closed

LP-3 Low Pressure Indicator

- Normally closed - 0 psi
- Opens at 60 psi

Sloan	
No.	Description
401214	1/4" Single Terminal
401215	1/4" Double Terminal

MAXXDuty LED Lights

MAXXDuty LED Lights are proudly made in the USA and checked against the highest quality standards with over 1.5 million BoardFree® products on the road performing in every condition across North America.

- **ABS - Acrylic Construction**
 - High Impact Strength
 - Resistance to Harsh Chemicals
 - Inherent UV Stability
- **Slotted Holes for Low Stress Mounting**
- **Greased Connector**
- **Meets Highway Vehicle Lighting Standards for Rear Stop, Tail and Turn**
SAE: S2/T2

Sloan MAXXDuty LED Features and Benefits

BOARDFREE TECHNOLOGY

- Superior Durability and Impact Composite Construction
- Natural UV Resistant Material
- Slotted Hold for Low Stress Mounting
- Lowest Profile in the Industry
- Two Shot Construction of Lens and Structure
- High Efficiency Optical Design
- Submersible
- Eliminates the Need for Grommets

7-Way Sockets

- Brass contact pin screws - will not cut copper wires.
- Built-in receptacle "ledge" - for plug/cable support - relieves strain on contact pins and plug bushings - also reduces chance of flickering - no lights - from plug drop-out on trailers.
- Splash-proof lid design - overlap design prevents water spray - no need for gaskets.
- Indexed and lock pin with "floating" design for easy plug engagement prevents contact pin bending.
- Partitioned insert design reduces chances of wire shorts.
- Each terminal clearly marked to insure correct circuit wiring.
- Heavy duty insert anchor screws.

Zinc Die-Cast and Nylon

Sloan No.	Description
421015	Split pin, side entry terminal
421119	Solid pin, rear entry terminal
421121	Solid pin, rear bullet entry terminal

Standard 7-Way Plug

- Meets SAE J560.
- Center clamp for "Bear-Bite" cable grips to prevent cable pull-out. Provides for easy deliberate plug push-in and pull-out.
- Fully interchangeable with SAE Compliant, 7-way connectors.
- Heavy duty brass insert wire retainer screws.

Zinc Die Cast

Sloan No.	Description
421000	Plug assembly without spring
421001	Plug assembly with spring
421177	Plug assembly with spring (single grip)

Glass Filled Nylon

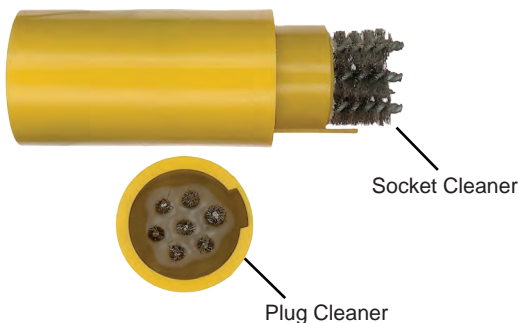

Sloan No.	Description
421147	Plug assembly with spring
421148	Plug assembly without spring

7-Way Plug ISO Zinc Die Cast

422328	6-Port Junction Box, 10-stud	D
422329	Sealed Multi-Port Junction Box, 20-stud assembly	E
422634	With 7 post wire connections and fastener hardware	F
422635	With circuit breaker bracket, circuit breakers not included	G

7-Way Circuit Inspector

Sloan No.	Description
421758	Instantly finds and repairs short or faulty circuits in the shop or on the road. Comes with protective nylon case.

Coiled and Straight Cable with 7-Way Plug

- Large connector finger grips for easy disconnection.
- Connector pins are double crimped for maximum durability.
- Plugs meet SAE J560.

Heavy duty SAE J2394 construction designed for use on ABS systems where either the #4 red stop lamp circuit or #7 blue circuit are used. Recommended for all ABS applications.

ElectraPlus 7-Way Coiled Cable w/ Metal Plugs ABS - Green Jacket

Sloan No.	Working Length	Description
421129	12'	(2) 12" leads, (2) metal plugs
421130	15'	(2) 12" leads, (2) metal plugs
421155	15'	(1) 12" lead, (1) 40" lead, (2) metal plugs
421204	20'	(2) 12" leads, (2) metal plugs
421205	15'	(1) 12" lead, (1) 72" lead, (2) metal plugs
421206	20'	(1) 12" lead, (1) 72" lead, (2) metal plugs

Sloan No.	Working Length	Description
421164	12'	Straight
421165	15'	Straight

Single and Double Pole Coiled Cable with Plugs

- 4 gauge fine strand copper wire.
- Flexible to temperatures to -85°F (-65°C)
- Jacket is resistant to gasoline, diesel fuel and commonly used chemicals.
- Maximum current carrying capacity 200 amps for 12 volt intermittent liftgate use.

Sloan No.	Working Length	Description	Usage
421145	12'	(2) 12" leads, (2) single pole plugs w/spring	Lift gate
421146	15'	(2) 12" leads, (2) single pole plugs w/spring	and remote
421172	12'	(2) 12" leads, (2) double pole plugs w/spring	charging
421173	15'	(2) 12" leads, (2) double pole plugs w/spring	applications
421236	15'	(1) 12" lead, (1) 40" lead, (2) Single pole plugs	

6-Way Coiled Cable (6-14GA)

Sloan No.	Working Length	Description

7-Way RV Plugs

- Thermoplastic material eliminates rusting, poor appearance and difficulty in plug removal.
- Blade type pin.
- Dual grips for easy plug removal.

Sloan No.	Description
421137	Heavy Duty 7-Way plug for RV (trailer end)

7-Way RV Sockets

- Thermoplastic material.
- Blade type pin.

Sloan No.	Description
421138	Heavy Duty 7-Way socket for RV (car end)

5-Way Plug Chrome Plated

Sloan No.	Description
421133	Plug assembly without spring

4-Way Plug Chrome Plated

Sloan No.	Description
421131	Plug assembly without spring

Connector Adapter

- Allows one vehicle to tow either campers or boats.
- Connects ground, L.T., R.T., and stop circuits.
- Quick and easy to connect.
- Full length plug shell ensures positive latching.
- Non-corrosive nylon shell and insert.
- Eliminate makeshift jumpers.

Sloan No.	Description
421139	Converts 7-way blade to 4-way molded connector.

5-Way Sockets - Chrome Plated

Sloan No.	Description
421134	Split pin, 2 hole mount, chrome plated

4-Way Sockets - Chrome Plated

Sloan No.	Description
421132	Split pin, 2 hole mount, chrome plated

*Note: Not interchangeable with plugs 421174, 421175, and 421176.

Primary Type GPT Hook-up Wire

- GPT-type primary wire is the most widely used general purpose wire used by O.E.M.'s and re-wiring accessory installers.
- Constructed with soft annealed, flexible stranded copper.
- Insulated with high quality PVC thermoplastic.
- Meets SAE J1128 Type GPT.

Jacketed Parallel Primary Wire - Type GPT

- Thermoplastic insulated wires are jacketed with a tough grey PVC jacket.
- Parallel construction is common for use with trailers and vehicles where space is limited.
- Meets J1128 type GPT.

Sloan No.	AWG Size	No. of Conductors	Stranding	Nom. Cable O.D. (Inches)	Colors	Length
422240	14	2	19	.163 x .286	BN W	250'

300 Volt Portable Power Cable - Type SJE00-WA

- Greater mechanical strength, lighter weight, more resistant to low temperatures, heat, aging, abrasion, chemicals, oil, ozone and water.
- Temperature rating is from -70°C to +105°C.
- Meets UL, CSA and OSHA standards.

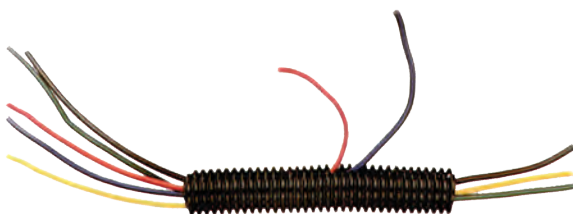

Sloan No.	AWG Size	No. of Conductors	Bare Cu Stranding	Conductor *Ampacity	Nom. O.D. (Inches)	Length
422271	14	2	41 x 30	18	.339	250'
422272	14	3	41 x 30	15	.360	250'

*Ampacity ratings are based on copper conductor temp. at 90°C and ambient temp. at 40°C.

Polyethylene Split Loom

- Split seam feature allows for easy wire insertion and service.
- Excellent for high-heat, high-abrasion, flexible applications. UV stabilized.
- Will not support combustion.

Crimp 'N Seal® Waterproof Heat Shrink Connectors

- Crimp 'N Seal® waterproof connectors provide an environmental seal.
- Tough polymer jacket shrinks while simultaneously activating the adhesive in the tubing to completely encapsulate the connection.

Easy Installation Steps:

1. STRIP

2. CRIMP

3. HEAT

Accessories Available:

CRIMP 'N SEAL® Splice Kit

422212 Kit Includes:

- 422200 Crimping Tool
- 15 422015 Red Splices
- 25 422016 Blue Splices
- 10 422017 Yellow Splices

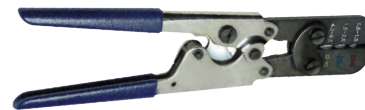

CRIMP 'N SEAL® Wiring Kit

422213 Kit Includes:

- 422199 Crimping Tool
- 80 piece assortment of most popular rings, forks & quick disconnect terminals.

CONTROLLED-CYCLE Crimping Tool

422720*	Cool-Seal 22-18 Ga. Butt Splice
422721*	Cool-Seal 16-14 Ga. Butt Splice
422722*	Cool-Seal 12-10 Ga. Butt Splice

*Standard Pack Of 100

A Heat-Less/Solderless Connection

Simply strip the wire and crimp, activating the sealant, to create an environmentally sealed connection. Requiring no heat, the Cool Seal will reduce overall costs by eliminating the need for torches or heat guns reducing the installation time, and improving productivity.

Silicone Self-Fusing Tape

Silicone Self-Fusing Tape is an advanced line of electrical connectivity products. It is ideal for almost any application requiring a water proof seal and can even be applied underwater. Typical usages include marine connections, battery terminals, automotive hose systems, color coding, garden hoses, outside plant cable splices and grip enhancements.

Sloan No.	Description
421808	Silicone Self-Fusing Tape, Red, 1" x 20'
421809	Silicone Self-Fusing Tape, Black, 1" x 20'
421810	Silicone Self-Fusing Tape, Blue, 1" x 20'

Benefits

- Revolutionary Alternative to Heat Shrink Tubing
- Forms a Permanent Moisture Tight Seal
- No Adhesive Residue Upon Removal
- Self Fusing and Begins Curing Immediately
- Can Be Applied Underwater
- Ideal for High Temperature Applications

Heavy Wall Heat Shrink Tubing

- This FR grade tubing meets MIL Spec. 23053/15 rigid requirements for flame retardancy. This level of performance is now a requirement in many areas of the transportation industry.
- The tubing has a 3 to 1 shrink ratio. Application of heat causes an adhesive liner to melt as the tubing shrinks, forming intimate contact with all underlying surfaces and voids. This yields a watertight seal suitable for above and underground applications.
- The FR tubing is recommended for insulating splices and terminations. It is UL listed under the 486 D standard and meets CSA certification requirements.

Sloan No.	Length	I.D.	Color	Wire Range	Max. Wall Thickness

422597	48"	1.10	red	2-4/0	.080

Thin Wall Heat Shrink Tubing

- Thin wall heat shrink tubing is opaque tubing with a 2 to 1 shrink ratio. It can be used as electrical insulation over cable splices and terminations, and for wire harness covering, bundling and wire marker identification. It may also be easily assembled over components, connectors or other irregular shapes.
- Thin wall tubing products meet or exceed the requirements of MIL-1-23053D/5, Class I, II, and III, AMS 3636C and AMS 3637B, are UL recognized, and CSA certified.

Sloan No.	Length	I.D.	Color	Wire Range	Max. Wall Thickness

422593	6"	.250	blue	16-14	.047
422594	6"	.312	yellow	12-10	.050

Dual Wall Heat Shrink Tubing

- Polyolefin tubing can be used for sealing splices and terminals. In addition to weather proofing your connection, it also provides strain relief and vibration resistance.
- Dual wall is an economical alternative to heavy wall tubing in light duty applications.

Sloan No.	Length	I.D.	Color	Wire Range	Max. Wall Thickness
422598	6"	.187	black	20-14	.040

Heavy Duty Cable Cutters

- Machined blade surfaces eliminate nicking and binding.
- Precision edge design provides for easy cutting.

Sloan No.	Description	Length	Weight
422204	Cable cutter, 350 MCM maximum	16-1/2"	3.5 LBS.
422209•	Compact cable cutter, 2/0 maximum	7-3/8"	12 OZ.

Professional Crimping Tool

Sloan No.	Description	Length	Weight
422207	Crimp tool for battery terminals, lugs and connectors cable sizes 8 thru 4/0.	25"	5.9 LBS.

- Compound action exerts maximum force for fast, reliable crimps.
- One screw adjustment provides easy calibration to compensate for die wear.
- Diamond shape crimp compresses all strands together to form a solid mass of copper, assuring a low resistance connection.
- Quick release lever allows tool to open at any time.

Crimp 'N Seal® Waterproof Wiring Kit

Sloan No.	Description
422213	80 piece assortment of most popular rings, forks and quick disconnect terminals. Includes 422199 multi-purpose tool.

Crimp 'N Seal® Waterproof Wiring Kit

Aluminum Fuel Caps

- Attractive and durable aluminum castings.
- Safety venting features:
 - high capacity pressure relief (5-10 psig)
 - high capacity thermal relief (225°-235°F)
- Special compound gasket for tight seal.
- 12" chain and cross-bar combination prevent loss of cap while refueling.

2" Dia. Aluminum Fuel Caps (Female Thread)

Same suffix indicates same keying.

2" Dia. Aluminum Fuel Cap (Female Thread)

Sloan No.	Measurement Across Threads	Cross-Bar Length	Thread Type	Lock	Venting
431154	2.3"	4-1/2"	11-1/2 NPSM	No	Non-Vented

• Attractive and durable aluminum castings.

• 10" chain and cross-bar combination prevent loss of cap while refueling

Brass Fuel Caps

- All brass castings for years of corrosion-free performance.
- Fusible elements, in case of fire, melt at 190°F.
- Quality locking feature maintains secure fastening of fuel tank cap to tank.
- All locking caps provided with two keys.
- Available vented or non-vented.
- 8.5" chain and cross-bar combination prevent loss of cap while refueling.
- Most vehicles built before October 1985 have non-vented fuel tanks. Because of the possibility of vapor lock, non-vented fuel caps should not be installed on them.

Diesel Fuel Tank Anti-Siphon Devices

- Anti-Siphons are guaranteed for the life of the fuel tank they are installed in.
- Made in the USA.
- Light weight and easy to install.
- Extremely secure.
- Measurements are from the I.D. of the filler neck.
- Does not restrict the flow of fuel into the tank.
- Stops fuel theft at the source.

Volvo, Mack, International Models

Sloan P/N	I.D.	Length
431151*	1.875"	7.5"
431146	2.5"	6.75"
431145	3.0"	7.0"

*Fits reefer and medium duty models.

Kenworth Models

4" Fuel Filler Necks

Sloan P/N	I.D.	Length
431152	4.0"	9.0"

Note:

Freightliner Class 8 Trucks are 2-1/4" ID.
 Volvo, Mack, and International are either 2.5" or 3".
 Sterling's are 2-1/4" or 3".
 Medium Duty Class 7 International's are usually 1-7/8".
 Freightliner (M2's) are 2".
 Reefer Tanks are 1-7/8".
 Diesel Tanks Only!

Adjustable Filler Caps

- Creates a positive seal that cannot be bounced or jarred loose.
- Tight seal virtually locks out dirt, rust and other engine damaging matter.
- Available in a variety of standard sizes.
- Special optional features include chain, plastic low clearance handles, and shrouded caps.

Fig. E

How It Works:

As the handle is turned clockwise, the bottom plate moves upward. This action causes the grooved rubber body to expand, completing a firm, positive, airtight seal. Release with a simple, counter-clockwise turn of the handle.

Universal Lock-N-Seal™ Oil Dipstick Tube & Assembly

- Adapts to 3/8", 1/2" or 3/4" O.D. tubes by cutting off, if necessary, a portion of the current tube and attaching the assembly to a steel tube with the fittings provided.
- Provides a leak-proof seal that will not jar loose or pop out of tube.
- Engine Oil Dipstick replacement - Genuine OEM replacement.
- Fits most makes and models.

Water Pump Trouble Shooting Tips:

Water pump bearing and shaft failures are predominately caused by one or more of the following circumstances:

- **Shaft and Fan are out of square:**

It is extremely important that the fan is mounted square to the center line of the shaft. If it is not square, the fan will wobble, causing vibrations to develop. This is particularly important where shaft spacers are used to move the fan closer to the radiator. The mounting bolts, if not properly torqued, will cause the fan to be tilted and may result in permanent deformation of the spacer.
- **Defective fan unit:**

Relatively minor fan defects can magnify strain on the water pump shaft at 3000 to 5000 RPM. A small piece of missing fan blade can result in tremendous undesirable centrifugal force. Fatigue cracks near the rivets can cause blade shift or vibration. Bent fan blades can cause severe load problems.
- **Fatigued Pulleys:**

Damaging vibration can result from bent or cracked pulleys. This usually occurs when a pulley is improperly handled or installed.
- **Overtightening of Fan Belt:**

An overtightened fan belt can overload the bearing, resulting in shorter than ordinary fatigue life. It also causes bending of the shaft. Sudden acceleration cause large unbalanced loads, excessive shaft bending and early shaft failure.
- **Excessive Acceleration:**

Rapid engine acceleration, particularly in low gear during quick get-aways, place heavy overloads in the bearing. Any minor imbalance can be amplified during rapid acceleration and high speeds, which can result in severe whipping action and sudden fractures.
- **Shaft failure**

Examination of a failed water pump shaft will reveal the possible cause of failure. Discoloration around the fracture indicates high temperatures most likely caused by centrifugal forces due to shaft imbalance. A small amount of imbalance can result in tremendous strain on the shaft at operating RPM's. The overload is focused at one section of the shaft and ultimately the shaft will snap. Lack of discoloration at the break indicates minimal heat build up occurred before a catastrophic vibratory overload of the shaft causes a clean fracture. Rapid acceleration of the engine combined with imbalance in the shaft is the cause. Small vibrations are amplified during rapid acceleration and combined with other engine vibrations can result in a shaft fracture.

Important Water Pump Information:

Water pumps are an important part of total engine health. With the new EPA emission regulations they have become more important. Under hood engine temperatures have steadily been increasing for the last decade and will continue to increase with the implementation of more strict emission standards. One of the key engine components that has seen increased failure rates is the water pump. Sloan has focused their resources on an all “New” water pump offering. We have expanded our line to include 30 new pumps while also reducing the price of our current product offering. Sloan offers a 2-year, 200,000 mile warranty on all of our pumps. With the elimination of remanufactured pumps from our line we have also eliminated core charges. We have coverage across all makes and models. A water pump quick reference guide is located on page 194.

We carry pumps for all of the following makes:

Case
Caterpillar
Cummins
Chevrolet
Detroit Diesel
Ford
GM/GMC
International
Komatsu
Mack
Mercedes
ThermoKing

Handling Tips:

- Handle water pump with care
- Always use a new gasket.
- All pumps are greased at the factory; do not add grease.
- Drain and Flush the cooling system.
- Inspect hoses, clamps, thermostat, and radiator cap. Replace if necessary.
- Check fan belt. A glazed belt will slip at high RPM. Over tightening Will cause damage to the water pump (stress on bearing, broken shaft, broken housing)
- The fan clutch should be free running and in proper balance.
- Check the fan for loose rivets, bent blades, cracked blades, wobble and shroud clearance.

Wiper Blades

We are proud to handle all your wiper blade needs. We are the exclusive source for Michelin Heavy Duty wiper blades in the industry.

We carry the following types of wiper blades :

- Michelin Stealth Blades
- Michelin RainForce Blades
- Michelin Winter Blades
- Michelin Bulk Blades
- Sloan Flat Blades
- Sloan Flex Blades

HOTSTART®

Engine Heater Information:

Engine Heaters serve a variety of purposes. They are an important part of the engine and help provide trouble-free start-ups. On the following pages you will find a variety of products that will help sustain trouble-free engine start-ups. Engine heaters help save on warm-up time, reducing time spent idling. This helps save on fuel and prolongs battery life. The heaters reduce engine wear, 90% of engine wear is due to low water jacket temperatures.

Battery Heater Information:

At 0°F your battery has only 40% cranking power. With a battery heater you can increase cranking power to 100%. The battery heaters sustain your battery temperature at 80°F allowing more cranking power. When batteries are placed in an insulated battery box, a thermostat is recommended to sense battery box temperature to prevent overheating the battery. The battery heaters are made of a durable, fire-retardant vinyl cover that resists oils and acids. All standard battery pads and battery wraps come with 6" grounded cord and plug. The pads can boost cranking power as much as 75%.

Silicone Hot Pad Information:

Adhesive hot pad heaters are ideal for oil pans, hydraulic reservoirs, engine blocks, hydraulic cylinders and diesel fuel tanks. Application is made easy with a peel and stick feature. They have an etched foil heating element for optimal heat transfer and extended life. The durable silicone/fiberglass cover resists abrasion. They come fully assembled with a standard 6ft HPN cord and plug.

Link Cat's Eye

Check Your Tire Pressure in the Blink of an Eye!

"Eye" completely closed, tires are within recommended range and equalized.

Partially open "eye", tire pressure has dropped 5-6%.

"Eye" completely open, pressure has dropped 10% under the recommended pressure and needs immediate attention. At this point, the internal check valve is activated, isolating the good tire from additional pressure loss.

Stay CSA Compliant!

\$ Save Money Using The Cat's Eye! \$

- 25% of all dual wheel assemblies have tires that differ in pressure by more than 5 PSI - dragging the smaller tire 13 ft. per mile, on 35,000 miles a year the smaller tire would be dragged 86 miles!
- Proper tire inflation reduces tire cost 10 - 13%
- Save 2- 4% in fuel with proper inflation

Metal, Plastic & Fiberglass Polish - Paste

Sloan No.	Description
2700	.07 oz Packet in Jar Display (100 per Jar)
2701	1.76 oz Blister Tube
2702	5.29 oz Boxed Tube
2703	2.0 lb Quart Can
2704	1 Gallon Can

A Concentrated Cream That Is Unsurpassed In Its Ability To Clean, Polish, Deoxidize And Protect. Nothing Works Faster, Easier Or Better.

Use On: Brass, Copper, Silverplate, Sterling Silver, Chrome, Stainless Steel. **Removes:** Tarnish, Rust, Water Stains, Chalking, Lime Deposits, Heat Discoloration

Stainless Steel & Chrome Cleaner With Degreaser

Sloan No.	Description
2706	1.7 oz Spray Bottle
2707	16 oz Spray Bottle
2708	1 Gallon

Instantly & Easily Removes: Fingerprints, Oil, Grease, Brake Dust, Soil Wax, Soap, Automotive Fluids & More.

Safe On: Brushed Or Polished Stainless Steel, Chrome, Painted Surfaces, Plastics, Acrylics.

Brake Dust: Spray On And Let Sit To Allow Degreaser To Penetrate Greasy Residue/Brake Dust. Wipe Away With Soft Cloth Or Buffer

Stainless Steel & Chrome Polish

Sloan No.	Description
2709	1.7 oz Spray Bottle
2710	16 oz Spray Bottle
2711	1 Gallon

A Premium, Water-Based Polish. Leaves A Brilliant, Protective Gloss. Dust & Fingerprint Resistant.

Safe On: Brushed Or Polished Stainless Steel: Appliances, Gas Grills, Vent Hoods & More. Chrome, Painted Surfaces, Plastics, & Acrylics.

Use: Spray On And Wipe With Soft Cloth Along The Grain.

Magnesium Chloride Remover

Sloan No.	Description
2722	16 oz Spray Bottle
2723	1 Gallon
2724	5.5 Gallon Tote

Prevent & Maintain: Instantly Remove The Harsh Corrosion Caused By Magnesium Chloride & Calcium Chloride, Brake Dust, Calcium, Lime, Grease, Oil & Water Stains From Aluminum & Stainless Steel.

Use: Simply Spray On, Agitate And Rinse. Will Not Dull Aluminum. Safe For Use On Painted Surfaces, Fiberglass & Chrome

X-treme Stainless Steel Clean - Heavy Build-Up Remover

Sloan No.	Description
2712	16 oz Spray Bottle
2713	1 Gallon
2714	5.5 Gallon Tote

Created For X-Treme Corrosion, Grease Build Up
Removes: Heavy Grease Build Up, Mold, Rust, Calcium, Lime, Corrosion
Safe On: Stainless Steel, Chrome, Aluminum, Brass & Copper
Use: Spray Directly Onto Surface; Wait Up To 1 Minute. Scrub With Nylon Brush.
 Do Not Let Product Dry - Rinse Well With Water

Instant Battery Terminal Corrosion Remover

Sloan No.	Description
2729	16 oz Spray Bottle

Instantly Removes: Rust & Corrosion From Battery Terminals. Removes Diesel Stains, Oil, Grease, And Encrusted Calcium & Lime.
Safe On: Aluminum, Copper, Brass & Lead Terminals.
Use: Spray Directly Onto The Terminal Corrosion. Let Sit 5-10 Seconds. Scrub With Small Nylon Brush & Rinse.

Instant Calcium, Rust & Lime Remover

Sloan No.	Description
2717	16 oz Spray Bottle
2718	1 Gallon

Instantly Removes: Hard Water Spots & Rust Stains Caused By Sprinklers, Calcium Deposits & Stains, Soap Scum, Lime Deposits, Corrosion, Tarnish, Grease & Oil.
Safe On: Glass, Aluminum, Painted Surfaces, Fiberglass, Stucco, Brick, Porcelain, Brass & Copper
Warning: Not Suitable For Chrome.

Instant Brass & Copper Tarnish Remover

Sloan No.	Description
2715	16 oz Spray Bottle
2716	1 Gallon

Instantly Removes: Heavy Tarnish Without Rubbing. Safer Than Traditional Acid-Based Cleaners.
Safe On: Brass & Copper, Glass, Aluminum, Painted Surfaces, Fiberglass, Stucco, Brick, Porcelain.
Use: Just Spray & Rinse

Environmentally Friendly Products

MAXXClean Super Concentrate Degreaser

MAXXClean Super Concentrate has been formulated in partnership with the U.S. Environmental Protection Agency to provide a safer, more environmentally preferable alternative to existing cleaning products without sacrificing performance.

This highly concentrated, versatile cleaner is formulated to take on a wide range of cleaning jobs. It is able to quickly power off even stubborn soils and greases from any surface not harmed by water. Dilute it in a pail or pressure washer to wash vehicles and shop equipment, in spray bottles for glass, chrome and stainless steel, and in mop buckets or floor scrubbers.

One 5 oz. Pouch will make

- 1 Quart of Super Degreaser or
- 5 Gallons of Vehicle Wash or
- 10 Gallons of Window & Glass Cleaner

One 15 oz. Pouch will make

- 3 Quart of Super Degreaser or
- 15 Gallons of Vehicle Wash or
- 30 Gallons of Window & Glass Cleaner

MAXXGreen

**Absorbs 4X More
Than Clay**

MAXXAbsorb Universal Organic Absorbent

MAXXAbsorb is the safe, green choice for clean up of hazardous liquid spills, including oils, fuels, solvents and chemicals.

MAXXAbsorb works better and faster, and it absorbs more:

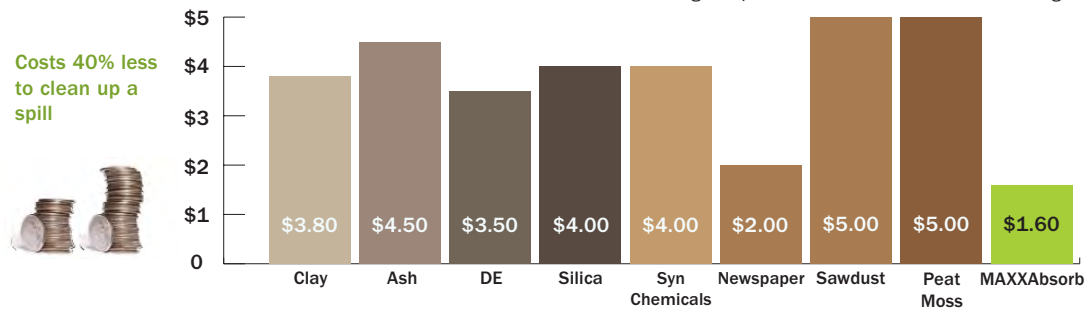

- Landfill-Safe
- Contains no chemicals or pesticides
- Will separate oil from water
- Work place and environment safe
- Contains no harmful dusts
- Lower response time; absorbs 90% capacity in under 10 minutes
